K-12 SCHOOLS

This plan is to be used in determining allocations to schools funded by the General Fund budget.

Allocations are of two types: **Discretionary and Non-Discretionary**

Discretionary (D) allocations are those which can be converted by the principal into other types of positions or into discretionary funds which would be expended at the school level.

Non-Discretionary (ND) allocations are those which can be used only for the purposes for which they are allocated to the individual school.

This plan does not cover the following categories of other personnel allocations to schools:

- Food service personnel.
- Personnel allocations for contracted programs.

Steps in the determination of Full Time Equivalent (FTE) that drive the allocations in this plan are as follows:

- a. December 2018 - Estimates of FTE are developed at the FTE Estimating Conference by program category. All systemwide estimates are reviewed after the February count.
- b. February 2019 - The Office of Budget Management develops the estimated FTE for School Operations. Region Superintendents estimate individual school FTE, not exceeding in total the estimate made at the FTE Estimating Conference.
- c. August 2019 - During the opening three weeks of school, basic teacher allocations are adjusted based on actual FTE in the ISIS file. These adjustments are made at mini-budget conferences held at the end of the second and third week of school.
- d. Final school allocations are based on actual annualized FTE in ISIS as of Friday, September 13, 2019.
- e. The annualization factor is based upon the prior year's October to February ratio for the growth/decline of enrollment.

ADMINISTRATIVE DEFERMENT

Selected non-salary appropriations will be subject to an administrative deferment that may be released partially or in full during March 2020, if year-to-date fiscal operations and enrollment are favorable.

ADULT CENTERS

Adult Centers are funded by Workforce Development with each center receiving dollars based on previous years' performance. A pro-rata share from each center will be utilized to establish reserves for new programs/equipment expansion, marketing, district supported staff, administrative deferment, uniform allowances, contracted security, repairs, and stand alone center support.

Every center will receive their earned funding at the beginning of the year. Therefore, funds distributed at the beginning of the year are to cover the cost of all expenditures (full-time instructional/support staff, non-full-time instructional/support staff and non-salary) for the full year.

Revenue entitlements will be reflected in the School-Based-Budget System. Principals are responsible for developing their budget within dollar limitations as reflected in School-Based Budget System.

Every center is expected to have a minimum allocation of one principal, one assistant principal, one secretary, one counselor, one registrar, one treasurer and one data input specialist.

WHAT RATIOS MEAN

FTE student is the basis for all allocations in this handbook.

The formulas found within this plan are for calculating the amount and type of allocations which are assigned to the various schools. Allocations designated as discretionary accounts are consolidated to form a single revenue amount for development of the school-level budget. Allocations do not, however, guarantee that any class size is necessarily the same as the formula itself. In some instances, there may be fewer students in a class, and in other instances, there may be more due to development of the school-based budget.

Students receiving ESE services meeting the criteria for support Levels 4 and 5 will be reported under Exceptional Education for the entire day. Remaining ESE students are reported under K-3, 4-8 or 9-12 Basic with ESE services. Allocations will be based upon contact hours and/or time with non-disabled peers. However, allocations will be based upon contact hours in the various weighted programs (e.g. exceptional education, ESOL, Career and Technical Education) and partial basic units will be combined with basic students to purchase basic teaching units.

SCHOOL ALLOCATION PLAN REVIEW PROCESS

The review of targeted allocations reflected in the School Allocation Plan will be conducted annually. For the 2019-20 School Allocation Plan, two review committees, consisting of parents and principals met a multitude of times from September 2018 to June 2019 to discuss and recommend changes to the allocations to the administration for approval by the School Board.

DEFINITIONS

Adult/Career and Technical Education (CTE) Centers	Adult/CTE centers have been established by the Board to serve adults and youth not attending regular day schools. Certain centers serve school age youth on a shared-time basis.
Alternative Schools	Alternative schools are those centers which have been created to provide instruction for those students who have problems in the regular program. Staffing basis for alternative schools are indicated in the section entitled Special Schools, Classes and Programs.
Completion Points	Completion points essentially represent student progression points in Workforce Development programs. As such, they represent learning gains analogous to FSA scores.
Direct Costs	Direct costs are those expenditures which can be explicitly identified with direct instructional activities.
Discretionary Allocations (K-12 Schools)	Discretionary allocations are those which are consolidated into a single revenue line for the purpose of developing a school-based budget.
Elementary Schools	For the purpose of determining allocation of staff, an elementary school is defined as any combination of elementary grades K-5 organized as an administrative unit for instruction under one administrative head.
Indirect Costs	Indirect costs are those expenditures that cannot be explicitly identified with direct instructional activities, but which support instruction, such as counselors, office staff, or custodians.
K-8 Centers	For the purpose of determining allocation of staff, K-8 centers are defined as any combination of grades K-8 organized as an administrative unit for instruction under one administrative head.
6-12 Schools	For the purpose of determining allocations 6-12 schools will be treated as middle schools until such time that they have more 9-12 students than 6-8 students. At that point they will be treated as senior high schools for allocation purposes.
Middle Schools	For the purpose of determining allocation of staff, middle schools are defined as any combination of grades 6-9 organized as an administrative unit for instruction under one administrative head.
Non-Discretionary Allocations (K-12 Schools)	Non-Discretionary allocations are those which can be used only for a specific purpose and do not consolidate into the school-based budget.
Occupational Completion Points	Occupational completion points represent industry certified points where students have gained sufficient skills for employment in specific occupations. By being industry certified, they represent an external assessment of student progress.
Occupational/Literacy Completion	Occupational/Literacy Completion points are defined by the State as measures of performance for Adult/Workforce Development programs.
Secondary Schools	For the purpose of determining allocation of staff, secondary schools are defined as any combination of grades 6-12 organized as an administrative unit for instruction under one administrative head. Normally, such schools are designated as middle or senior high school. When groups of students belonging to a grade level not normally a part of the school are housed in that school for the purpose of relieving overcrowding, pending completion of new facilities or for other reasons, staff for those students is allocated on the basis of the school to which the students have been assigned.
Senior High Schools	For the purpose of determining allocation of staff, senior high schools are defined as any combination of grades 9-12 organized as an administrative unit for instruction under one administrative head.
Workforce Education	Education for students that are enrolled in either a CTE center or community college, taking adult vocational or adult general education.

Gifted Program

1. **Elementary/K-8 Part-Time Gifted Program**

One (1) gifted teacher will be allocated for every 19.00 FTE. Gifted funding will be provided for a maximum of 12 hours per week of instruction. Each gifted teacher will service approximately two groups of 18 to 36 students depending on the contact hours per week. The following formula is used to calculate the gifted FTE generated by a school in addition to the basic funding that the gifted students generate.

$$\frac{((\text{Number of gifted students}) \times (\text{Number of contact hours per week})) \times .04}{\text{Total gifted FTE} / 19} = \text{Gifted unit allocation}$$

2. **Elementary/K-8 Full-Time Gifted Program**

One (1) gifted teacher will be allocated for every 19.00 FTE. This adjustment will assist schools in conforming to the Class Size Reduction Amendment.

3. **Middle School Gifted Program**

Gifted class size is based upon a 23.95:1 staffing ratio. Weighted funding will be provided for a maximum of 12 hours per week of instruction. Schools may schedule students for more than 12 hours per week of gifted instruction; however, all contact hours above 12 are generated by basic funding. The following formula is used to calculate the gifted FTE generated by a school in addition to the basic funding that the gifted students generate.

$$\frac{((\text{Number of gifted students}) \times (\text{Number of contact hours per week})) \times .04}{\text{Total gifted FTE} / 23.95} = \text{Gifted unit allocation}$$

Principals with large gifted student populations may elect to receive gifted units in lieu of supplements. If this option is elected, the teacher assigned to the gifted unit must be certified and must teach five gifted classes. Gifted supplements allocated to the school may be converted or combined with other credits supplements at a value of 1:8 to cover the cost of a 6020 teaching unit. When gifted supplements are converted to a full time position, they must be opened under program 6790.

Gifted Program (cont'd)**4. Senior High School Gifted Program**

Gifted class size is based upon a 28.65:1 staffing ratio. Weighted funding will be provided for a maximum of 12 hours per week of instruction. Schools may schedule students for more than 12 hours per week of gifted instruction; however, all contact hours above 12 are generated by basic funding. The following formula is used to calculate the gifted FTE generated by a school in addition to the basic funding that the gifted students generate.

$$\begin{aligned} & ((\text{Number of gifted students}) \times (\text{Number of contact hours per week})) \times .04 = \text{Total gifted FTE} \\ & \text{Total gifted FTE} / 28.65 = \text{Gifted unit allocation} \end{aligned}$$

Senior High Schools that do not offer gifted courses must provide services to gifted students via the Consultation Model. Students who are currently identified as gifted but not placed, must be staffed back into the gifted program and must have an active Education Plan (EP), indicating consultative service. The following formula should be used to compute units/supplements for gifted students receiving consultation:

$$(.09 \times \text{number of students}) / 28.65 = \text{Number of gifted units based on FTE} \times 5 \text{ for supplements}$$

Principals with large gifted student populations may elect to receive gifted units in lieu of supplements. If this option is elected, the teacher assigned to the gifted unit must be certified and must teach five gifted classes. Gifted supplements allocated to the school may be converted or combined with other credit supplements at a value of 1:8 to cover the cost of a 6030 teacher unit. When gifted supplements are converted to a full time position, they must be opened under program 6790.

5. Gifted – Material, Equipment and Supplies Allocation (5213 – 6790 – 5510)

Schools receive MESA funds at the rate of \$29.49 per gifted FTE data as of the fourth week of the operating year.

Schools of Choice – Magnet Program Allocations

The overarching purpose of magnet programs and magnet schools is to provide unique educational programs for students beyond a single attendance boundary. These specialized programs require additional resources and/or ancillary services beyond those generated by basic FTE. As such, magnet programs and magnet schools will receive supplemental funding based on the following criteria:

1. **General Allocation - Basic Formula**

Magnet programs and magnet schools will each receive a base allocation based on program type, total student enrollment, out-of-boundary (G Coded) student enrollment, and special program needs.

Each magnet school will receive an annual budget allocation to fund additional costs associated with the delivery of the magnet theme/focus, which are not generated through the basic FTE allocation.

The School Choice and Parental Options office creates a budget for each magnet school, inclusive of salary and non-salary line items, to fund the cost of resources associated with the magnet program(s). These budgets are entered into the Magnet SBBS by the Budget office. The budget is then reviewed by the school principal. Requests for changes must be submitted to School Choice and Parental Options for review and final approval prior to the funds being distributed to each school. School Choice and Parental Options office reserves the right to adjust allocations as deemed necessary to meet program needs.

2. **Allocation Off-Set**

Magnet programs and magnet schools must achieve the minimum G-coded transfer ratio of 25% in a school wide magnet with boundaries or 50% in a magnet program within a school with boundaries. Magnet programs and magnet schools failing to meet this criterion are reviewed on a case-by-case basis for possible allocation reductions.

3. **Unique Programs Allocations Formula**

Unique Program Allocations listed below are factors used in determining the budget allocations for each magnet program:

- Area of Interaction Supplements (Team Leader) for IB Middle School Programs
- Lead Teachers for IB senior high school programs
- Teacher for Montessori Pre-K classrooms
- Dues and Fees (membership and tests) for IB, Cambridge, and Museums
- Professional and Technical for lease agreements, contracts, and dual enrollment
- Extra-period supplements to deliver magnet theme coursework for schools with an 8th period day.

Magnet budget allocations are adjusted in an effort to sustain programs and maintain adequate staffing levels.

Instructional Materials Allocation

The instructional materials allocation, a categorical program, slightly decreased over the previous year. Opportunity Scholarships, Dual Enrollment, Charter Schools, Library Media, Freight Charges, Science Lab Materials, New Schools, and New Grade Configurations are funded from the state instructional materials allocation.

1. Instructional Materials Funds

- A. Instructional Materials, the major tools of instruction, as defined in Section 1006.40 (04), Florida Statutes, include the following: hardback and soft backed textbooks, consumables, learning laboratories, manipulative, electronic media, and computer courseware or software. The term does not include electronic or computer hardware even if such hardware is bundled with software or other electronic media.
- B. Distribution Procedures/Time Lines
 - 1. Staff shall calculate each school's entitlement for the major adoptions. Adequate monies will be spent on each location to purchase materials for each student. Adult Education School Allocation Plan Methodology

The Adult Education Schools Allocation Plan is grounded in a business model which rewards schools that can maintain or increase student enrollment, retention, and performance. The starting point for the allocation is the state workforce funding revenue included yearly in the General Appropriations Act (GAA). A funding committee comprised of school principals, Region Directors, staff from District/School Operations and Budget Management meet yearly to review the details of the allocation plan.

The revenue is formula allocated to the schools. Each principal is responsible for managing the budget and allocating full-time and part-time positions to fulfill the mission of the school. Below, is a review of the formula and the decision points the committee must process each year.

Initial Data Processing (School Funding Process)

The formula is driven by actual student enrollment and performance data including:

- The latest available student enrollment (membership hours) as compiled by Assessment, Research, and Data Analysis
- The latest available student performance point counts (which involve the weighted completion points, job placements, and end of program assessments such as high school diplomas, GED, and vocational certificates) as compiled by the Florida Department of Education (FLDOE)

At the end of the allocation process, each school has a final budget which is published jointly by District/School Operations and the Office of Budget Management.
