

# 2009 State Teacher Policy Yearbook

Mississippi

OVERALL GRADE

D+

National Council on Teacher Quality

## Acknowledgments

### STATES

State education agencies remain our most important partners in this effort, and their extensive experience has helped to ensure the factual accuracy of the final product. Every state formally received a draft of the *Yearbook* in July 2009 for comment and correction; states also received a final draft of their reports a month prior to release. All states graciously reviewed and responded to our drafts. While states do not always agree with our recommendations, the willingness of most states to acknowledge the imperfections of their teacher policies is an important first step toward reform.

We also thank the many state pension boards that reviewed our drafts and responded to our inquiries.

### FUNDERS

The primary funders for the 2009 *Yearbook* were:

- Bill and Melinda Gates Foundation
- Daniels Fund
- Fisher Family Foundation
- Gleason Family Foundation
- George Gund Foundation
- Houston Endowment
- The Joyce Foundation

*The National Council on Teacher Quality does not accept any direct funding from the federal government.*

### STAFF

Sandi Jacobs, *Project Director*

Sarah Brody, *Project Assistant*

Kelli M. Rosen, *Lead Researcher*

Trisha M. Madden, Stephanie T. Maltz and Tracey L. Myers-Preston, *Researchers*

Thank you to Bryan Gunning and the team at CPS Inc. for their design of the 2009 *Yearbook*. Thanks also to Colleen Hale at Summerhouse Studios for the original *Yearbook* design and to Jeff Hale for technical support.

# Executive Summary

Welcome to the Mississippi edition of the National Council on Teacher Quality's 2009 *State Teacher Policy Yearbook*. This analysis is our third annual look at state policies impacting the teaching profession. We hope that this report will help focus attention on areas where state policymakers can make changes that will have a positive impact on teacher quality and student achievement.

The 2009 *Yearbook* presents a comprehensive analysis of state teacher policies. Our evaluation is organized in five areas encompassing 33 goals. Broadly, these goals examine the impact of state policy on 1) delivering well-prepared teachers, 2) expanding the teaching pool, 3) identifying effective teachers, 4) retaining those deemed effective and 5) exiting those deemed ineffective.

## Mississippi at a Glance

**Overall 2009 Yearbook Grade: D+**

### AREA GRADES:

Area 1 <i>Delivering Well Prepared Teachers</i>	C
Area 2 <i>Expanding the Teaching Pool</i>	C
Area 3 <i>Identifying Effective Teachers</i>	D
Area 4 <i>Retaining Effective Teachers</i>	D
Area 5 <i>Exiting Ineffective Teachers</i>	C

### GOAL BREAKDOWN:

 Fully meets	5
 Nearly meets	2
 Partially meets	7
 Only meets a small part	8
 Does not meet	11

### MAJOR POLICY STRENGTHS:

- Requires that all new teachers pass subject-matter licensure tests prior to entering the classroom, earning the state a "best practice" designation
- Ensures that middle school teachers are prepared to teach appropriate grade-level content
- Maintains full authority to approve teacher preparation programs

### MAJOR POLICY WEAKNESSES:

- Awards tenure virtually automatically
- Fails to make evidence of student learning the preponderant criterion in teacher evaluations
- Lacks an efficient termination process for ineffective teachers
- Does not ensure that special education teachers have subject-matter knowledge

## How is Mississippi Faring?

### Area 1: C

#### *Delivering Well Prepared Teachers*

Mississippi's policies supporting the delivery of well-prepared teachers are in need of improvement. The state requires teacher candidates to pass a basic skills test prior to program admission; however, it does not ensure that elementary teachers are provided with a broad liberal arts education. Elementary teacher preparation programs are required to address the science of reading, but they are not required to provide mathematics content specifically geared to the needs of elementary teachers. The state does not require elementary candidates to pass a test of the science of reading or a rigorous mathematics assessment. Mississippi's policy regarding the preparation of middle school teachers to teach appropriate grade-level content is excellent; however, the state does not ensure that special education teachers are adequately prepared to teach content-area subject matter. Commendably, Mississippi requires all new teachers to pass a pedagogy test to attain licensure. Although it relies on some objective, meaningful data, the state does not hold preparation programs accountable for the quality of teachers they produce. Mississippi has, however, retained full authority over its program approval process. Further, the state lacks any policy that ensures efficient preparation of teacher candidates in terms of the professional coursework that may be required.

### Area 2: C

#### *Expanding the Pool of Teachers*

Mississippi's alternate routes to teacher certification need improvement. The state's alternate routes are not sufficiently selective, and coursework does not adequately address the needs of new teachers. Commendably, the state offers streamlined coursework, provides flexibility for nontraditional candidates and does not place restrictions on providers. However, Mississippi limits the usage of its alternate routes and does not collect objective data to hold alternate route programs accountable for the performance of the teachers they prepare. Further, the state's policies targeting licensure reciprocity create unnecessary obstacles for out-of-state teachers.

### Area 3: D

#### *Identifying Effective Teachers*

Mississippi's efforts to identify teacher effectiveness leave room for improvement. Although the state has all the elements of a student- and teacher-level longitudinal data system, it does not use this data system to provide value-added evidence of teacher effectiveness. Its teacher evaluation system considers limited measures of student learning, but the state fails to require evidence of student learning through objective measures such as standardized test scores. Unfortunately, Mississippi also fails to require multiple evaluations for new teachers or annual evaluations for nonprobationary teachers. In addition, the probationary period for new teachers in Mississippi is a mere 12 months, and the state lacks any meaningful process to evaluate cumulative effectiveness in the classroom before teachers are awarded permanent status. Further, the state's licensure requirements are not based on evidence of teacher effectiveness, and it reports little school-level data that can help support the equitable distribution of teacher talent.

## Area 4: D

### *Retaining Effective Teachers*

Mississippi requires that all new teachers receive mentoring. The state supports differential pay for teachers working in high-needs schools and shortage subject areas and performance pay, but its other policies regarding teacher compensation are sorely lacking. Mississippi does not give districts full authority for how teachers are paid and does not support retention bonuses or compensation for relevant prior work experience. In addition, the state's pension system is not currently financially sustainable. Mississippi only provides a defined benefit pension plan for teachers, and its pension policies are not portable, flexible or fair to all workers. Further, retirement benefits are determined by a formula that is not neutral, meaning that pension wealth does not accumulate uniformly for each year a teacher works.

## Area 5: C

### *Exiting Ineffective Teachers*

Mississippi commendably requires that all teachers pass all required subject-matter tests as a condition of initial licensure. However, the state only requires that teachers in "Priority Schools" who receive an unsatisfactory evaluation be placed on an improvement plan and then made eligible for dismissal if they do not improve. Regrettably, Mississippi allows tenured teachers who are terminated for poor performance to appeal multiple times, and it fails to distinguish due process rights for teachers dismissed for ineffective performance from those facing license revocation for dereliction of duty or felony and/or morality violations.

## About the 2009 Yearbook

The 2009 edition of the *State Teacher Policy Yearbook* is the National Council on Teacher Quality's third annual review of state laws, rules and regulations that govern the teaching profession. This year's report is a comprehensive analysis of the full range of each state's teacher policies, measured against a realistic blueprint for reform.

The release of the 2009 *Yearbook* comes at a particularly opportune time. Race to the Top, the \$4.5 billion federal discretionary grant competition, has put unprecedented focus on education reform in general, and teacher quality in particular. In many respects, the *Yearbook* provides a road map to the Race to the Top, addressing key policy areas such as teacher preparation, evaluation, alternative certification and compensation. Our analysis makes clear that states have a great deal of work to do in order to ensure that every child has an effective teacher.

The 2009 *Yearbook* revisits most of the goals from our first two editions, with a few new goals added for good measure. With ongoing feedback from state officials, practitioners, policy groups and other education organizations, as well as NCTQ's own nationally respected advisory group, we have continued to refine and develop our policy goals. Consequently, many of the goals and related indicators have changed from previous reviews. We therefore have not published comparisons with prior ratings, but look forward to tracking state progress in future editions.

Our goals meet NCTQ's five criteria for an effective reform framework:

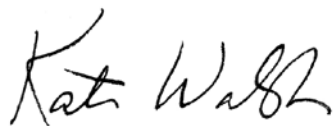

1. They are supported by a strong rationale, grounded in the best research available.  
(A full list of the citations supporting each goal can be found at [www.nctq.org/stpy](http://www.nctq.org/stpy).)
2. They offer practical, rather than pie-in-the-sky, solutions for improving teacher quality.
3. They take on the teaching profession's most pressing needs, including making the profession more responsive to the current labor market.
4. They are for the most part relatively cost neutral.
5. They respect the legitimate constraints that some states face so that the goals can work in all 50 states.

As is now our practice, in addition to a national summary report, we have customized the *Yearbook* so that each state has its own report, with its own analyses and data. Users can download any of our 51 state reports (including the District of Columbia) from our website at [www.nctq.org/stpy](http://www.nctq.org/stpy). Since some national perspective is always helpful, each state report contains charts and graphs showing how the state performed compared to all other states. We also point to states that offer a "Best Practice" for other states to emulate.

In addition to giving an overall grade, we also give "sub-grades" in each of the five areas organizing the goals. These grades break down even further, with an eye toward giving a full perspective on the states' progress. We rate state progress on the individual goals using a familiar and useful graphic: ● ●● ●● ●●● ○.

We hope the *Yearbook* continues to serve as an important resource for state school chiefs, school boards, legislatures and the many advocates who press hard for reform. In turn, we maintain our commitment to listen and learn.

Sincerely,

Kate Walsh, *President*

# Goals

	<i>page</i>
<b>AREA 1: DELIVERING WELL PREPARED TEACHERS</b>	
<i>1-A: Admission into Preparation Programs</i>	7
The state should require undergraduate teacher preparation programs to administer a basic skills test as a criterion for admission.	
<i>1-B: Elementary Teacher Preparation</i>	10
The state should ensure that its teacher preparation programs provide elementary teachers with a broad liberal arts education.	
<i>1-C: Teacher Preparation in Reading Instruction</i>	17
The state should ensure that new elementary teachers know the science of reading instruction.	
<i>1-D: Teacher Preparation in Mathematics</i>	21
The state should ensure that new elementary teachers have sufficient knowledge of mathematics content.	
<i>1-E: Middle School Teacher Preparation</i>	24
The state should ensure that middle school teachers are sufficiently prepared to teach appropriate grade-level content.	
<i>1-F: Special Education Teacher Preparation</i>	28
The state should ensure that special education teachers are prepared to teach content-area subject matter.	
<i>1-G: Assessing Professional Knowledge</i>	33
The state should use a licensing test to verify that all new teachers meet its professional standards.	
<i>1-H: Teacher Preparation Program Accountability</i>	36
The state's approval process for teacher preparation programs should hold programs accountable for the quality of the teachers they produce.	
<i>1-I: State Authority for Program Approval</i>	39
The state should retain full authority over its process for approving teacher preparation programs.	
<i>1-J: Balancing Professional Coursework</i>	42
The state should ensure that teacher preparation programs provide an efficient and balanced program of study.	
<b>AREA 2: EXPANDING THE POOL OF TEACHERS</b>	
<i>2-A: Alternate Route Eligibility</i>	45
The state should require alternate route programs to exceed the admission requirements of traditional preparation programs while also being flexible to the needs of nontraditional candidates.	
<i>2-B: Alternate Route Preparation</i>	49
The state should ensure that its alternate routes provide streamlined preparation that is relevant to the immediate needs of new teachers.	
<i>2-C: Alternate Route Usage and Providers</i>	53
The state should provide an alternate route that is free from regulatory obstacles that inappropriately limit its usage and providers.	
<i>2-D: Alternate Route Program Accountability</i>	59
The state should ensure that its approval process for alternate route programs holds them accountable for the performance of their teachers.	
<i>2-E: Licensure Reciprocity</i>	62
The state should help to make teacher licenses fully portable among states, with appropriate safeguards.	

# Goals

<b>AREA 3: IDENTIFYING EFFECTIVE TEACHERS</b>	<i>page</i>
<i>3-A: State Data Systems</i>	67
The state should develop a data system that contributes some of the evidence needed to assess teacher effectiveness.	
<i>3-B: Evaluation of Effectiveness</i>	70
The state should require instructional effectiveness to be the preponderant criterion of any teacher evaluation.	
<i>3-C: Frequency of Evaluations</i>	74
The state should require annual evaluations of all teachers and multiple evaluations of all new teachers.	
<i>3-D: Tenure</i>	78
The state should require that tenure decisions be meaningful.	
<i>3-E: Licensure Advancement</i>	81
The state should ensure that licensure advancement is based on evidence of effectiveness.	
<i>3-F: Equitable Distribution</i>	85
The state should contribute to the equitable distribution of teacher talent among schools in its districts by means of good reporting.	
<b>AREA 4: RETAINING EFFECTIVE TEACHERS</b>	
<i>4-A: Induction</i>	89
The state should require effective induction for all new teachers, with special emphasis on teachers in high-needs schools.	
<i>4-B: Pay Scales</i>	92
The state should give local districts full authority for pay scales, eliminating potential barriers such as state salary schedules and other regulations that control how districts pay teachers.	
<i>4-C: Retention Pay</i>	96
The state should support retention pay, such as significant boosts in salary after tenure is awarded, for effective teachers.	
<i>4-D: Compensation for Prior Work Experience</i>	98
The state should encourage districts to provide compensation for related prior subject-area work experience.	
<i>4-E: Differential Pay</i>	101
The state should support differential pay for effective teaching in shortage and high-needs areas.	
<i>4-F: Performance Pay</i>	104
The state should support performance pay, but in a manner that recognizes its infancy, appropriate uses and limitations.	
<i>4-G: Pension Sustainability</i>	107
The state should ensure that excessive resources are not committed to funding teachers' pension systems.	
<i>4-H: Pension Flexibility</i>	114
The state should ensure that pension systems are portable, flexible and fair to all teachers.	
<i>4-I: Pension Neutrality</i>	123
The state should ensure that pension systems are neutral, uniformly increasing pension wealth with each additional year of work.	
<b>AREA 5: EXITING INEFFECTIVE TEACHERS</b>	
<i>5-A: Licensure Loopholes</i>	127
The state should close loopholes that allow teachers who have not met licensure requirements to continue teaching.	
<i>5-B: Unsatisfactory Evaluations</i>	130
The state should articulate consequences for teachers with unsatisfactory evaluations, including specifying that teachers with multiple unsatisfactory evaluations are eligible for dismissal.	
<i>5-C: Dismissal for Poor Performance</i>	133
The state should ensure that the process for terminating ineffective teachers is expedient and fair to all parties.	
<b>APPENDIX</b>	137

# Area 1: Delivering Well Prepared Teachers

## Goal A – Admission into Preparation Programs

The state should require undergraduate teacher preparation programs to administer a basic skills test as a criterion for admission.

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require teacher candidates to pass a basic skills test that assesses reading, writing and mathematics as a criterion for admission to teacher preparation programs. All preparation programs in a state should use a common test to facilitate program comparison. The state, not teacher preparation programs, should set the score needed to pass this test. Programs should have the option of exempting from this test candidates who submit comparable SAT/ACT scores at a level set by the state.

### Rationale

- ▶ See appendix for detailed rationale.
- The most appropriate time for assessing basic skills is at program entry.
- Screening candidates at program entry protects the public's investment.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 1

### How States are Faring in Admission Requirements

## Area 1: Goal A **Mississippi** Analysis

### ● State Meets Goal

#### ANALYSIS

Mississippi requires that approved undergraduate teacher preparation programs only accept teacher candidates who have passed a basic skills test, the Praxis I. The state sets the minimum score for this test. The state also allows teacher preparation programs to exempt candidates who demonstrate equivalent performance on the SAT or ACT.

#### SUPPORTING RESEARCH

Mississippi Educator Preparation Programs Process and Performance Reviews: Teacher Education Process Standards [http://www.mde.k12.ms.us/ed\\_licensure/pdf/PP\\_Review\\_MEPP\\_2008.pdf](http://www.mde.k12.ms.us/ed_licensure/pdf/PP_Review_MEPP_2008.pdf)

#### RECOMMENDATION

Mississippi meets this goal.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi was helpful in providing NCTQ with facts that enhanced our analysis.

## ★ Examples of Best Practice

A number of states--Connecticut, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee and West Virginia--require candidates to pass a basic skills test as a condition of admission to a teacher preparation program. These states set a minimum passing score for the test and also eliminate unnecessary testing by allowing candidates to opt out of the basic skills test by demonstrating a sufficiently high score on the SAT or ACT.

Figure 2

### When do states test teacher candidates' basic skills?

Figure 3

- 1 California requires teacher candidates to take, but not pass, a basic skills test prior to admission.
- 2 Programs in Florida may accept up to 10 percent of an entering class who have not passed a basic skills test.
- 3 Programs in Virginia may accept candidates who have not met the required passing score.

Figure 3

# Area 1: Delivering Well Prepared Teachers

## Goal B – Elementary Teacher Preparation

The state should ensure that its teacher preparation programs provide elementary teachers with a broad liberal arts education.

Figure 4

### *How States are Faring in the Preparation of Elementary Teachers*

- ★ 0 Best Practice States
- 0 States Meet Goal
- ◐ 7 States Nearly Meet Goal  
California, Massachusetts, Michigan, New Hampshire, Oregon, Texas, Washington
- ◑ 12 States Partly Meet Goal  
Arizona, Colorado, Florida, Georgia, Illinois, Kansas, Louisiana, New Mexico, New York, Oklahoma, Tennessee, Virginia
- ◒ 17 States Meet a Small Part of Goal  
Alabama, Arkansas, Connecticut, Indiana, Iowa, Minnesota, MISSISSIPPI, Missouri, Nebraska, New Jersey, North Carolina, North Dakota, Pennsylvania, Utah, Vermont, West Virginia, Wisconsin
- 15 States Do Not Meet Goal  
Alaska, Delaware, District of Columbia, Hawaii, Idaho, Kentucky, Maine, Maryland, Montana, Nevada, Ohio, Rhode Island, South Carolina, South Dakota, Wyoming

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that its approved teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework. An adequate curriculum is likely to require approximately 36 credit hours to ensure appropriate depth in the core subject areas of English, science, social studies and fine arts. (Mathematics preparation for elementary teachers is discussed in Goal 1-D.) An appropriate elementary teacher preparation program should be something like:
  - three credit hours (or standards to justify) of a survey of American literature;
  - three credit hours (or standards to justify) of the technical aspects of good writing and grammar;
  - three credit hours (or standards to justify) of a survey of children's literature;
  - six credit hours (or standards to justify) of general science, covering basic topics in earth science, biology, physics, and chemistry;
  - six credit hours (or standards to justify) of a survey of U.S. history and/or U.S. government;
  - six credit hours (or standards to justify) of a survey of world history, including ancient history;
  - three credit hours (or standards to justify) of world cultures and religion, including geography;
  - three credit hours (or standards to justify) of a survey of music appreciation; and
  - three credit hours (or standards to justify) of a survey of art history.

### Goal Components cont.

2. The state should require elementary teacher candidates to complete a content specialization in an academic subject area. In addition to enhancing content knowledge, this requirement also ensures that prospective teachers have taken higher level academic coursework.
3. Arts and sciences faculty, rather than education faculty, should teach liberal arts coursework to teacher candidates.
4. The state should allow elementary teacher candidates to test out of specific coursework requirements, provided the test that is limited to a single particular subject area.

### Rationale

- ▶ **See appendix for detailed rationale.**
- Elementary teachers need liberal arts coursework that is relevant to the PK through 6 classroom.
- An academic concentration enhances content knowledge and ensures that prospective elementary teachers take higher level academic coursework.
- Standards-based programs can work when verified by testing.
- Mere alignment with student learning standards is not sufficient.
- Subject-area coursework should be taught by arts and sciences faculty.
- Teacher candidates need to be able to “test out” of coursework requirements.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 1: Goal B Mississippi Analysis

### State Meets a Small Part of Goal

#### ANALYSIS

Mississippi relies on both coursework requirements and its standards for teacher preparation programs as the basis for articulating the subject-matter knowledge that elementary teacher candidates must have across all areas.

The state requires that all elementary teacher candidates complete an interdisciplinary program of study that includes two 18- or 21-hour content concentrations. These shall include, but are not limited to:

- 12 credit hours in English;
- 9 credit hours in science;
- 12 credit hours in social studies; and
- 6 credit hours in fine arts/teaching of fine arts.

These are sensible indicators of important curricular areas, but there is no guarantee that the courses used to meet these requirements will be relevant to the PK-6 classroom. There also appears to be no guarantee that arts and sciences faculty will teach liberal arts classes to teacher candidates or that a test-out option is available for candidates who may already have a strong background in one or more content areas.

Mississippi has also adopted NCATE's Association for Childhood Education International (ACEI) standards for approving its elementary programs. However, ACEI standards fall far short of the mark by offering no mention of world and American history; world, British and American literature; American government; or grammar and composition. ACEI standards do mention important topics in science, but even in those areas, its standards consist mainly of extremely general competencies that programs should help teacher candidates to achieve.

Finally, it is not enough for a state to direct teacher preparation programs to teach to its standards, the state must also test candidates on the standards. In Mississippi, all new elementary teachers must pass the Praxis II test "Elementary Education: Curriculum, Instruction and Assessment." While this policy puts the state in technical compliance with NCLB's requirement that all elementary teachers pass a test of broad subject matter, this commercial test is aligned with only the more ambiguous state standards. More importantly, it is combined with a pedagogical assessment and does not report teacher performance in each subject area, meaning that it is possible to pass the test and still fail some subject areas, especially given low state cut scores.

#### SUPPORTING RESEARCH

Mississippi Educator Preparation Programs, Process and Performance Reviews [http://www.mde.k12.ms.us/ed\\_licensure/teacher\\_education.html](http://www.mde.k12.ms.us/ed_licensure/teacher_education.html)

[www.ets.org/praxis](http://www.ets.org/praxis)

## RECOMMENDATION

Mississippi meets only a small part of this goal. The state should ensure that prospective elementary teachers have appropriate and sufficient subject-matter preparation in one of two ways. First, Mississippi could establish comprehensive coursework requirements that are more specifically geared to the areas of knowledge needed by elementary teachers. Allowing teacher candidates to pick and choose coursework under ambiguous requirements (e.g., "English" or "history") may lead to far too many gaps in essential knowledge. Arts and sciences faculty should teach this coursework, and teacher candidates should be allowed to test out of core coursework requirements so that qualified candidates may pursue other course selections and are not forced to retake survey courses they may have already had in high school. Alternatively, Mississippi could articulate a more specific set of standards and then administer a licensing test based on it.

## MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi asserted that elementary teachers are required to complete two areas of concentration in a content area. In addition, the state contended that arts and sciences faculty teach the liberal arts coursework, and that candidates have the CLEP [College-Level Examinations Program] option, which allows them to "bypass classes already mastered."

---

## LAST WORD

The requirement of two areas of concentration is acknowledged in the analysis; however, there is no guarantee that the courses used to meet these requirements will be relevant to the PK-6 classroom.

## ★ Examples of Best Practice

Although no state meets this goal, two have articulated noteworthy policies. **Massachusetts's** testing requirements, which are based on the state's curriculum, ensure that elementary teachers are provided with a broad liberal arts education. **Texas** articulates detailed standards in which preparation programs must frame instruction for elementary teachers. Both states also require that arts and sciences faculty teach liberal arts courses to teacher candidates. Neither state requires separate passing scores for each subject area on general curriculum tests, but both utilize licensing assessments based on their own standards.

Figure 5

*What subjects does Mississippi expect elementary teachers to know?*

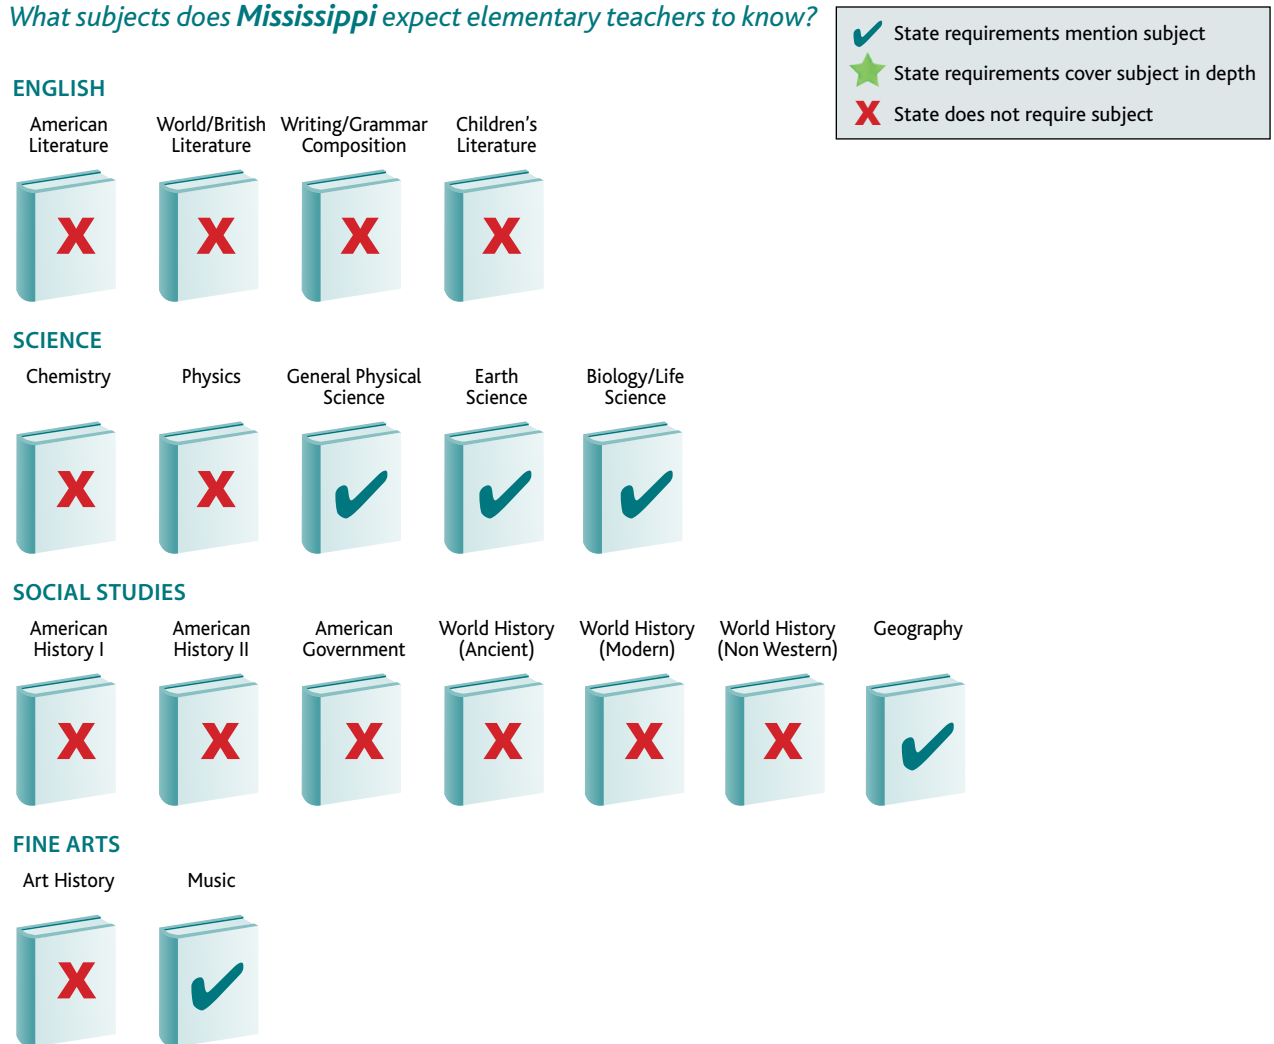

Figure 6

*Do states expect elementary teachers to know core content?*

**ENGLISH**

**SCIENCE**

**SOCIAL STUDIES**

**FINE ARTS**

Figure 7

*Do states expect elementary teachers to complete an academic concentration?*

1 California, Colorado, Connecticut, Iowa³, Massachusetts, Michigan⁴, New Jersey, New Mexico, Tennessee, Texas, Vermont, Virginia.

2 Mississippi, New Hampshire. Mississippi requires two content concentrations.

3 Although Iowa requires a subject-area major, it consists mostly of education courses.

4 Michigan also allows a group major with a minor, or three minors.

# Area 1: Delivering Well Prepared Teachers

## Goal C – Teacher Preparation in Reading Instruction

The state should ensure that new elementary teachers know the science of reading instruction.

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. To ensure that teacher preparation programs adequately prepare candidates in the science of reading, the state should require that these programs train teachers in the five instructional components shown by scientifically based reading research to be essential to teaching children to read.
2. The most flexible and effective way of achieving this crucial goal is by requiring that new teachers pass a rigorous test of reading instruction in order to attain licensure. Most current tests of pedagogy and reading instruction allow teachers to pass without knowing the science of reading instruction. If a state elects to test knowledge of reading instruction on a general test of pedagogy or elementary content, it should require that the testing company report a subscore clearly revealing the candidates' knowledge in the science of reading. Elementary teachers who do not possess the minimum knowledge needed should not be eligible for a teaching license.

### Rationale

- ▶ See appendix for detailed rationale.
- Reading science has identified five components of effective instruction.
- Most current reading tests do not offer assurance that teachers know the science of reading.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 8

### How States are Faring in Preparing Teachers to Teach Reading

## Area 1: Goal C **Mississippi** Analysis

### State Partly Meets Goal

#### ANALYSIS

In its standards for elementary teacher preparation, Mississippi requires teacher preparation programs to address the science of reading. Programs must provide training in the five instructional components of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension.

However, the state does not require teacher candidates to pass an assessment that measures knowledge of scientifically based reading instruction prior to certification or at any point thereafter.

#### SUPPORTING RESEARCH

Mississippi Educator Preparation Programs, Process and Performance Reviews [http://www.mde.k12.ms.us/ed\\_licensure/teacher\\_education.html](http://www.mde.k12.ms.us/ed_licensure/teacher_education.html)

#### RECOMMENDATION

Mississippi meets this goal in part. Although the state is commended for requiring teacher preparation programs to address the science of reading, Mississippi should also utilize a rigorous assessment tool to ensure that its elementary teacher candidates are adequately prepared before entering the classroom. The state's assessment should clearly test knowledge and skills related to the science of reading, similar to the assessment adopted by Massachusetts, and if it is combined with an assessment that also tests general pedagogy or elementary content, it should report a subscore for the science of reading specifically. Elementary teachers who do not possess the minimum knowledge in this area should not be eligible for licensure.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi was helpful in providing NCTQ with the facts necessary for our analysis.

Figure 10

*Do states require preparation for elementary teachers in the science of reading?*

### ★ Examples of Best Practice

Connecticut, Massachusetts and Virginia presently require preparation programs for elementary teacher candidates to address the science of reading. All three states also require candidates to pass comprehensive assessments that specifically test the five elements of instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension.

---

Figure 11

*Do states measure new teachers' knowledge of the science of reading?*

# Area 1: Delivering Well Prepared Teachers

## Goal D – Teacher Preparation in Mathematics

The state should ensure that new elementary teachers have sufficient knowledge of mathematics content.

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require teacher preparation programs to deliver mathematics content of appropriate breadth and depth to elementary teacher candidates. This content should be specific to the needs of the elementary teacher (i.e., foundations, algebra and geometry, with some statistics).
2. The state should require elementary teacher candidates to pass a rigorous test of mathematics content in order to attain licensure. Such test can also be used to test out of content requirements. Elementary teachers who do not possess the minimum knowledge needed should not be eligible for a teaching license.

### Rationale

- ▶ See appendix for detailed rationale.
- Required math coursework should be tailored in both design and delivery to the unique needs of the elementary teacher.
- Most state tests offer no assurance that teachers are prepared to teach mathematics.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 12

### How States are Faring in Preparing Teachers to Teach Math

## Area 1: Goal D **Mississippi** Analysis

### State Meets a Small Part of Goal

#### ANALYSIS

Mississippi relies on both coursework requirements and national accreditation standards for teacher preparation programs as the basis for articulating its requirements for the mathematics content knowledge of elementary teacher candidates.

The state requires elementary teaching candidates to earn at least nine semester hours of credit in mathematics. However, the state specifies neither the requisite content of these classes nor that they must meet the needs of elementary teachers.

Mississippi has also adopted NCATE's ACEI (Association for Childhood Educational International) standards for approving its elementary programs. ACEI standards address content in mathematics foundations, but these standards lack the specificity needed to ensure that teacher preparation programs deliver other mathematics content of appropriate breadth and depth to elementary teacher candidates. For example, ACEI algebra standards state that teacher candidates should "know, understand and apply algebraic principles," but these standards make little mention of the actual knowledge that might contribute to such an understanding.

Finally, Mississippi requires that all new elementary teachers pass a general subject-matter test, the Praxis II. This commercial test lacks a specific mathematics subscore, so one can fail the mathematics portion and still pass the test. Further, while this test does cover important elementary school-level content, it barely evaluates candidates' knowledge beyond an elementary school level, does not challenge their understanding of underlying concepts and does not require candidates to apply knowledge in nonroutine, multistep procedures.

"No Common Denominator: The Preparation of Elementary Teachers in Mathematics by America's Education Schools," NCTQ, June 2008 [http://www.nctq.org/p/publications/docs/nctq\\_ttmath\\_fullreport.pdf](http://www.nctq.org/p/publications/docs/nctq_ttmath_fullreport.pdf)

---

#### RECOMMENDATION

Mississippi meets only a small part of this goal. Although ACEI standards require some knowledge of algebra, geometry and data analysis, Mississippi should require teacher preparation programs to provide mathematics content that is specifically geared to the needs of elementary teachers. This includes specific coursework in foundations, algebra and geometry, with some statistics. Mississippi should also test requisite mathematics content with a rigorous assessment tool, such as the test Massachusetts recently adopted. Such test could also be used to allow candidates to test out of coursework requirements. Teacher candidates who lack minimum mathematics knowledge should not be eligible for licensure.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi asserted that its nine semester hours of core mathematics courses must include algebra, geometry and statistics, plus a three-hour math methods class.

---

#### LAST WORD

The state is urged to require that these coursework requirements be more specifically geared to the needs of elementary teachers.

Figure 13

*Do states require appropriate mathematics preparation for elementary teachers?*

1 Massachusetts

2 Arkansas, Colorado, Connecticut, Iowa, Louisiana, Maine, Maryland, Nebraska, Nevada, New Jersey, North Carolina, Ohio, West Virginia, Wisconsin

★ **Examples of Best Practice**

**Massachusetts** ensures that its elementary teachers have sufficient knowledge of mathematics content. As part of its general curriculum test, the state utilizes a separately scored mathematics subtest that covers topics specifically geared to the needs of elementary teachers.

---

Figure 14

*Do states measure new elementary teachers' knowledge of math?*

2 Montana

# Area 1: Delivering Well Prepared Teachers

## Goal E – Middle School Teacher Preparation

The state should ensure that middle school teachers are sufficiently prepared to teach appropriate grade-level content.

Figure 15

### *How States are Faring in Preparing Middle School Teachers*

- ★ **1** Best Practice State  
Georgia
- **5** States Meet Goal  
Connecticut, Kentucky, Louisiana, **MISSISSIPPI**, New Jersey
- ◐ **12** States Nearly Meet Goal  
Alabama, Arkansas, District of Columbia, Florida, Indiana, Kansas, New York, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia
- ◑ **14** States Partly Meet Goal  
Delaware, Hawaii, Iowa, Maryland, Massachusetts, Missouri, Nebraska, North Carolina, Rhode Island, South Dakota, Texas, Vermont, West Virginia, Wyoming
- ◒ **9** States Meet a Small Part of Goal  
Arizona, Michigan, Montana, Nevada, New Hampshire, New Mexico, North Dakota, Oklahoma, Utah
- **10** States Do Not Meet Goal  
Alaska, California, Colorado, Idaho, Illinois, Maine, Minnesota, Oregon, Washington, Wisconsin

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should encourage middle school candidates who intend to teach multiple subjects to earn two minors in two core academic areas rather than a single major. Middle school candidates intending to teach a single subject area should earn a major in that area.
2. The state should not permit middle school teachers to teach on a generalist license, which does not differentiate between the preparation of middle school teachers and that of elementary teachers.
3. The state should require that new middle school teachers pass a test in every core academic area they intend to teach.

### Rationale

- ▶ See appendix for detailed rationale.
- States must differentiate middle school teacher preparation from that of elementary teachers.
- Approved programs should prepare middle school teacher candidates to be qualified to teach two subject areas.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 1: Goal E **Mississippi** Analysis

### ● State Meets Goal

#### ANALYSIS

Middle school teachers in Mississippi are required to have a “4-8 Subject Area” program of study. This includes two 21-hour content concentrations in academic coursework, a total that can include three to six hours of pedagogy classes in each of the concentration areas. The state also articulates a “7-12 Subject Area” program of study in which teacher candidates must earn a major in the licensed content area.

All new middle school teachers in Mississippi are also required to pass a single-subject Praxis II content test to attain licensure; a general content knowledge test is not an option.

#### SUPPORTING RESEARCH

Mississippi Educator Preparation Programs, Process and Performance Reviews [http://www.mde.k12.ms.us/ed\\_licensure/teacher\\_education.html](http://www.mde.k12.ms.us/ed_licensure/teacher_education.html)  
[www.ets.org/praxis](http://www.ets.org/praxis)

#### RECOMMENDATION

Mississippi meets this goal. The state is commended for ensuring that middle school teachers are sufficiently prepared to teach middle school-level content.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis.

★ Examples of Best Practice

**Georgia** ensures that all middle school teachers are sufficiently prepared to teach middle school-level content. It requires teachers to earn two minors and pass the state’s own single-subject content test. Other notables include **Louisiana, Mississippi** and **New Jersey**. These states require either two minors or a major for those teaching one content area, as well as a passing score on a single-subject content test.

Figure 16  
 1 May teach grades 7 and 8 on generalist license if in self-contained classroom  
 2 Generalist license is K-9  
 3 With the exception of mathematics

Figure 17

*What academic preparation do states require for a middle school endorsement or license?*

Figure 17

1 State does not explicitly require two minors, but has equivalent requirements.  
 2 West Virginia elementary candidates need only one minor to teach middle grades.

# Area 1: Delivering Well Prepared Teachers

## Goal F – Special Education Teacher Preparation

The state should ensure that special education teachers are prepared to teach content-area subject matter.

Figure 18

### How States are Faring in Preparing Special Education Teachers

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that teacher preparation programs provide a broad liberal arts program of study to elementary special education candidates. All elementary special education candidates should have preparation in the content areas of math, science, English, social studies and fine arts and should be required to pass a subject-matter test for licensure.
2. The state should require that teacher preparation programs graduate secondary special education teacher candidates who are "highly qualified" in at least two subjects. The most efficient route for these candidates to become adequately prepared to teach multiple subjects may be to earn the equivalent of two subject-area minors and pass tests in those areas.
3. The state should customize a "HOUSSE" route for new secondary special education teachers to help them achieve highly qualified status in all the subjects they teach.

### Rationale

- ▶ See appendix for detailed rationale.
- All teachers, including special education teachers, teach content and therefore need relevant coursework.
- HQT requirements place unique challenges on secondary special education teachers.
- Secondary special education teachers need to graduate highly qualified in two subject areas.
- A customized HOUSSE route is needed to meet the needs of new special education teachers to earn highly qualified status.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 1: Goal F Mississippi Analysis

### ○ State Does Not Meet Goal

#### ANALYSIS

Mississippi's requirements do not ensure that special education teachers are prepared to teach content-area subject matter.

Teacher preparation programs in Mississippi are not required to provide a broad liberal arts program to teacher candidates for elementary special education. The state does not require these candidates to receive any preparation in elementary subject areas, and it requires that elementary special education teachers pass only a Praxis II specialty test that pertains to special education and not the general subject-area test taken by other elementary candidates.

Mississippi also does not ensure that teacher candidates for secondary special education are "highly qualified" in at least two subject areas. In fact, the state does not even require these candidates to complete a subject-matter major or pass a subject-matter test. It additionally does not require dual certification (in which special education teachers must attain licensure in both special education and a specific subject area), so there is no assurance that secondary special education teachers have sufficient preparation in any of the content they may need to teach.

Finally, Mississippi does not have a unique HOUSSE route for new secondary special education teachers.

#### SUPPORTING RESEARCH

[http://www.mde.k12.ms.us/ed\\_licensure/specialed.html](http://www.mde.k12.ms.us/ed_licensure/specialed.html)

[www.ets.org](http://www.ets.org)

#### RECOMMENDATION

Mississippi does not meet this goal. The state should require that all teacher candidates for elementary special education be well trained in relevant academic subject matter to ensure that special education students, who deserve the opportunity to learn grade-level content, are not shortchanged. These candidates should also be required to pass the same subject-area tests as other elementary teachers.

Mississippi should also ensure that teacher candidates for secondary special education are adequately prepared to teach multiple subjects. The most efficient way to accomplish this is to require that teacher candidates earn the equivalent of two subject-area minors and pass tests in those areas.

Finally, the state should create a HOUSSE route specifically for new secondary special education teachers. Although ideally these teachers will have graduated with highly qualified status in two core areas, the state should provide a practical and meaningful way for these teachers to achieve highly qualified status in all remaining core subjects once they are in the classroom.

### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi asserted that special education teachers must pass both the Praxis II pedagogy test and special education test in order to teach inclusion or tutorial classes. To teach self-contained special education classes, candidates must obtain one of the following:

- A passing score on the Praxis II Special Education Fundamental Subjects Highly Qualified (HQ) test (K-12);
- A passing score on a Praxis II test in each subject area to be taught at the secondary level (7-12);
- 21 semester hours of core coursework in each subject area to be taught at the secondary level (7-12); OR
- Dual certification of elementary education and special education (K6); elementary education majors are required to obtain 21 semester hours of core academic content in two subject areas outside the elementary program.

In addition, the state discontinued its use of HOUSSSE in 2006, per the recommendation of the U.S. Department of Education.

### LAST WORD

Unfortunately, the options the state offers do not ensure that special education teachers are adequately prepared to teach content-area subject matter. Candidates who choose the first option (a passing score on the Praxis II Special Education Fundamental Subjects HQ test) are still required to pass only an assessment specifically geared to special education, which fails to ensure that teachers are well trained in relevant academic subject matter. Further, the Praxis II website does not list such a test, and an ETS representative indicated there was no such test. Mississippi's policy should reflect that special education students deserve the opportunity to learn grade-level content.

Although it is commendable that the state phased out the use of HOUSSSE for veteran teachers, it should still allow new secondary special education teachers to access a route uniquely tailored to their needs. The challenge of becoming HQT in all subject areas may be a disincentive to those considering teaching secondary special education; a specific HOUSSSE route can help mitigate this potential deterrent.

★ Examples of Best Practice

Unfortunately, NCTQ cannot highlight any state's policy in this area. Preparation of special education teachers is a topic in critical need of states' attention.

Figure 19

# Area 1: Delivering Well Prepared Teachers

## Goal G – Assessing Professional Knowledge

The state should use a licensing test to verify that all new teachers meet its professional standards.

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should assess new teachers' knowledge of teaching and learning by means of a pedagogy test aligned to the state's professional standards.

### Rationale

- ▶ See appendix for detailed rationale.
- A good pedagogy test puts teeth in states' professional standards.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 21

### How States are Faring in Assessing Professional Knowledge

## Area 1: Goal G **Mississippi** Analysis

### ● State Meets Goal

#### ANALYSIS

Mississippi requires all new teachers to pass a popular pedagogy test from the Praxis series in order to attain licensure.

#### SUPPORTING RESEARCH

[www.ets.org/praxis](http://www.ets.org/praxis)

#### RECOMMENDATION

Mississippi meets this goal. The state should verify that the commercially available tests of pedagogy actually align with state standards, or it may want to consider developing its own test to ensure that new teachers enter classrooms with the requisite knowledge and skills.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi asserted that it uses a nationally approved test that is aligned with INTASC and NCATE standards.

## ★ Examples of Best Practice

Twenty-three states meet this goal, and although NCTQ has not singled out one state's policies for "best practice" honors, it additionally commends the eight states (Arizona, California, Florida, Illinois, New Mexico, New York, Oklahoma, Texas) that utilize their own assessments to measure pedagogical knowledge and skills.

Figure 22

*Do states measure new teachers' knowledge of teaching and learning?*

# Area 1: Delivering Well Prepared Teachers

## Goal H – Teacher Preparation Program Accountability

The state's approval process for teacher preparation programs should hold programs accountable for the quality of the teachers they produce.

Figure 23

### How States are Faring in Holding Preparation Programs Accountable

### Rationale

- ▶ See appendix for detailed rationale.
- States need to hold programs accountable for the quality of their graduates.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should collect meaningful data about candidate pass rates on state licensing tests. This means collecting data beyond the pass rate of program completers. The state should require programs to report the percentage of teacher candidates who entered student teaching and who were able to pass state licensing tests.
2. In addition to better pass rate information, the state should create a more comprehensive index of program performance by collecting some or all of the following data:
  - Average raw scores of graduates on licensing tests, including basic skills, subject matter and professional knowledge tests;
  - Satisfaction ratings by school principals and teacher supervisors of programs' student teachers, using a standardized form to permit program comparison;
  - Evaluation results from the first and/or second year of teaching;
  - Academic achievement gains of graduates' students averaged over the first three years of teaching; and
  - Five-year retention rates of graduates in the teaching profession.
3. The state should also establish the minimum standard of performance for each of these categories of data. Programs must be held accountable for meeting these standards, and the state, after due process, should shut down programs that do not do so.
4. The state should produce and publish on its website an annual report card that shows all the data that the state collects on individual teacher preparation programs.

## Area 1: Goal H **Mississippi** Analysis

### State Meets a Small Part of Goal

#### ANALYSIS

Mississippi relies on some objective, meaningful data to measure the performance of teacher preparation programs. The state requires an annual “teacher education performance report,” with one component consisting of a job-satisfaction survey rating the job performance of all first-year teachers. Programs that do not receive a satisfactory rating of 80 percent over a three-year period must prepare a plan of improvement. Mississippi also collects programs’ annual summary licensure test pass rates (80 percent of program completers must pass their licensure exams). However, the 80 percent pass-rate standard, while common among many states, sets the bar quite low and is not a meaningful measure of program performance.

Furthermore, there is no evidence that the state’s standards for program approval are resulting in greater accountability. In the past three years, no program in the state has been identified as low-performing.

In addition, Mississippi’s website does not include a report card that allows the public to review and compare program performance.

#### SUPPORTING RESEARCH

Process & Performance Review Guide [http://www.mde.k12.ms.us/ed\\_licensure/teacher\\_education.html](http://www.mde.k12.ms.us/ed_licensure/teacher_education.html)

Title II Report <https://title2.ed.gov/title2dr/LowPerforming.asp>

#### RECOMMENDATION

Mississippi meets only a small part of this goal. The state should further expand its use of meaningful, objective data, including ensuring that programs are reporting pass rates for individuals entering student teaching, not program completers, for the former is now the requirement under the 2008 reauthorization of the Higher Education Act. It is also a method that will not mask the number of individuals the program was unable to properly prepare.

Additionally, Mississippi should consider collecting specific objective data to create a more comprehensive index of program performance. NCTQ recommends evaluation results from first and/or second year of teaching; academic achievement gains of students taught by the programs’ graduates, averaged over the first three years of teaching; and five-year retention rates of graduates in the teaching profession. To hold these programs accountable, the state should then establish the minimum standard of performance for each of these categories of data, including raising the minimum pass rate on its licensing test. Programs that do not meet the standard, after due process, should be shut down.

Finally, Mississippi should post an annual report card on its website that details the data it collects and the criteria used for program approval. This report card should also identify the programs that fail to meet these criteria and cite the reasons why they failed.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis. The state added that over the past 2.5 years, it has commissioned a Blue Ribbon committee to “research, review and make recommendations for the redesign of the teacher education programs.” Many of the areas addressed by NCTQ are included in this process.

---

#### LAST WORD

Mississippi is commended for its efforts, and NCTQ looks forward to reviewing the state’s progress in future editions of the *Yearbook*.

★ **Examples of Best Practice**

Although no state meets this goal, **Alabama, Florida, Louisiana and Michigan** rely on some objective, meaningful data to measure the performance of teacher preparation programs, and they also all apply transparent measurable criteria for conferring program approval. Additionally, these four states post program report cards on their websites.

Figure 25

*Which states collect meaningful data?*

**AVERAGE RAW SCORES ON LICENSING TESTS**

Alabama, Louisiana, Michigan, New Jersey, Tennessee

**SATISFACTION RATING FROM SCHOOLS**

Alabama, Florida, Kentucky, Michigan, **MISSISSIPPI**, Missouri, Nevada, Texas, Virginia

**EVALUATION RESULTS FOR PROGRAM GRADUATES**

Florida, Rhode Island, South Carolina, Tennessee, Vermont

**STUDENT LEARNING GAINS<sup>1</sup>**

New Jersey, Tennessee, Texas

**TEACHER RETENTION RATES**

Missouri, New Jersey, Oregon, Texas

<sup>1</sup> Louisiana is piloting the use of value-added data that connects student achievement to teacher preparation programs, but not yet using the results for accountability purposes.

# Area 1: Delivering Well Prepared Teachers

## Goal I – State Authority for Program Approval

The state should retain full authority over its process for approving teacher preparation programs.

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should not allow its teacher preparation programs to substitute national accreditation for state program approval.
2. The state should not require its teacher preparation programs to attain national accreditation in order to receive state approval.

### Rationale

- ▶ See appendix for detailed rationale.
- States should not cede oversight authority over their teacher preparation programs to accreditors.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 26

### How States are Faring in Maintaining Authority for Program Approval

## Area 1: Goal I **Mississippi** Analysis

### ● State Meets Goal

#### ANALYSIS

Mississippi does not require its teacher preparation programs to attain national accreditation in order to receive state approval, nor does it allow them to substitute national accreditation for state program approval.

#### SUPPORTING RESEARCH

NCATE State Partnership Features 2009  
<http://www.ncate.org/documents/stateRelations/NCATEStatePartFeatures2008.pdf>

#### RECOMMENDATION

Mississippi meets this goal. The state is commended for retaining full authority over its program approval process.

It should be noted, however, that NCATE reports that Mississippi has delegated its program review to NCATE. Therefore, the state is urged to ensure that NCATE is providing programs with accurate information about program approval.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi was helpful in providing NCTQ with the facts necessary for our analysis.

## ★ Examples of Best Practice

Thirty-one states meet this goal, and although NCTQ has not singled out one state's policies for "best practice" honors, it commends all states that retain full authority over their program approval process.

Figure 27

*What is the relationship between state program approval and national accreditation?*

Figure 28

- Maryland requires programs that enroll 2,000 or more students to attain national accreditation.
- West Virginia public preparation programs are required to attain national accreditation.

Figure 28

*What is the relationship between state program approval and national accreditation?*

	National accreditation is required for state approval	National accreditation can be substituted for state approval	While not technically required, the approval process is indistinguishable from accreditation	State delegates its program review, but maintains some involvement	State does not require national accreditation but organization plays a role in state approval process	State has its own distinct approval process

# Area 1: Identifying Effective Teachers

## Goal J – Balancing Professional Coursework

The state should ensure that teacher preparation programs provide an efficient and balanced program of study.

Figure 29

### *How States are Faring in Balancing Professional Coursework*

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should adopt policies designed to encourage efficient delivery of the professional sequence, for both its own requirements and those of individual programs.

### Rationale

- ▶ See appendix for detailed rationale.
- Most states have programs that demand excessive requirements.
- States need to monitor programs' total professional coursework requirements.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 1: Goal J Mississippi Analysis

### ○ State Does Not Meet Goal

#### ANALYSIS

Mississippi specifies a minimum amount of professional education coursework that teacher candidates must complete to qualify for licensure.

All teacher candidates in Mississippi must take an unspecified number of credit hours in classroom management or data analysis/evaluation. They must also take three hours in special education and a course in classroom management. Additionally, elementary and middle school teacher candidates must complete 15 credit hours in reading, and secondary teachers must take an unspecified number of credit hours in pedagogy/literacy/reading integration.

Although Mississippi sets minimum coursework requirements for its teacher candidates, the state lacks any policy that monitors the number of credit hours that preparation programs actually require.

Regrettably, some of Mississippi's teacher preparation programs are indeed requiring excessive amounts of coursework. For example, elementary teacher candidates at Alcorn State University must complete 69 credit hours in education and related professional coursework. In addition, special education teacher candidates at the University of Southern Mississippi are required to complete 61 professional credit hours.

#### SUPPORTING RESEARCH

Mississippi Educator Preparation Programs, Process and Performance Reviews [http://www.mde.k12.ms.us/ed\\_licensure/teacher\\_education.html](http://www.mde.k12.ms.us/ed_licensure/teacher_education.html)

<http://www.alcorn.edu/Academic/2007-08%20ASU%20Catalog%20PDF.pdf>

<http://www.usm.edu/registrar/bulletins/undergraduate/2009/College%20of%20Education%20&%20Psychology%20Degree%20Plans.pdf>

#### RECOMMENDATION

Mississippi does not meet this goal. The state should adopt a policy that targets the tendency of preparation programs to require increasing amounts of professional coursework; policy that addresses only the minimum coursework requirements does nothing to check this tendency. The state should encourage efficient delivery of content to teacher candidates and ensure that programs focus on preparation that will make teachers ultimately more effective in the classroom. Excessive coursework requirements do not leave room for electives or, in some cases, adequate subject-matter preparation. They may also discourage talented individuals from pursuing teaching careers.

Mississippi should also review these coursework requirements on a regular basis to weigh their benefits and eliminate any requirements that are not relevant to teacher effectiveness. If the state chooses not to limit the amount of professional coursework required by its teacher preparation programs, it should mandate that programs with excessive requirements show measurably superior results over programs with fewer.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi asserted that it has mandated that coursework requirements be reduced to 124 hours. "The only exceptions apply to art education and special education, which require approval from the Mississippi Department of Education and cannot be deemed excessive."

---

#### LAST WORD

The notion that a state is sufficiently monitoring program efficiency by virtue of the fact that the overall program is limited to a certain number of credit hours is problematic. The state needs to ensure that 1) the course of study within the four-year program is efficiently delivered and meaningful and 2) programs leave ample room for electives by not requiring excessive professional coursework.

Figure 30

*Do states cap the amount of professional coursework programs can require?*

1 California, New Jersey<sup>2</sup>, Tennessee, Virginia.

2 Although not technically a cap, New Jersey requires a minimum of 90 credit hours distributed among general education and an academic major.

Figure 31

*Coursework that supports teacher effectiveness*

In monitoring the amount of professional coursework required by teacher preparation programs, states also need to consider whether professional requirements support teacher effectiveness in the classroom. States should ensure that the following key areas are addressed:

- Methods for teaching subject matter
- Child or adolescent development, with emphasis on cognitive psychology
- Classroom management
- Assessment
- Special education
- Contemporary issues in education, particularly the achievement gap

## ★ Examples of Best Practice

Although no state was awarded “best practice” honors, **Virginia** and **Tennessee** are notables because both keep a check on the amount of professional studies that preparation programs may require.

Figure 32

*Are states controlling program excesses?*

1 California, Connecticut, Massachusetts, New Hampshire, New Jersey, Tennessee, Virginia

## Area 2: Expanding the Pool of Teachers

### Goal A – Alternate Route Eligibility

The state should require alternate route programs to exceed the admission requirements of traditional preparation programs while also being flexible to the needs of nontraditional candidates.

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. With some accommodation for work experience, alternate route programs should screen candidates for academic ability, such as requiring a minimum 2.75 overall college GPA.
2. All alternate route candidates, including elementary candidates and those having a major in their intended subject area, should be required to pass a subject-matter test.
3. Alternate route candidates lacking a major in the intended subject area should be able to demonstrate subject-matter knowledge by passing a test of sufficient rigor.

#### Rationale

- ▶ See appendix for detailed rationale.
- Alternate route teachers need the advantage of a strong academic background.
- Academic requirements for admission to alternate routes should exceed the requirements for traditional programs.
- Multiple ways for assessing subject-matter competency are needed to accommodate nontraditional candidates.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 33

#### How States are Faring in Alternate Route Eligibility

## Area 2: Goal A **Mississippi** Analysis

### State Partly Meets Goal

#### ANALYSIS

While they do not exceed the requirements for traditional preparation programs, the admission requirements for some of Mississippi's alternate route programs do consider an applicant's past academic performance and subject-matter knowledge.

Mississippi offers four alternate routes to certification: Mississippi Alternate Path to Quality Teachers, Master of Arts in Teaching, Teach Mississippi Institute and American Board Certification for Teacher Excellence (ABCTE). The Mississippi Alternate Path to Quality Teachers requires candidates to have a minimum GPA of 2.5 or a 2.75 in their respective major. Candidates who graduated more than seven years prior to admission must have an overall GPA of 2.0. Candidates in the Master of Arts in Teaching, Teach Mississippi Institute and ABCTE programs are not required to demonstrate prior academic performance.

All candidates must pass the Praxis I basic skills test. Candidates in the ABCTE program must pass that program's own subject-area assessment; all other candidates must pass the Praxis II subject-matter test. Unfortunately, Mississippi may not be using these tests to their full advantage. The state has set passing scores on the Praxis II that are egregiously low--among the lowest in the country--and therefore the test may not be indicative of academic merit. For example, a math teacher must only achieve a score of 125 on the Praxis II math test, which is well below the score of 156 required in Colorado. Very few states using the Praxis II math test set a lower minimum score.

A major is not required, so there is no need for a test-out option. This policy demonstrates the state's understanding of the diverse backgrounds of alternate route candidates.

#### SUPPORTING RESEARCH

[http://www.mde.k12.ms.us/ed\\_licensure/alternate\\_path.html](http://www.mde.k12.ms.us/ed_licensure/alternate_path.html)

#### RECOMMENDATION

Mississippi meets this goal in part. The state should require that candidates for admission to all of its alternate route programs consistently provide evidence of good academic performance. The standard should be higher than what is required of traditional teacher candidates, such as a 2.75 GPA. The original concept behind the alternate route into teaching is that the non-traditional candidate is able to concentrate on acquiring professional knowledge and skills because he or she has demonstrated strong subject-area knowledge and/or an above-average academic background. The state is commended for its attempt to make accommodations for mid-career candidates. However, the standards are far too low.

Mississippi is commended for its requirement that candidates pass a subject-matter test to demonstrate strong content knowledge. However, the state needs to ensure that its passing scores are not set so low that individuals may pass without the needed subject-matter expertise.

The state should reconsider its basic skills test where required. Having candidates pass a basic skills test is impractical and ineffectual. Basic skills tests measure minimum competency--essentially those skills that a person should have acquired in middle school. Passage of a basic skills test provides no assurance that the candidate has the appropriate subject-matter knowledge needed for the classroom. Such tests should be used for admission into undergraduate teacher preparation programs. The state should eliminate the basic skills test requirement, or, at a minimum, accept the equivalent in SAT, ACT or GRE scores.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis.

## ★ Examples of Best Practice

Connecticut meets three admission criteria for a quality alternate route: 1) a requirement that candidates have a GPA higher than what is generally expected in a traditional preparation program, 2) a requirement that all candidates pass a subject-area test and 3) flexibility built into its policy that respects nontraditional candidates' diverse backgrounds.

## Area 2: Expanding the Pool of Teachers

### Goal B – Alternate Route Preparation

The state should ensure that its alternate routes provide streamlined preparation that is relevant to the immediate needs of new teachers.

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should ensure that the number of credit hours it either requires or allows is manageable for the new teacher. Anything exceeding 12 credit hours of coursework (for which the teacher is required to physically attend a lecture or seminar) in the first year may be counterproductive, placing too great a burden on the teacher. This calculation is premised on no more than 6 credit hours in the summer, 3 in the fall and 3 in the spring.
2. The state should ensure that alternate route programs offer accelerated study not to exceed six courses (exclusive of any credit for mentoring) over the duration of the program. Programs should be no longer than two years, at which time the new teacher should be eligible for a standard certificate.
3. Any coursework requirements should target the *immediate* needs of the new teacher (e.g., seminars with other grade-level teachers, training in a particular curriculum, reading instruction and classroom management techniques).
4. The state should ensure that candidates have an opportunity to practice teach in a summer training program. Alternatively, the state can provide an intensive mentoring experience, beginning with a trained mentor assigned full-time to the new teacher for the first critical weeks of school and gradually reducing the amount of time. The state should support only induction strategies *that can be effective even in a poorly managed school*: intensive mentoring, seminars appropriate to grade level or subject area, a reduced teaching load and frequent release time to observe other teachers.

#### Rationale

- ▶ See appendix for detailed rationale.
- The program must provide practical, meaningful preparation that is sensitive to a new teacher's stress level.

Figure 38

#### How States are Faring in Alternate Route Preparation

- Induction support is especially important for alternate route teachers.

#### SUPPORTING RESEARCH

## Area 2: Goal B **Mississippi** Analysis

### State Nearly Meets Goal

#### ANALYSIS

Although Mississippi offers alternate routes with streamlined preparation, it could do more to meet the immediate needs of new teachers.

The Mississippi Alternate Path to Quality Teachers (MAPQT) requires candidates to participate in a summer training program for approximately three weeks and equal to 90 clock hours. The program consists of effective teaching strategies, state curriculum frameworks, planning and instruction and survival skills in the classroom. Candidates then participate in practicum one Saturday a month for nine months. The practicum focus on classroom management, peer coaching, school law, data analysis using test results and training modules using interactive video training.

Master of Arts candidates must complete six graduate hours of preteaching coursework requirements from an approved Master of Arts in Teaching program. Coursework includes tests and measurements and classroom management. Candidates must also complete six additional graduate hours including a supervised internship prescribed by the participating institution.

Teach Mississippi candidates complete an eight-week training session equal to nine semester hours at the graduate level. Coursework includes teaching strategies, classroom management, state curriculum requirements, instructional methods and tests and measurements. Candidates may also complete a 10-week training session online.

American Board Certification for Teacher Excellence (ABCTE) candidates must complete training in one of the following: the MAPQT three-week summer training, an eight-week online training or six hours of initial graduate university courses.

None of the routes provide a practice teaching opportunity, but all require a one-year internship period that includes mentoring. The ABCTE program specifies

that mentoring must be provided by a National Board-Certified teacher or a trained mentor certified in the same subject area.

Candidates are eligible for standard certification after one year.

#### SUPPORTING RESEARCH

[http://www.mde.k12.ms.us/ed\\_licensure/alternate\\_path.html](http://www.mde.k12.ms.us/ed_licensure/alternate_path.html)

#### RECOMMENDATION

Mississippi nearly meets this goal. Mississippi is commended for both the amount and nature of coursework requirements for its alternate routes.

While the state does require mentoring, it should provide more detailed mentoring guidelines to ensure that new teachers will receive the support they need to facilitate their success in the classroom. Effective strategies include practice teaching prior to starting to teach in the classroom, intensive mentoring with full classroom support in the first few weeks or months of school, a reduced teaching load and relief time to allow new teachers to observe experienced teachers during each school day.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis. Mississippi added that at the present time, the Blue Ribbon Committee has indicated the need for field experience for alternate route candidates before their internship period. The Mississippi Department of Education is in the process of determining next steps with regard to their recommendations.

Figure 40

*Do states curb excessive coursework requirements?*

1 Alabama, Alaska, Arkansas, Colorado, Connecticut, Florida, Georgia, Maryland, Mississippi, New Jersey, Oklahoma, South Carolina, Texas, Virginia

2 Indiana, Montana, South Dakota, Wyoming

3 North Dakota

### ★ Examples of Best Practice

Arkansas, Delaware, Georgia and New Jersey ensure that their alternate routes provide streamlined preparation that meets the immediate needs of new teachers. Each state requires a manageable number of credit hours, relevant coursework and intensive mentoring.

Figure 41

*Do states require mentoring of high quality and intensity?*

1 Alaska, Arkansas, Connecticut, Delaware, District of Columbia, Georgia, Kentucky, New Jersey, New York, Rhode Island, Utah, West Virginia

2 North Dakota

## Area 2: Expanding the Pool of Teachers

### Goal C – Alternate Route Usage and Providers

The state should provide an alternate route that is free from regulatory obstacles that inappropriately limit its usage and providers.

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should not treat the alternate route as a program of last resort or restrict the availability of alternate routes to certain geographic areas, grades or subject areas.
2. The state should allow districts and nonprofit organizations other than institutions of higher education to operate alternate route programs.
3. The state should ensure that its alternate route has no requirements that would be difficult to meet for a provider that is not an institution of higher education. Such requirements include an approval process based on institutional accreditation or raising requirements articulated in only credit hours and not clock hours.

#### Rationale

- ▶ See appendix for detailed rationale.
- Alternate routes should be structured to do more than just address shortages; they should provide an alternative pipeline for talented individuals to enter the profession.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 42

#### How States are Faring in Alternate Route Usage and Providers

## Area 2: Goal C **Mississippi** Analysis

### State Partly Meets Goal

#### ANALYSIS

Although it does not place restrictions on providers, Mississippi limits the usage of its alternate route.

Mississippi's alternate routes cannot be used for elementary K-3 certification.

The Mississippi Alternate Path to Quality Teachers candidates may only teach in the areas of art, biology, business, chemistry, English, French, German, home economics, marketing, math, music, physical education, physics-social studies, Spanish, speech communications, technology education and special education for grades 7-12.

Master of Arts in Teaching candidates may only teach in the areas of art, biology, business, chemistry, elementary education for grades 4-8, English, French, German, home economics, marketing, math, music, physical education, physics, social studies, Spanish, speech communications and technology education.

Teach Mississippi candidates may only teach in the areas of biology, business, chemistry, English, French, German, home economics, marketing, math, physics, social studies, Spanish, speech communications, technology education and special education in grades 7-12.

The American Board Certification for Teacher Excellence candidates may only teach in the areas of biology, chemistry, English, math and physics in grades 7-12.

The state permits a diversity of providers to operate its alternate route programs, including Teach For America.

#### SUPPORTING RESEARCH

[http://www.mde.k12.ms.us/ed\\_licensure/alternate\\_path.html](http://www.mde.k12.ms.us/ed_licensure/alternate_path.html)

#### RECOMMENDATION

Mississippi meets this goal in part. Mississippi should reconsider the subject-area and grade-level restrictions on its alternate route. The state should allow new teachers to work across all grades, subjects and geographic areas.

The state is commended for allowing a diversity of program providers. To ensure the integrity of all programs, the state should be vigilant in monitoring these programs as they are developed and implemented.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis.

★ **Examples of Best Practice**

Twenty states meet this goal, and although NCTQ has not singled out one state's policies for "best practice" honors, it commends all states that permit both broad usage and a diversity of providers for their alternate routes.

## Area 2: Expanding the Pool of Teachers

### Goal D – Alternate Route Program Accountability

The state should ensure that its approval process for alternate route programs holds them accountable for the performance of their teachers.

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should collect some or all of the following data to create a more comprehensive index of program performance to hold alternate route programs accountable:
  - Average raw scores of graduates on licensing tests, including subject matter and professional knowledge tests;
  - Satisfaction ratings by school principals and teacher supervisors of programs' student teachers, using a standardized form to permit program comparison;
  - Evaluation results from the first and/or second year of teaching;
  - Academic achievement gains of graduates' students averaged over the first three years of teaching; and
  - Five-year retention rates of graduates in the teaching profession.
2. The state should also establish the minimum standard of performance for each of these categories of data. Programs must be held accountable for meeting these standards, and the state, after due process, should shut down programs that do not do so.
3. The state should produce and publish on its website an annual report card that shows all the data that the state collects on individual teacher preparation programs.

#### Rationale

- ▶ See appendix for detailed rationale.
- Alternate route programs should show they consistently produce effective teachers.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 49

#### How States are Faring in Alternate Route Program Accountability

## Area 2: Goal D **Mississippi** Analysis

### ○ State Does Not Meet Goal

#### ANALYSIS

Mississippi neither collects objective, meaningful data to measure the performance of its alternate route programs nor applies any transparent, measurable criteria for conferring program approval.

In addition, Mississippi's website has no report card that allows the public to review and compare program performance.

#### SUPPORTING RESEARCH

603 CMR 7.03 (2)(a), (3)(a)

#### RECOMMENDATION

Mississippi does not meet this goal. To generate the hard, objective data needed to hold programs accountable, the state should make objective outcomes the focus of its approval process for alternate route programs and establish precise standards for performance that are useful for accountability purposes.

Mississippi should collect meaningful, objective data to create a comprehensive index of program performance. NCTQ recommends the use of 1) graduates' average raw scores on licensing tests (including subject-matter and professional knowledge tests); 2) satisfaction ratings (by principals and teacher supervisors) of programs' student teachers, using a standardized form to permit program comparison; 3) evaluation results from the first and/or second year of teaching; 4) academic achievement gains of students taught by the programs' graduates, averaged over the first three years of teaching; and 5) five-year retention rates of graduates in the teaching profession. To hold these programs accountable, the state should then establish a minimum standard of performance for each of these categories of data. Programs that do not meet the standard, after due process, should be shut down.

Finally, Mississippi should post an annual report card on its website that details the data it collects for all programs, both alternate route and traditional, as well as the criteria used for program approval. This report card should also identify the programs that fail to meet these criteria and cite the reasons why they failed.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi stated that the National Center for Alternative Certification has conducted an evaluation of all the state's alternate route programs.

#### LAST WORD

Conducting evaluations on alternate route programs is a step in the right direction. However, NCTQ reiterates that Mississippi should collect and publish comprehensive, objective data that show the performance of the alternate route programs so that the public can compare among alternate route programs as well as compare alternate route program performance to traditional preparation programs.

★ **Examples of Best Practice**

While no state earns a “best practice” designation for this goal, **Louisiana** comes the closest. Louisiana uses objective, meaningful data to measure the performance of its alternate route programs and posts this data annually on the state’s website. Louisiana is also well ahead of other states in setting standards for program performance and measuring each program according to those standards. Program scores are determined on the basis of a relatively complex rating formula. The state provides a system to reward programs that attain performance scores each year at an Exemplary or High Performing level. Teacher preparation programs that are rated as being At Risk for four years or that are designated as Low Performing and do not become Satisfactory within two years lose their state approval.

Figure 51

*Which states collect meaningful data?*

**AVERAGE RAW SCORES ON LICENSING TESTS**

**TEACHER RETENTION RATES**

Arkansas, Delaware, Florida, Texas

1 Louisiana is piloting the use of value-added data that connects student achievement to teacher preparation programs, but not yet using the results for accountability purposes.

Figure 50

1 The posted data do not allow the public to review and compare alternate route program performance because institutional data are not disaggregated.

2 The posted data do not allow the public to review and compare program performance because data are not disaggregated by individual program provider.

3 North Dakota does not have an alternate route to certification.

## Area 2: Expanding the Pool of Teachers

### Goal E – Licensure Reciprocity

The state should help to make teacher licenses fully portable among states, with appropriate safeguards.

Figure 52

#### How States are Faring in Licensure Reciprocity

- ★ 1 Best Practice State  
Alabama
- 1 State Meets Goal  
Texas
- ◐ 3 States Nearly Meet Goal  
Delaware, North Carolina, West Virginia
- ◑ 5 States Partly Meet Goal  
Idaho, New York, Rhode Island, Washington, Wyoming
- ◒ 31 States Meet a Small Part of Goal  
Alaska, Arizona, Arkansas, Colorado, District of Columbia, Florida, Georgia, Indiana, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, MISSISSIPPI, Missouri, New Hampshire, New Jersey, New Mexico, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Utah, Vermont, Virginia, Wisconsin
- 10 States Do Not Meet Goal  
California, Connecticut, Hawaii, Illinois, Iowa, Kansas, Kentucky, Montana, Nebraska, Nevada

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should offer fully certified teachers moving from other states standard licenses, without using transcript analysis or recency requirements as a means of judging eligibility. The state can and should require evidence of good standing in previous employment.
2. The state should uphold its standards for all teachers by insisting that certified teachers coming from other states meet the incoming state's testing requirements.
3. The state should accord the same license to teachers from other states who completed an approved alternate route program as it accords teachers prepared in a traditional preparation program.

#### Rationale

- ▶ See appendix for detailed rationale.
- Using transcripts to judge teacher competency provides little value.
- Testing requirements should be upheld, not waived.
- Signing on to the NASDTEC Interstate Agreement at least signals a state's willingness to consider portability.
- States licensing out-of-state teachers should not differentiate between experienced teachers prepared in alternate routes and those prepared in traditional programs.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 2: Goal E Mississippi Analysis

### State Meets a Small Part of Goal

#### ANALYSIS

Teachers with comparable out-of-state certificates are eligible for Mississippi's professional certificate.

There is no state-mandated recency requirement; however, transcripts are required for all applicants. It is not clear whether the state analyzes transcripts to determine whether a teacher was prepared through a traditional or alternate route or whether additional coursework will be required.

Mississippi does not make it clear whether it requires applicants to meet its standards regarding licensure testing. Finally, Mississippi has indicated its willingness to support the portability of teacher licenses by signing the NASDTEC (National Association of State Directors of Teacher Education and Certification) Interstate Agreement; however, the state only recognizes 42 states plus the District of Columbia under the agreement. It has also signaled its consideration of licensure reciprocity for teachers who have completed an alternate route, but the recognition is even more limited and seems random in its experience requirement per state.

#### SUPPORTING RESEARCH

[http://www.mde.k12.ms.us/ed\\_licensure/reciprocity.html](http://www.mde.k12.ms.us/ed_licensure/reciprocity.html)  
[www.nasdtec.org](http://www.nasdtec.org)

#### RECOMMENDATION

Mississippi meets only a small part of this goal. The state should consider discontinuing its requirement for the submission of transcripts. Transcript analysis is likely to result in additional coursework requirements, even for traditionally prepared teachers; alternate route teachers, on the other hand, almost invariably will have to virtually begin anew, repeating some, most or all of a teacher preparation program in Mississippi.

The state should also take specific steps to uphold its standards for all teachers and insist that out-of-state teachers meet its own testing requirements. The state should

not provide any waivers of its teacher tests unless an applicant can provide evidence of a passing score under its own standards.

Absent grievous policies found elsewhere, Mississippi should extend reciprocity to all states, not just some. The variation in quality among programs in a given state is greater than the variation among states, making Mississippi's policy less selective than it might appear. The state should also consider additional support for the NASDTEC Interstate Agreement, especially those provisions pertaining to alternate route teachers. Such an adjustment in policy would surely make the state more welcoming to teachers from other states.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi asserted that it recognizes all states for reciprocity. If an out-of-state teacher has full licensure, whether through a traditional or alternate route, Mississippi will grant full licensure. The state added that transcript analysis is not necessary when granting a five-year reciprocity license; however, transcripts are kept on file because they are required by state law.

In addition, Mississippi contended that out-of-state teachers with less than a standard license must complete Mississippi's requirements for full licensure, or complete full licensure in the state where they hold the less-than-standard license and then apply for reciprocity. These individuals are given a two-year reciprocity license to complete the process.

#### LAST WORD

The submission of transcripts is unnecessary for certified out-of-state teachers, unless the state has some reason to suspect that the certifying state routinely certifies teachers who do not have a degree. In addition, the state is urged to uphold its testing standards and not provide any waivers unless an applicant meets Mississippi's cut scores.

## ★ Examples of Best Practice

**Alabama** makes teacher licenses fully portable among states by not specifying any additional coursework or recency requirements to determine eligibility for either traditional or alternate route teachers. The state also does not grant any waivers of its testing requirements and appropriately requires all out-of-state teachers to meet Alabama's passing scores on assessments. It has also signed on to the NASDTEC agreement, signaling the state's willingness to consider licensure reciprocity for teachers from other states.

## Area 3: Identifying Effective Teachers

### Goal A – State Data Systems

The state should develop a data system that contributes some of the evidence needed to assess teacher effectiveness.

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should establish a longitudinal data system with at least the following key components:
  - A unique statewide student identifier number that connects student data across key databases across years;
  - A unique teacher identifier system that can match individual teacher records with individual student records; and
  - An assessment system that can match individual student test records from year to year in order to measure academic growth.
2. Value-added data provided through the state's longitudinal data system should be considered among the criteria used to determine teachers' effectiveness.

#### Rationale

- ▶ See appendix for detailed rationale.
- Value-added analysis connects student data to teacher data to measure achievement and performance.
- There are a number of responsible uses for value-added analysis.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 56

#### How States are Faring in the Development of Data Systems

## Area 3: Goal A **Mississippi** Analysis

### State Partly Meets Goal

#### ANALYSIS

Mississippi has a data system with the capacity to provide evidence of teacher effectiveness.

Mississippi has all three necessary elements of a student- and teacher-level longitudinal data system. The state has assigned unique student identifiers that connect student data across key databases across years and has assigned unique teacher identifiers that enable it to match individual teacher records with individual student records. The state also has the capacity to match student test records from year to year in order to measure student academic growth.

However, Mississippi does not currently use this data system to provide value-added evidence of teacher effectiveness.

#### SUPPORTING RESEARCH

[www.dataqualitycampaign.org](http://www.dataqualitycampaign.org)

#### RECOMMENDATION

Mississippi meets this goal in part. Having all the necessary elements in place, the state should support the use of value-added data to provide part of the evidence of teacher effectiveness, particularly for decisions about granting teachers tenure. Value-added data are also important and necessary for local districts adopting performance pay plans to reliably measure individual teacher and overall school performance.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis.

## ★ Examples of Best Practice

Tennessee not only has all three elements of a student- and teacher-level longitudinal data system—unique student identifiers that connect student data across key databases across years, unique teacher identifiers that enable the state to match individual teacher records with individual student records and the capacity to match student test records from year to year so as to measure student academic growth—but it is also the only state that uses this value-added data to measure teacher effectiveness by isolating each teacher’s impact on individual students’ academic growth. It translates this impact into a “teacher effect” score and then uses it as part of a teacher’s evaluation.

Figure 57

*Do states use value-added data as a criterion for assessing teacher effectiveness?*

<sup>1</sup> Louisiana uses value-added data to assess certain aspects of teacher effectiveness; however, this information is not used to decide tenure. Ohio uses value-added data to improve classroom instruction; however, it is not clear whether this information plays a role in teacher evaluations. Tennessee uses value-added data to measure teacher effectiveness by isolating the impact each teacher has on individual students’ academic growth, which can be used as part of a teacher’s evaluation.

Figure 58

<sup>1</sup> Nevada prohibits the use of value-added data in teacher evaluations.  
<sup>2</sup> New York prohibits the use of student-achievement data in teacher tenure decisions.

Figure 58

*Do state data systems have the capacity to reliably assess teacher effectiveness?*

# Area 3: Identifying Effective Teachers

## Goal B – Evaluation of Effectiveness

The state should require instructional effectiveness to be the preponderant criterion of any teacher evaluation.

Figure 59

### How States are Faring in Evaluating Teacher Effectiveness

- ★ 1 Best Practice State  
Florida
- 3 States Meet Goal  
South Carolina, Tennessee, Texas
- ◐ 0 States Nearly Meet Goal
- ◑ 11 States Partly Meet Goal  
Alabama, Connecticut, Delaware, Georgia, Iowa, MISSISSIPPI, Missouri, New Jersey, North Carolina, Oklahoma, Utah
- ◒ 22 States Meet a Small Part of Goal  
Alaska, Arizona, California, Colorado, Hawaii, Illinois, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Nebraska, Nevada, New Mexico, Ohio, Pennsylvania, Virginia, Washington, West Virginia, Wisconsin
- 14 States Do Not Meet Goal  
Arkansas, District of Columbia, Idaho, Indiana, Maine, Montana, New Hampshire, New York, North Dakota, Oregon, Rhode Island, South Dakota, Vermont, Wyoming

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should either require a common evaluation instrument in which evidence of student learning is the most significant criterion or should specifically require that student learning be the preponderant consideration in local evaluation processes. Evaluation instruments, whether state or locally developed, should be structured so as to preclude a teacher from receiving a satisfactory rating if found ineffective in the classroom.
2. Evaluation instruments should require classroom observations that focus on and document the effectiveness of instruction.
3. Teacher evaluations should consider objective evidence of student learning, including not only standardized test scores, but also classroom-based artifacts such as tests, quizzes and student work.

### Rationale

- ▶ See appendix for detailed rationale.
- Teachers should be judged primarily by their impact on students.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 3: Goal B Mississippi Analysis

### State Partly Meets Goal

#### ANALYSIS

Mississippi requires local districts to evaluate teachers using a uniform statewide teacher evaluation instrument (Mississippi Teacher Appraisal System), which is designed to measure teachers' success in meeting the state's Teacher Performance Standards. Four of the six standards are directly related to effective classroom instruction; however, the indicators that support these standards are focused more on teacher behaviors and less on evidence that teachers are promoting student learning. For example, even though one of the standards calls for effective teaching to promote "high levels of student learning," the indicators are focused mostly on teacher behaviors and not on evidence that the students are learning. Besides classroom observations and teacher interviews, the evaluation includes limited use of a teacher-submitted portfolio. While the instrument allows for the inclusion of student learning evidence, the current evaluation policy does not make student learning the *preponderant* criterion of a teacher evaluation.

#### SUPPORTING RESEARCH

Mississippi Teacher Appraisal System Training Materials  
[http://www.mde.k12.ms.us/ACAD/ist/evaluation\\_instruments/Teacher\\_Appraisal\\_Training\\_Materials.pdf](http://www.mde.k12.ms.us/ACAD/ist/evaluation_instruments/Teacher_Appraisal_Training_Materials.pdf)

#### RECOMMENDATION

Mississippi meets this goal in part. Mississippi is commended for considering limited measures of student learning in its teacher evaluations. However, the state should consider revising its guidelines to insist that local districts use evidence of student learning garnered through objective measures such as standardized test results, in addition to subjective measures, as the *preponderant* criterion of teacher evaluations. The state should also ensure that evaluation instruments do not permit teachers found ineffective in the classroom to receive satisfactory ratings.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis.

4

★ **Examples of Best Practice**

**Florida** explicitly requires teacher evaluations to be based primarily on evidence of student learning. The state requires evaluations to rely on classroom observations as well as objective measures of student learning, including state assessment data. **South Carolina, Tennessee and Texas** also structure their formal evaluations so that teachers cannot get an overall satisfactory rating unless they also get a satisfactory rating on classroom effectiveness

Figure 61

*Sources of objective evidence of student learning*

Many educators struggle to identify possible sources of objective student data. Here are some examples:

- Standardized test scores
- Periodic diagnostic assessments
- Benchmark assessments that show student growth
- Artifacts of student work connected to specific student learning standards that are randomly selected for review by the principal or senior faculty, scored using rubrics and descriptors
- Examples of typical assignments, assessed for their quality and rigor
- Periodic checks on progress with the curriculum coupled with evidence of student mastery of the curriculum from quizzes, tests and exams

Figure 60

<sup>1</sup> Louisiana has an optional teacher evaluation system that does make explicit the need to include objective measures of student learning as part of the teacher evaluation.

<sup>2</sup> Minnesota has implemented an optional teacher evaluation system based on evidence of student learning as measured by classroom observations and objective measures, such as student achievement data.

Figure 62

*Do states direct how teachers should be evaluated?*

	9	3	2	17	20

Figure 62

1 The state has no policy regarding any aspect of teacher evaluations.

## Area 3: Identifying Effective Teachers

### Goal C – Frequency of Evaluations

The state should require annual evaluations of all teachers and multiple evaluations of all new teachers.

Figure 63

#### *How States are Faring in Frequency of Evaluations*

- ★ 1 **Best Practice State**  
Oklahoma
- 5 **States Meet Goal**  
Idaho, Nevada, New Jersey, North Dakota, Washington
- ◐ 4 **States Nearly Meet Goal**  
Arizona, Arkansas, Pennsylvania, Wyoming
- ◑ 14 **States Partly Meet Goal**  
Alabama, Connecticut, Delaware, Florida, Georgia, Kansas, Kentucky, Maryland, Nebraska, New Mexico, New York, Ohio, South Carolina, West Virginia
- ◒ 6 **States Meet a Small Part of Goal**  
Indiana, Minnesota, Missouri, North Carolina, Tennessee, Utah
- 21 **States Do Not Meet Goal**  
Alaska, California, Colorado, District of Columbia, Hawaii, Illinois, Iowa, Louisiana, Maine, Massachusetts, Michigan, **MISSISSIPPI**, Montana, New Hampshire, Oregon, Rhode Island, South Dakota, Texas, Vermont, Virginia, Wisconsin

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that all nonprobationary teachers receive a formal evaluation annually.
2. The state should require that all new, nonpermanent teachers receive a minimum of two formal evaluations annually. At least one evaluation should occur during the first half of the school year.

#### Rationale

- ▶ **See appendix for detailed rationale.**
- Annual evaluations are standard practice in most professional jobs.
- Evaluations are especially important for new teachers.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 3: Goal C **Mississippi** Analysis

### ○ State Does Not Meet Goal

#### ANALYSIS

Mississippi does not address the number of times new teachers or nonprobationary teachers must be evaluated.

#### SUPPORTING RESEARCH

Minnesota Statute 122A.41, Subd. 2

[http://education.state.mn.us/MDE/Teacher\\_Support/QComp/QComp\\_Application\\_Process/Program\\_Components/index.html](http://education.state.mn.us/MDE/Teacher_Support/QComp/QComp_Application_Process/Program_Components/index.html)

#### RECOMMENDATION

Mississippi does not meet this goal. The state should require that all new, probationary teachers be formally evaluated at least twice annually and that the first evaluation occur within the first half of their first school year. By doing so, the state will ensure that local districts more efficiently determine whether new teachers are demonstrating appropriate classroom skills. The point of requiring that one evaluation occur early in the year is to be able to immediately offer feedback and support to new teachers, especially if the observation indicates any unsatisfactory performance. That way, the teacher and school or district leadership can implement a plan for improvement, rather than potentially allow an ineffective new teacher to remain in the classroom without any evaluation until late in the year.

Mississippi should also require annual formal evaluations for all nonprobationary teachers.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi asserted that school districts implement a formal personnel appraisal system for licensed staff that includes assessment of on-the-job performance.

#### SUPPORTING RESEARCH

Mississippi Code 37-3-46

#### LAST WORD

The state is urged to establish minimum expectations that districts must meet, such as articulating specific requirements regarding the frequency of teacher evaluations.

★ Examples of Best Practice

**Oklahoma** not only requires that new teachers be evaluated twice a year, but it also articulates that the first evaluation must be completed by November 15. This allows new teacher performance to be assessed early in the year with an unsatisfactory performance addressed by an improvement plan. Oklahoma also requires that nonprobationary teachers are evaluated annually.

Figure 65

*Do states require districts to evaluate all veteran teachers each year?*

Figure 64

- Teachers in Alaska who exceed performance standards can waive annual evaluation; they are evaluated every two years.
- Minnesota requires multiple evaluations per year for teachers who participate in the optional QComp program.
- North Carolina allows districts to grant waivers to its annual evaluation requirement.
- Texas's annual evaluation may be waived for teachers rated proficient on most recent evaluation.

Figure 66

How many times do states require districts to evaluate a new teacher during a school year?

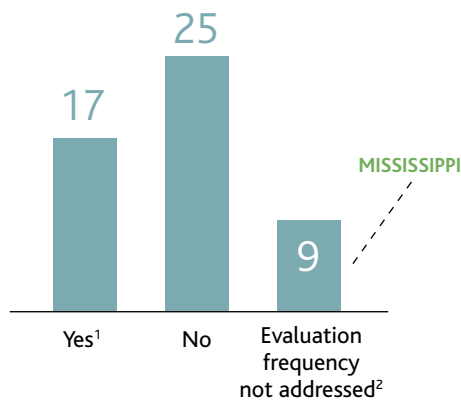

Figure 67

Do states require districts to evaluate new teachers early in the school year?

1 Alabama, Arkansas, Delaware, Idaho, Indiana, Kansas, Kentucky, Maryland, Nebraska, Nevada, New Jersey, North Dakota, Ohio, Oklahoma, South Carolina, Washington, West Virginia

2 District of Columbia, Iowa, Maine, Mississippi, Montana, New Hampshire, Rhode Island, South Dakota, Vermont

Figure 68

- 1 State requires multiple observations followed by post-observation conferences.
- 2 The state's mentoring program requires multiple observations followed by formative feedback.
- 3 State requires two observations followed by post-observation conferences.
- 4 Only applies to first-year teachers

# Area 3: Identifying Effective Teachers

## Goal D – Tenure

The state should require that tenure decisions be meaningful.

Figure 69

### How States are Faring on Tenure

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. A teacher should be eligible for tenure after a certain number of years of service, but tenure should not be granted automatically at that juncture.
2. The state should articulate a process, such as a hearing, that local districts must administer in considering the evidence and deciding whether a teacher should receive tenure.
3. Evidence of effectiveness should be the preponderant criterion in tenure decisions.
4. The minimum years of service needed to achieve tenure should allow sufficient data to be accumulated on which to base tenure decisions; five years is the ideal minimum.

### Rationale

- ▶ See appendix for detailed rationale.
- Tenure should be a significant and consequential milestone in a teacher's career.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 3: Goal D **Mississippi** Analysis

### ○ State Does Not Meet Goal

#### ANALYSIS

Mississippi does not require any process to ensure that tenure decisions are meaningful.

Mississippi has a 12-month probationary period for new teachers, but there is no indication that at the conclusion of this period any additional process evaluating cumulative evidence of teacher effectiveness is required for tenure. The awarding of tenure appears to be virtually automatic.

#### SUPPORTING RESEARCH

Mississippi Department of Education Employee Procedure Manual [http://www.mde.k12.ms.us/human\\_resources/mdepolicy/5\\_employ.pdf](http://www.mde.k12.ms.us/human_resources/mdepolicy/5_employ.pdf)

#### RECOMMENDATION

Mississippi does not meet this goal. The awarding of tenure is a milestone in every teacher's career and should be afforded the consideration it deserves, regardless of whether the state is bestowing a lifetime or limited-term position. The state should consider extending the minimum probationary period for tenure to five years, which would allow for the accumulation of sufficient data on teacher effectiveness to support meaningful tenure decisions. Although it is appropriate for teachers to achieve tenure after a certain number of years, tenure should not automatically be granted at this juncture. To justify this leap in professional standing, most notably a tremendous advantage in due process, the state should identify a process, such as a hearing, that local districts would be required to administer, where the cumulative evidence of teacher effectiveness would be considered for each teacher and a determination made of whether to award tenure. Teacher effectiveness in the classroom, rather than years of experience, should be the *preponderant* criterion in tenure decisions.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi cited the Education Employment Procedures Law of 2001, and asserted that "it is the intent of the Legislature not to establish a system of tenure."

#### SUPPORTING RESEARCH

Mississippi Code sections 37-9-101 through 37-9-113

#### LAST WORD

For the purposes of this goal, the term "tenure" refers to the point at which a teacher is granted nonprobationary status.

★ Examples of Best Practice

Unfortunately, NCTQ cannot highlight any state's policy in this area. All states need to improve how tenure is awarded, but four states have policies that are initial steps in the right direction. **Iowa** and **New Mexico** require the consideration of some evidence of teacher performance when making tenure decisions, although it is not the preponderant criterion. **Minnesota** requires local school boards to consult with peer review committees that evaluate probationary teachers, but there is no requirement that teacher effectiveness must be considered. New policy in **North Carolina** requires teachers to achieve a minimum "proficient" rating on all five of the state's professional teaching standards on their annual evaluations in order to be recommended for tenure. Regrettably, evidence of student learning is not the preponderant criterion in the evaluation.

Figure 71

How are tenure decisions made?

1 Iowa, New Mexico and North Carolina require some evidence of teacher performance, although evidence of student learning is not the preponderant criterion. Minnesota requires a peer review process, but does not specify that the review include classroom effectiveness.

Figure 70

1 The probationary period must not exceed two years.

2 New teachers with three consecutive satisfactory evaluations may qualify for tenure after one year.

## Area 3: Identifying Effective Teachers

### Goal E – Licensure Advancement

The state should ensure that licensure advancement is based on evidence of effectiveness.

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should base advancement from a probationary to a nonprobationary license on evidence of classroom effectiveness.
2. The state should not require teachers to fulfill general, nonspecific coursework requirements to advance from a probationary to a nonprobationary license.
3. The state should not require teachers to have an advanced degree as a condition of professional licensure.

#### Rationale

- ▶ See appendix for detailed rationale.
- The reason for probationary licensure should be to determine teacher effectiveness.
- Most state requirements for achieving permanent certification have not been shown to impact teacher effectiveness.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 72

#### How States are Faring on Licensure Advancement

## Area 3: Goal E Mississippi Analysis

### ○ State Does Not Meet Goal

#### ANALYSIS

Mississippi's requirements for moving from a probationary to a nonprobationary license include factors that have not been shown to advance teacher effectiveness.

The state offers four certifications that are all valid for five years and are all renewable. The Class A license, which appears most closely to resemble an initial certification, requires a bachelor's degree and passage of applicable Praxis II tests. Teachers may renew the Class A license by completing one of the following: 10 continuing education units in content or skill-related area, three semester hours in content or skill-related area and five continuing education units in content or skill-related area, six semester hours in content or skill-related area or completion of the NBPTS process.

Teachers may advance to the Class AA license by meeting the Class A requirements and earning a master's degree. A Class AAA license requires Class A criteria and a specialist degree, and a Class AAAA license requires Class A criteria and a doctoral degree.

#### SUPPORTING RESEARCH

General Guidelines Mississippi Educator Licensure  
[http://www.mde.k12.ms.us/ed\\_licensure/licensure\\_guidelines.htm](http://www.mde.k12.ms.us/ed_licensure/licensure_guidelines.htm)

#### RECOMMENDATION

Mississippi does not meet this goal. The state's licensure requirements are not based on factors that measure or advance teacher effectiveness. While targeted requirements may potentially expand teacher knowledge and improve teacher practice, general, nonspecific coursework requirements merely call for teachers to complete a certain amount of seat time. These vague requirements clearly do not correlate with teacher effectiveness and should be clarified for specificity. The state should require evidence of effectiveness to be a factor in determining whether teachers advance to the next licensure level.

Also, although teachers are not *required* to advance to Class AA, Class AAA and Class AAAA licenses, the state should reconsider its mandate of master's or doctoral degrees for advancement, as research is conclusive and emphatic that master's degrees do not have any significant correlation to classroom performance. Rather, advancement should be based on evidence of teacher effectiveness.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi asserted that the term *probationary* is somewhat ambiguous and that the state does not grant tenure status. Teachers are granted pay raises based on advanced degrees, not tenure. Mississippi also does not equate advanced degrees with teacher effectiveness. There is no mechanism in place to measure teacher effectiveness by teachers advancing their degrees.

#### LAST WORD

This goal specifically speaks to licensure advancement, not to tenure or pay raises. It is encouraging that Mississippi does not equate advanced degrees with teacher effectiveness, as the connection between master's degrees and teacher performance has been exhaustively studied, not just in one study but in dozens. These studies all conclude that master's degrees do not add value. In light of the state's recognition that advanced degrees are not connected to teacher effectiveness, Mississippi should reconsider its requirements for licensure advancement.

Figure 73

*Do states require teachers to show evidence of effectiveness before conferring professional licensure?*

	No evidence of effectiveness	Some evidence of teacher performance	Preponderant evidence of effectiveness

★ Examples of Best Practice

In addition to three years' teaching experience and completing the mentoring requirement, **New Mexico** requires new teachers to submit a professional development dossier to advance from the probationary to the nonprobationary certificate. The dossier is divided into five strands, including evidence of teacher effectiveness and evidence of student learning, and teachers must meet or exceed the standards in all strands to advance.

Figure 74

*Do states require teachers to earn advanced degrees before conferring professional licensure?*

1 Connecticut, Kentucky, Maryland, New York, Oregon all require a master's degree or coursework equivalent to a master's degree.

2 Alabama, Indiana, Iowa, Louisiana, Mississippi, Montana, Nebraska, New Mexico, South Carolina, Virginia, West Virginia

## Area 3: Identifying Effective Teachers

### Goal F – Equitable Distribution

The state should contribute to the equitable distribution of teacher talent among schools in its districts by means of good reporting.

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

The state should make the following data publicly available:

1. An index for each school that includes factors associated with teacher quality, such as:
  - teachers' average SAT or ACT scores;
  - the percentage of teachers failing basic skills licensure test at least once;
  - the percentage of teachers on emergency credentials;
  - average selectivity of teachers' undergraduate colleges; and
  - the percentage of new teachers;
2. The percentage of highly qualified teachers, disaggregated both by individual school and by teaching area;
3. The annual teacher absenteeism rate reported for the previous three years, disaggregated by individual school;
4. The average teacher turnover rate for the previous three years, disaggregated by individual school, by district and by reasons that teachers leave.

#### Rationale

- ▶ See appendix for detailed rationale.
- Distribution data should show more than just teachers' years of experience and highly qualified status.
- States need to report data at the level of the individual school.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 76

#### How States are Faring on Equitable Distribution

## Area 3: Goal F Mississippi Analysis

### State Meets a Small Part of Goal

#### ANALYSIS

Comprehensive reporting may be the state's most important role for ensuring the equitable distribution of teachers among schools. Mississippi reports little school-level data that can help support the equitable distribution of teacher talent.

Mississippi does not collect or publicly report most of the data recommended by NCTQ. The state does not provide a school-level teacher quality index that demonstrates the academic background of a school's teachers and the ratio of new to veteran teachers. Mississippi also does not report teacher absenteeism or turnover rates.

Mississippi does report on the percentage of teachers on emergency or provisional credentials and the percentage of highly qualified teachers. Commendably, these data are reported for each school, rather than aggregated by district.

#### SUPPORTING RESEARCH

Mississippi School Report Card <http://www.greene.k12.ms.us/gcsd/pdf/rc/rcgchs.pdf>

#### RECOMMENDATION

Mississippi meets only a small part of this goal. The state should expand its data collection and reporting efforts to include other areas that would shine a light on the distribution of teachers both across and within districts. Individual school report cards should include an index of teacher quality with such data as teachers' average SAT or ACT scores, the percentage of teachers failing basic skills licensure tests at least once, the selectivity of teachers' undergraduate colleges and the percentage of new teachers. School report cards should also include teacher absenteeism and turnover rates. These data can also be used to address issues of staff quality and stability. Providing comparative data for schools with similar poverty and minority populations would yield an even more comprehensive picture of gaps in the equitable distribution of teachers.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis. Mississippi added that these statistics are not required by state or federal guidelines.

Figure 77

*Does Mississippi publicly report school-level data about teachers?*

An index for each school that includes factors associated with teacher quality	NO
Percentage of teachers on emergency credentials <sup>1</sup>	YES
Percentage of new teachers <sup>1</sup>	NO
Percentage of highly qualified teachers	YES
Annual turnover rate	NO
Teacher absenteeism rate	NO

<sup>1</sup> Ideally, percentage of new teachers and percentage of teachers on emergency credentials would be incorporated into a teacher quality index.

★ Examples of Best Practice

No state has an outstanding record when it comes to public reporting of teacher data that can help to ameliorate inequities in teacher quality. However, **Connecticut, New Jersey, New York, North Carolina, Rhode Island** and **South Carolina** report more school-level data than other states. Each of these states reports four of the five following factors at the school level: the percentage of teachers on emergency credentials, the percentage of new teachers, the percentage of highly qualified teachers, the annual absenteeism rate and the average teacher turnover rate.

<sup>1</sup> Ideally, percentage of new teachers and percentage of teachers on emergency credentials would be incorporated into a teacher quality index.

# Area 4: Retaining Effective Teachers

## Goal A – Induction

The state should require effective induction for all new teachers, with special emphasis on teachers in high-needs schools.

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that new teachers receive a high-quality mentoring experience.
2. The state should ensure that new teachers receive mentoring of sufficient frequency and duration, especially in the first critical weeks of school.
3. Mentors should be carefully selected based on evidence of their own classroom effectiveness and subject-matter expertise. Mentors should be trained, and their performance as mentors should be evaluated.
4. Induction programs should include only strategies that can be successfully implemented even in a poorly managed school. Such strategies include intensive mentoring, seminars appropriate to grade level or subject area, a reduced teaching load and frequent release time to observe other teachers.

### Rationale

- ▶ See appendix for detailed rationale.
- Too many new teachers are left to "sink or swim" when they begin teaching.
- Vague requirements simply to provide mentoring are insufficient.
- New teachers in high-needs schools particularly need quality mentoring.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 79

### How States are Faring on Induction

## Area 4: Goal A **Mississippi** Analysis

### State Nearly Meets Goal

#### ANALYSIS

Mississippi requires that all new teachers receive mentoring. The state mandates that all new teachers are assigned a mentor and allows the "selection, nature and extent of mentor teachers" to be determined by the school district. However, Mississippi requires that the mentor programs include "beginning teacher and mentor teacher consultations and observations, orientation sessions, and professional development training, which should include classroom discipline and/or management training" as well as a minimum of 90 hours of contact between mentors and new teachers. Mentors must have at least 3 years of teaching experience and also successfully complete an approved training program. Starting in the 2008-2009 school year, mentors receive \$1,000 for each new teacher (up to two) they are assigned. A district may also grant release time for additional duties.

#### SUPPORTING RESEARCH

Mississippi Code of 1972 Sec. 37-9-205 and Sec. 37-9-211

2008 Mississippi Beginning Teacher Support Plan  
<http://www.mde.k12.ms.us/mtc/index.htm>

#### RECOMMENDATION

Mississippi nearly meets this goal. Mentors should be required to be trained in the content area or grade level similar to that of the new teacher. The state should set a timeline in which mentors are assigned to all new teachers to offer support during the critical first weeks of school and should mandate methods of performance evaluation.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi noted that it encourages all school districts to use best practices in matching mentor teachers with beginning teachers.

The state added that mentors are assigned to beginning teachers before or no later than mid-September of each year.

Figure 80

*Does Mississippi policy articulate the elements of an effective induction program?*

Mentoring for all new teachers	YES
Mentoring of sufficient frequency and duration	YES
Mentoring provided at beginning of school year	YES
Careful selection of mentors	NO
Mentors must be trained	YES
Mentors must be evaluated	NO
Mentor is compensated	YES
Use of a variety of effective induction strategies	YES

## ★ Examples of Best Practice

**South Carolina** requires that all new teachers, prior to the start of the school year, be assigned mentors for at least one year. Districts carefully select mentors, who must undergo additional training, based on experience and similar certifications and grade levels. Adequate release time is mandated by the state so that mentors and new teachers may observe each other in the classroom, collaborate on effective teaching techniques and develop professional growth plans. Mentor evaluations are mandatory and stipends are recommended.

## Area 4: Retaining Effective Teachers

### Goal B – Pay Scales

The state should give local districts full authority for pay scales, eliminating potential barriers such as state salary schedules and other regulations that control how districts pay teachers.

Figure 83

#### How States are Faring in Pay Scales

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. While the state may articulate teachers' starting salaries, it should not require districts to adhere to a state-dictated salary schedule that sets minimum pay for every level.
2. The state should discourage districts from tying additional compensation to advanced degrees. The state should eliminate salary schedules that establish higher minimum salaries or other requirements to pay more to teachers with advanced degrees.
3. The state should discourage salary schedules that imply that teachers with the most experience are the most effective. The state should eliminate salary schedules that require that the highest steps on the pay scale be determined solely by seniority.

#### Rationale

- ▶ See appendix for detailed rationale.
- Compensation reform can be accomplished within the context of local control.
- There is an important difference between a state's setting the minimum teacher salary and setting a salary schedule.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 4: Goal B Mississippi Analysis

### ○ State Does Not Meet Goal.

#### ANALYSIS

To determine teachers' salaries, Mississippi provides local districts with a Minimum Salary Schedule. Because the salary schedule is based on years of experience and earned advanced degrees, the state effectively mandates how districts will pay teachers. The inclusion of advanced degrees in the state schedule is particularly problematic as this sends a clear message to both districts and teachers that attaining an advanced degree is desirable and should be rewarded, although exhaustive research has shown unequivocally that advanced degrees do not impact teacher effectiveness. Further, by establishing a guideline for teachers' salaries that includes advanced degrees, the state limits the ability of districts to structure their pay scales in ways that do emphasize teacher effectiveness.

#### SUPPORTING RESEARCH

Mississippi Code of 1972 Sec. 37-19-7

#### RECOMMENDATION

Mississippi does not meet this goal. While the state may articulate the starting salary that a teacher should be paid, it should not require districts to adhere to a state-dictated salary schedule. It should also discourage districts from tying compensation to advanced degrees and eliminate salary schedules that establish higher minimum salaries for those teachers with such degrees. The state should also discourage salary schedules that assume teachers with the most experience are the most effective and ensure that the highest steps on the pay scale are not determined solely by seniority.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi asserted that it provides local districts with a minimum salary schedule, and this salary schedule is based on years of experience and earned advanced degrees. Districts can and do pay supplemental or incentive pay on top of the state minimum pay scale. Pay scales are not solely determined by seniority, and flexibility is available for districts to pay their teachers above minimum requirements.

In addition, Mississippi noted that the second part of the analysis "deals with subjective statements that cannot be answered with an accurate or inaccurate rebuttal."

#### LAST WORD

The evidence about the lack of connection between advanced degrees and teacher effectiveness is anything but subjective. The effect of a master's degree on teacher effectiveness has been exhaustively studied, not just in one study but in dozens. These studies all conclude that a master's degree does not add value. Paying teachers higher salaries for advanced degrees commits resources that could be spent on more meaningful ways to improve student achievement.

★ **Examples of Best Practice**

Unfortunately, no state meets this goal. Twenty-five states do not require districts to adhere to salary schedules or minimum salary requirements, giving them full control of teacher pay rate. Although no state has articulated a policy that discourages tying compensation to advanced degrees or basing salary solely on years of experience, **Minnesota's** Quality Compensation for Teachers program is on the right track. Q Comp requirements prevent participating districts' local salary schedules from tying compensation primarily to factors that do not correlate with teacher effectiveness, while still allowing districts the flexibility to establish their own pay system and policies.

Figure 85

*What role does the state play in deciding teacher pay rates?*

Figure 84

1 Colorado gives districts option of a salary schedule, a performance pay policy or a combination of both.

2 Rhode Island requires that local district salary schedules are based on years of service, experience and training.

Figure 86

1 If Colorado districts choose to have salary schedules, one variable must be teacher's education.

2 Idaho refers to "education index" in district-determined schedules.

3 Rhode Island requires local district salary schedules to include teacher "training."

## Area 4: Retaining Effective Teachers

### Goal C – Retention Pay

The state should support retention pay, such as significant boosts in salary after tenure is awarded, for effective teachers.

Figure 87

#### How States are Faring on Retention Pay

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should encourage districts to provide a significant pay increase to teachers awarded tenure, provided tenure is based on sufficient data to determine effectiveness.
2. The state should not support longevity bonuses, which are awarded at the end of teachers' careers and do not provide effective retention strategies.

#### Rationale

- ▶ See appendix for detailed rationale.
- Connecting additional compensation to the awarding of tenure would add to its significance and improve teacher retention.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

#### ★ Examples of Best Practice

Unfortunately, NCTQ cannot highlight any state's policy in this area.

## Area 4: Goal C **Mississippi** Analysis

### ○ State Does Not Meet Goal

#### ANALYSIS

Mississippi does not support retention pay for effective teachers, such as significant boosts in salary after tenure is awarded. The state does not have any policies that encourage retention pay. Mississippi requires local districts to follow a state salary schedule (see Goal 4-B) that shows minimal increases in pay throughout a teacher's first five years in the classroom, not indicating any sort of significant financial incentives around the time of tenure award.

#### SUPPORTING RESEARCH

Mississippi Code of 1972 Sec. 37-19-7

#### RECOMMENDATION

Mississippi does not meet this goal. The state should encourage local districts to provide a significant pay increase to teachers awarded tenure, provided tenure is based on sufficient data to determine effectiveness. Offering financial incentives for classroom performance is a valuable tool for keeping effective new teachers in the school system, rather than more commonly employed incentives such as longevity bonuses, which are awarded toward the end of teachers' careers and are not connected to teachers' effectiveness.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis. Mississippi also noted that the state does not recognize tenure status for the teaching profession.

## Area 4: Retaining Effective Teachers

### Goal D – Compensation for Prior Work Experience

The state should encourage districts to provide compensation for related prior subject-area work experience.

Figure 88

#### *How States are Faring on Compensation for Prior Work Experience*

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should encourage districts to compensate new teachers with relevant prior work experience through mechanisms such as starting these teachers at an advanced step on the pay scale. Further, the state should not have regulatory language that would block such strategies.

#### Rationale

- ▶ See appendix for detailed rationale.
- Districts should be allowed to pay new teachers with relevant work experience more than other new teachers.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 4: Goal D **Mississippi** Analysis

### ○ State Does Not Meet Goal

#### ANALYSIS

Mississippi does not encourage local districts to provide compensation for related prior subject-area work experience. However, the state does not seem to have regulatory language blocking such strategies.

---

#### RECOMMENDATION

Mississippi does not meet this goal. The state should encourage local school districts to compensate new teachers with relevant prior work experience through mechanisms such as starting these new teachers at an advanced step on the pay scale.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi pointed out that the state mandates a minimum salary base. School districts can and do supplement the state's minimum salary base. The state also cited a statute that defines "year of teaching experience" and notes circumstances under which school librarians, school administrators and speech language pathologists and audiologists can be credited for additional circumstances. The statute also states that "in determining the salaries of teachers who have experience in any branch of the military, the term "year of teaching experience" shall include each complete year of actual classroom instruction while serving in the military."

#### SUPPORTING RESEARCH

Mississippi Code 37-151-5(m) <http://www.mscode.com/free/statutes/37/151/0005.htm>

---

#### LAST WORD

While Mississippi is commended for providing experience credit for those serving in the military, the state should consider encouraging districts to compensate all teachers for relevant work experience, which should not be limited to relevant teaching experience gained before earning a teaching credential.

Figure 89

*Do states direct districts to compensate teachers for related prior work experience?*

<sup>1</sup> California, Delaware, Georgia, North Carolina, Texas and Washington

### ★ Examples of Best Practice

**North Carolina** compensates new teachers with relevant prior-work experience by awarding them one year of experience credit for every year of full-time work, after earning a bachelor's degree, that is related to their area of licensure and work assignment. One year of credit is awarded for every two years of work experience completed prior to earning a bachelor's degree.

# Area 4: Retaining Effective Teachers

## Goal E – Differential Pay

The state should support differential pay for effective teaching in shortage and high-needs areas.

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should support differential pay for effective teaching in shortage subject areas.
2. The state should support differential pay for effective teaching in high-needs schools.
3. The state should not have regulatory language that would block differential pay

### Rationale

- ▶ See appendix for detailed rationale.
- States should take the lead in addressing chronic shortages and needs.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 90

- 18 States Do Not Meet Goal  
Alabama, Alaska, Arizona, Delaware, District of Columbia, Idaho, Indiana, Kansas, Maine, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New Mexico, North Dakota, Rhode Island, West Virginia

## Area 4: Goal E **Mississippi** Analysis

### State Meets a Small Part of Goal

#### ANALYSIS

Mississippi neither supports differential pay by which a teacher can earn additional compensation by teaching certain subjects nor offers incentives for teachers to work in high-needs schools. While there was legislation effective July 1, 2007, to grant state funds for additional base compensation for teachers holding licenses in "critical subject areas" (and who teach at least a majority of their course load in this area) or those employed by a public school district located in a geographic area deemed a "critical teacher shortage," this legislation was to be repealed as of June 30, 2009.

Mississippi has established a "Critical Needs Teacher Scholarship Program" to attract qualified teachers to both geographical areas and subject areas where a critical teacher shortage exists: the program awards full scholarships to those who render service to the state. Also, under the "Employer-Assisted Housing Teacher Program," eligible teachers serving in a geographical area designated as having a critical shortage of teachers may apply for a loan of up to \$6,000 to assist in closing costs associated with the purchase of a house.

Mississippi also has a Teacher Loan Repayment Program. Teachers who have received an alternate route license in a critical shortage-subject area or hold a teaching certificate in any subject area and who agree to teach in a critical geographical shortage area can apply for \$12,000 of loan forgiveness (\$3,000 payable per year for up to a maximum of four years).

Teachers with at least three years of experience who are National Board Certified are eligible to receive an annual salary supplement of \$6,000, but this differential pay is not tied to high-needs schools or subject-area shortages.

#### SUPPORTING RESEARCH

Mississippi Teacher Loan Repayment Program [http://www.mississippi.edu/riseupms/financialaid-step3-grants-loans.php?article\\_id=239](http://www.mississippi.edu/riseupms/financialaid-step3-grants-loans.php?article_id=239)

---

#### RECOMMENDATION

Mississippi meets only a small part of this goal. Although the state's program is a desirable retention tool for teachers early in their careers, the state should expand the program to target those already part of the teaching pool. Such expansion would link compensation more closely to district needs and achieve a more equitable distribution of teachers.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi was helpful in providing NCTQ with facts that clarified the legislative status of its differential pay statute, and the state's candor in acknowledging that funding has never been appropriated is appreciated.

## ★ Examples of Best Practice

Georgia supports differential pay by which teachers can earn additional compensation by teaching certain subjects. The state is especially commended for its new compensation strategy for math and science teachers, which moves teachers along the salary schedule rather than just providing a bonus or stipend. The state also supports differential pay initiatives to link compensation more closely with district needs and to achieve a more equitable distribution of teachers. Georgia's efforts to provide incentives for National Board Certification teachers to work in high-needs schools are also noteworthy.

Figure 91

- 1 Connecticut offers mortgage assistance and incentives to retired teachers.
- 2 Maryland offers tuition reimbursement for retraining in the areas of mathematics and science, if the teacher agrees to teach in the public school system for at least two years following certification. It also offers a stipend to alternative route candidates who agree to teach math, science or special education in a public school for at least three years.
- 3 South Dakota offers scholarships and signing bonuses.

## Area 4: Retaining Effective Teachers

### Goal F – Performance Pay

The state should support performance pay, but in a manner that recognizes its infancy, appropriate uses and limitations.

Figure 92

#### How States are Faring on Performance Pay

- ★ 1 **Best Practice State**  
Tennessee
- 10 **States Meet Goal**  
Arizona, Arkansas, Florida, Iowa, Minnesota, Ohio, South Carolina, South Dakota, Texas, Utah
- ◐ 3 **States Nearly Meet Goal**  
Alaska, California, Oklahoma
- ◑ 5 **States Partly Meet Goal**  
Kentucky, Louisiana, Michigan, MISSISSIPPI, Missouri
- ◒ 0 **States Meet a Small Part of Goal**
- 32 **States Do Not Meet Goal**  
Alabama, Colorado, Connecticut, Delaware, District of Columbia, Georgia, Hawaii, Idaho, Illinois, Indiana, Kansas, Maine, Maryland, Massachusetts, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Oregon, Pennsylvania, Rhode Island, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should support performance pay efforts, rewarding teachers for their effectiveness in the classroom.
2. The state should allow districts flexibility to define the criteria for performance pay; however, the state should ensure that districts' criteria are connected to evidence of student achievement.
3. Any performance pay plan should allow for the participation of all teachers, not just those with students who take standardized tests.

#### Rationale

- ▶ See appendix for detailed rationale.
- Performance pay is an important retention strategy.
- States should set guidelines for districts to ensure that plans are fair and sound.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 4: Goal F **Mississippi** Analysis

### State Partly Meets Goal

#### ANALYSIS

Mississippi supports performance pay. The Mississippi Performance Based Pay (MPBP) plan “may provide monies from state funds to school districts for the purposes of rewarding certified teachers . . . at individual schools showing improvement in student test scores.” The state does not address the amount of the award. There is currently no funding available for this program.

#### SUPPORTING RESEARCH

Mississippi Code 37-19-7(4)

#### RECOMMENDATION

Mississippi meets this goal in part. Although the state is commended for recognizing performance pay, it should guarantee a connection to student achievement and prevent local districts from basing financial incentives solely on elements not indicative of performance in the classroom.

NCTQ points out that this *Yearbook* is based on the existence of regulations, not on the implementation of them. It is unfortunate that this performance pay program has not been funded. Mississippi should either ensure that the program is funded in the near future or remove it from the books altogether because it is, in essence, nonexistent.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi was helpful in providing NCTQ with the facts necessary for our analysis.

Figure 93

★ Examples of Best Practice

Tennessee requires differentiated pay plans, which may include performance pay. If districts choose to include a performance pay component, it must be based on student achievement gains and be criterion-based so that all teachers meeting the standard, not just those with students who take standardized tests, are eligible for the reward. Although the state does not indicate specific incentive amounts, it requires that the award be significant enough to make a difference to teachers.

Figure 93

<sup>1</sup> Alaska, Ohio and South Dakota fund pilot programs.

<sup>2</sup> California only offers incentives to teachers in under-achieving schools.

## Area 4: Retaining Effective Teachers

### Goal G – Pension Sustainability

The state should ensure that excessive resources are not committed to funding teachers' pension systems.

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should ensure that its pension system is financially sustainable. The system should not have excessive unfunded liabilities or an inappropriately long amortization period.
2. Mandatory employee and employer contribution rates should not be unreasonably high. Excessively high employee contribution rates reduce teachers' paychecks, while excessive employer contributions commit district resources that could otherwise be spent on salaries or incentives.

#### Rationale

- ▶ See appendix for detailed rationale.
- Many states' pension systems are based on promises they cannot afford to keep.
- Pension plans disadvantage teachers early in their careers by overcommitting employer resources to retirement benefits.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 4: Goal G Mississippi Analysis

### State Meets a Small Part Goal

#### ANALYSIS

As of June 30, 2008, the most recent date for which an actuarial valuation is available, Mississippi's pension system for teachers is 72.9 percent funded and has a 29.4-year amortization period. This means that it would take the state over 29 years to pay off its unfunded liabilities. While its amortization period meets regulatory requirements, Mississippi's funding level is too low, especially considering that it was below the conventionally recommended minimum funding level of 80 percent before the recent financial market downturn.

In addition, Mississippi commits excessive resources toward its teachers' retirement system. The current employer contribution rate of 11.3 percent is too high, in light of the fact that local districts must also contribute 6.2 percent to Social Security. While this rate allows the state to pay off liabilities within 30 years, it does so at great cost, precluding Mississippi from spending those funds on other more immediate means to retain talented teachers. The mandatory employee contribution rate to the defined benefit plan of 7.25 percent is reasonable but close to reaching an excessive contribution requirement.

#### SUPPORTING RESEARCH

<http://www.pers.state.ms.us/financials/annualfinancialreport.html>

[www.publicfundsurvey.org](http://www.publicfundsurvey.org)

#### RECOMMENDATION

Mississippi meets only a small part of this goal. The state needs to ensure that its pension system is financially sustainable. The state would be better off if its system was over 95 percent funded to allow more protection during financial downturns. However, Mississippi should consider ways to improve its funding level without raising the contributions of school districts and teachers. In fact, the state should work to decrease employer contributions. Committing excessive resources to pension benefits can negatively affect teacher recruitment and retention.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis. Mississippi added that any statements about what the plan should offer to its participants are a matter of opinion and are best addressed by state policymakers.

In addition, Mississippi stated that on October 24, 2006, the Board of Trustees of the Public Employees' Retirement System of Mississippi (PERS) adopted a funding policy related to the funded status of PERS, which encompasses the employer contribution rate and the implementation of benefit enhancements. The goals include the following: to maintain a stable or increasing ratio of system assets to accrued liabilities, and eventually to reach a 100 percent funding ratio; to maintain adequate asset levels to finance the benefits promised to members; to develop a pattern of stable contribution rates when expressed as a percentage of member payroll as measured by valuations prepared in accordance with the principles of practice prescribed by the Actuarial Standards Board, with a minimum employer contribution equal to the normal cost determined under the Entry Age Normal funding method; and to provide intergenerational equity for taxpayers with respect to system costs.

#### LAST WORD

Mississippi is commended for admirable goals; however, its system at present is still underfunded and requires an excessive amount of resources.

Figure 95

### *Pension glossary*

**Accrued Liability:** The value of a pension plan's promised benefits calculated by an actuary (actuarial valuation), taking into account a set of investment and benefit assumptions to a certain date.

**Actuarial Valuation:** In a pension plan, this is the total amount needed to meet promised benefits. A set of mathematical procedures is used to calculate the value of benefits to be paid, the funds available and the annual contribution required.

**Amortization Period:** The gradual elimination of a liability, such as a mortgage, in regular payments over a specified period of time.

**Benefit Formula:** Formula used to calculate the amount teachers will receive each month after retirement. The most common formula used is (years of service x final average salary x benefit multiplier). This amount is divided by 12 to calculate monthly benefits.

**Benefit Multiplier:** Multiplier used in the benefit formula. It, along with years of service, determines the total percentage of final average salary that a teacher will receive in retirement benefits. In some plans, the multiplier is not constant, but changes depending upon retirement age and/or years of service.

**Defined Benefit Plan:** Pension plan that promises to pay a specified amount to each person who retires after a set number of years of service. Employees contribute to them in some cases; in others, all contributions are made by the employer.

**Defined Contribution Plan:** Pension plan in which the level of contributions is fixed at a certain level, while benefits vary depending on the return from the investments. Employees make contributions into a tax-deferred account, and employers may or may not make contributions. Defined contribution pension plans, unlike defined benefit pension plans, give the employee options of where to invest the account, usually among stock, bond and money market accounts.

**Lump-sum Withdrawal:** Large payment of money received at one time instead of in periodic payments. Teachers leaving a pension plan may receive a lump-sum distribution of the value of their pension.

**Normal Cost:** The amount necessary to fund retirement benefits for one plan year for an individual or a whole pension plan.

**Pension Wealth:** The net present value of a teacher's expected lifetime retirement benefits.

**Purchasing Time:** A teacher may make additional contributions to a pension system to increase service credit. Time may be purchased for a number of reasons, such as professional development leave, previous out-of-state teaching experience, medical leaves of absence or military service.

**Service Credit/Years of Service:** Accumulated period of time, in years or partial years, for which a teacher earned compensation subject to contributions.

**Supplemental Retirement Plan:** An optional plan to which teachers may voluntarily make tax-deferred contributions in addition to their mandatory pension plans. Employees are usually able to choose their rate of contribution up to a maximum set by the IRS; some employers also make contributions. These plans are generally in the form of 457 and 403(b) programs.

**Vesting:** Right an employee gradually acquires by length of service to receive employer-contributed benefits, such as payments from a pension fund.

★ Examples of Best Practice

Delaware, New York and Wisconsin provide financially sustainable pension systems without committing excessive resources. The systems in these states are fully funded, without requiring excessive contributions from teachers or school districts.

Figure 97

*Are state pension systems financially sustainable?*

Figure 96

<sup>1</sup> According to the most recent valuations, Ohio and Wyoming are 79 percent funded.

Figure 98

*Real Rate of Return*

The pension system funding levels presented in Goal 4-G are based on each state's individual actuarial valuation, which use a series of varying assumptions. One of these assumptions concerns rate of return, which greatly affects a system's funding level. If investment returns fall short of assumptions, the fund will have a deficit; if returns are greater than expected, the fund will have a surplus. Higher assumed rates involve more risk, while rates closer to inflation (typically in the 3-5 percent range) are safer.

Most state pension funds assume a rate between 7.5 percent and 8.25 percent. A state using a 7.5 percent rate will report a lower funding level that if it had used 8.25 percent, even though its liabilities remain the same. Many states report that they do meet or exceed an eight percent rate of return over the life of the plan.

However, some economists argue that states' assumed rates of return are too high, and should instead be closer to four percent. They caution that the risk associated with states' higher rates is borne by taxpayers, with the result that tax rates rise to fund pension deficits. A rate closer to four percent would make the vast majority of the nation's pension systems less than 50 percent funded. In light of the current market situation, the debate over the rate of return is particularly timely. With no current consensus by experts or policymakers, NCTQ used states' self-reported numbers rather than recalculate all funding levels based on a standard rate of return. Considering how many states' systems NCTQ found in questionable financial health without using the lower rates some economists prefer, it is clear this is an issue that demands policymakers' attention.

Figure 99

*How well funded are state pension systems?*

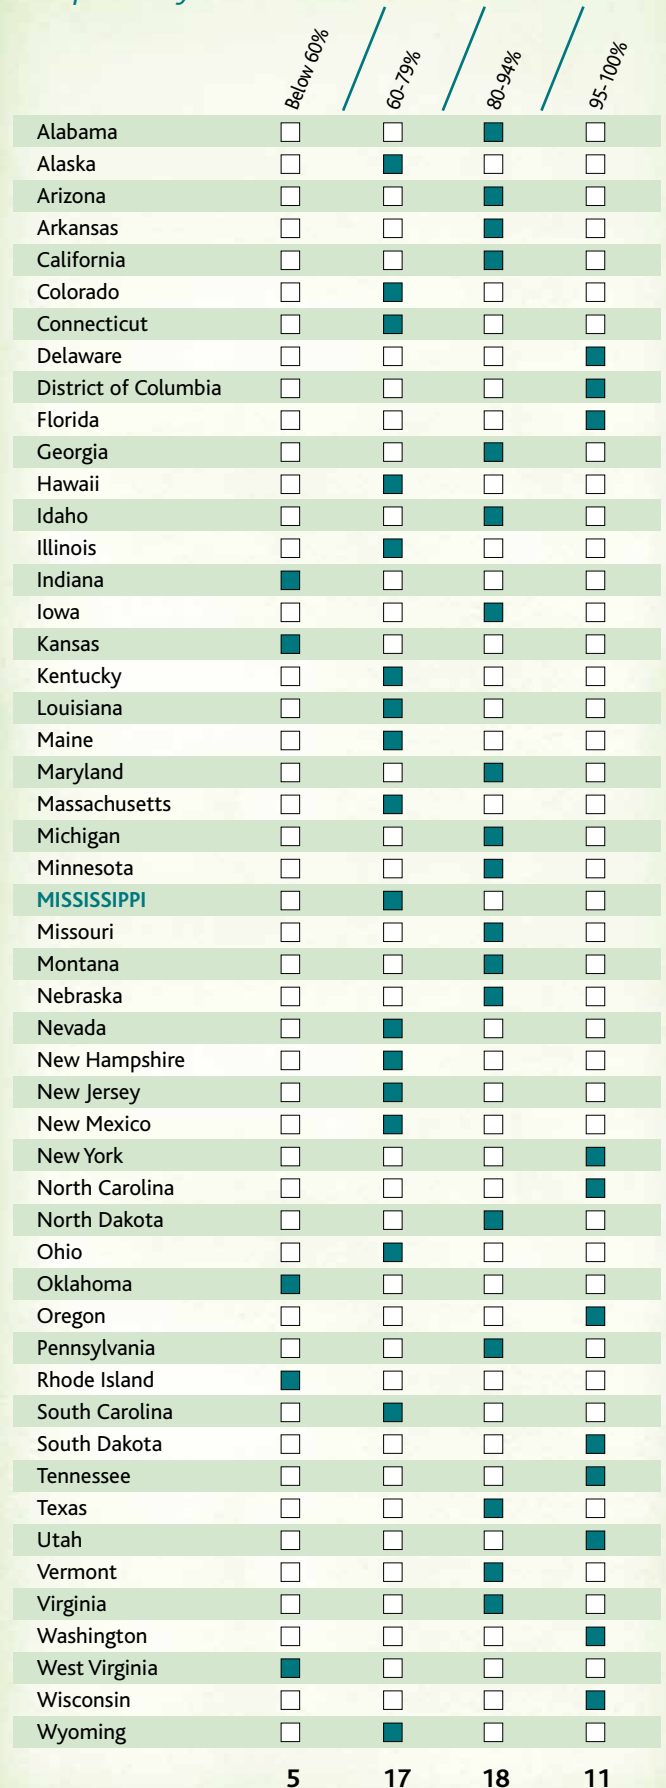

Figure 100

*What is a reasonable rate for pension contributions?*

- 4-7 percent each for teachers and districts in states participating in Social Security
- 10-13 percent each for teachers and districts in states not participating in Social Security

Analysts generally agree that workers in their 20's with no previous retirement savings should save, in addition to Social Security contributions, about 10-15 percent of their gross income in order to be able to live during retirement on 80 percent of the salary they were earning when they retired. While the recommended savings rate varies with age and existing retirement savings, NCTQ has used this 10-15 percent benchmark as a reasonable rate for its analyses. To achieve a total savings of 10-15 percent, teacher and employer contributions should each be in the range of 4-7 percent. In states where teachers do not participate in Social Security, the total recommended retirement savings (teacher plus employer contributions) is about 12 percent higher, to compensate for the fact that these teachers will not have Social Security income when they retire. In order to achieve the appropriate level of total savings, teacher and employer contributions in these states should each be in the range of 10-13 percent.

- 1 There is no employee contribution for income equal to and below \$6,000.
- 2 The rate is 3.4 percent of pay up to \$15,000.
- 3 The rate is 3 percent until 10 years of service, after which there is no employee contribution.
- 4 The rate is 4.26 percent for the defined benefit plan. The rate varies for the defined contribution plan with a minimum of 5 percent.

## Area 4: Retaining Effective Teachers

### Goal H – Pension Flexibility

The state should ensure that pension systems are portable, flexible and fair to all teachers.

Figure 104

#### How States are Faring on Pension Flexibility

- ★ 0 Best Practice States
- 2 States Meet Goal  
Alaska, South Dakota
- ◐ 4 States Nearly Meet Goal  
California, Ohio, South Carolina, Virginia
- ◑ 19 States Partly Meet Goal

- ◒ 14 States Meet a Small Part of Goal  
Connecticut, Delaware, Hawaii, Illinois, Kentucky, Louisiana, Maryland, MISSISSIPPI, Missouri, New York, North Dakota, Oklahoma, Pennsylvania, Tennessee
- 12 States Do Not Meet Goal  
Arkansas, District of Columbia, Georgia, Massachusetts, Montana, Nevada, New Hampshire, New Mexico, North Carolina, Rhode Island, Texas, West Virginia

#### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. Participants in the state's pension system should have the option of a fully portable pension system as their primary pension plan. States may provide this through a defined contribution plan or a defined benefit plan that is formatted similar to a cash balance plan.
2. Participants in the state's pension system should be vested no later than the third year of employment.
3. Defined benefit plans should offer the option of a lump-sum rollover to a personal retirement account upon employment termination. This option at minimum should include employee contributions and accrued interest at a fair interest rate. In addition, withdrawal options from either defined benefit or defined contribution plans should include funds contributed by the employer.
4. Defined benefit plans should allow participants to purchase time for unlimited previous teaching experience at the time of employment. Teachers should also be allowed to purchase time for all official leaves of absence, such as maternity and paternity leave.

#### Rationale

- ▶ See appendix for detailed rationale.
- Anachronistic features of teacher pension plans disadvantage teachers early in their careers.

#### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 4: Goal H **Mississippi** Analysis

### State Meets a Small Part of Goal

#### ANALYSIS

Mississippi does not offer a fully portable pension plan, such as a defined contribution plan, as an option for a teacher's mandatory pension plan. The only mandatory plan available to a teacher is a defined benefit plan, known as the Mississippi Public Employees' Retirement System (PERS). However, teachers in Mississippi also participate in Social Security, so they must contribute to the state's defined benefit plan in addition to their Social Security contributions. Although retirement savings in addition to Social Security are good and necessary for most individuals, the state's policy results in mandated contributions to two inflexible plans, rather than permitting teachers options for their state-provided savings plans.

Mississippi is commended for offering an optional supplementary defined contribution plan, known as the Mississippi Deferred Compensation Plan & Trust (MDCPT). It is a supplemental retirement savings plan offered through the Mississippi Public Employees' Retirement System. Teachers may contribute up to the IRS limit of \$15,500 annually; teachers who are within four years of retirement eligibility may be able to contribute a larger amount. There is no mandatory employer contribution to the optional defined contribution plans, and teachers who choose to participate cannot then opt out of also participating in the mandatory defined benefit plan.

Vesting is a key component of defined benefit plans because it guarantees a teacher's eligibility to receive lifetime monthly benefit payments and be fully entitled to all other additional benefits. When vested teachers stop working in a particular system, they may leave their funds in the system and later receive benefits when they reach the defined retirement age, or they may withdraw some or all of the funds according to the plan's guidelines. Non-vested teachers may only withdraw funds; they may not receive retirement benefits. Mississippi's defined benefit plan does not vest until year eight for new teachers; for teachers hired prior to July 1, 2007, vesting occurs at year eight.

Teachers who withdraw their funds when they stop teaching in Mississippi only receive their contributions plus interest. This means that teachers who withdraw their funds accrue no benefits beyond what they might have earned had they simply put their contributions in basic savings accounts. Furthermore, teachers who remain in the field of education but enter another pension plan (such as in another state) will find it difficult to purchase the time equivalent to their prior employment in the new system because they are not entitled to any employer contribution.

The ability to purchase time is important because defined benefit plans' retirement eligibility and benefit payments are often tied to the number of years a teacher has worked. Mississippi's plan only allows vested teachers to purchase up to five years for prior out-of-state teaching experience. The state's plan also does not provide for the purchase of approved leaves of absence. Not only are these provisions a severe disadvantage to teachers with more than five years of teaching experience who move to Mississippi, but they are also a tremendous disadvantage to any teacher who needs to take a leave for maternity or paternity care (common for teachers at the beginning of their careers), or for other personal reasons.

#### SUPPORTING RESEARCH

<http://www6.ingretirementplans.com/SponsorExtranet/MDCPT/index.html>

<http://www.pers.state.ms.us/pdf/memberservices/handbooks/member/PERSMemberHandbookJanuary2008.pdf>

<http://www.publicfundsurvey.org/publicfundsurvey/contributionrates.asp>

## RECOMMENDATION

Mississippi meets only a small part of this goal. The state is commended for offering an optional defined contribution plan; however, the plan requires no employer contribution, and the high mandatory contribution rates to the defined benefit plan (see Goal 4-G) may prevent teachers from being able to meaningfully contribute. Mississippi should at least offer teachers the option of a fully portable pension plan as its mandatory plan, such as a defined contribution plan, especially considering that teachers also participate in Social Security. The portability of such plans is attractive to an increasingly mobile teacher workforce. If the state maintains its defined benefit option, it should also consider allowing vesting after year three instead of year eight, and lowering the mandatory contribution rate for local districts.

Because purchasing time can be structured as generally cost neutral to the fund, teachers should be allowed to transfer unlimited time from previous teaching experience, and this purchase should be allowed on the first day of employment in the new school system.

The state's plan should also allow teachers to purchase time for leaves of absence such as parental leaves, and payment should be allowed at the time of leave without requiring interest.

## MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis. Mississippi added that any statements about what the plan should offer to its participants are a matter of opinion and are best addressed by state policymakers.

Mississippi also noted that any member who entered the Public Employees' Retirement System (PERS) prior to July 1, 2007, is subject to the four-year vesting period (rather than the eight-year vesting period), provided that he or she did/does not subsequently refund his or her account balance.

Regarding the defined benefit plan as the primary source of retirement security, Mississippi asserted that the assets of PERS are professionally managed, with an asset allocation that calls for prudent, long-term investing so that it can provide a steady, predictable retirement income for the state's retired workers, including retired educators, during good and bad markets. Defined benefit plans like PERS have been found to be the most cost-effective way to administer retirement plans and to provide guaranteed retirement security for the retired workers of the state. In fact, according to the National Institute on Retirement Security, to deliver the same level of retirement benefits, a defined benefit plan can do the job at almost half the cost of a defined contribution plan. Hence, defined benefit plans should remain an integral part of retirement income security in an increasingly uncertain world because they offer employers and employees the best bang for the buck.

## LAST WORD

The analysis is limited to members that entered the system in the 2009-2010 academic year, because including all tiers for all plans would be confusing and cumbersome within each analysis.

While some may argue that in isolation a defined benefit system is a more efficient saving mechanism, that does not mean that in reality it delivers the same level of retirement benefits to all at almost half the cost, nor does it mean that all employees and employers would prefer a defined benefit system. The NIRS report offers interesting statistics, but its model is based on a hypothetical group of employees that all have the same characteristics. None of the teachers in the NIRS model started teaching directly out of college, none retired before traditional retirement age, and none moved from one state to another, a situation that causes drastic pension wealth loss in a defined benefit system. The report offers three primary reasons for defined benefit plans' efficiency. First, defined benefit plans avoid "over-saving," in which individuals must save in case they live beyond the average life expectancy. However, if an individual does "over-save," these funds are not lost: they can be passed on to spouses and/or heirs. While the report places no value on these "death benefits," teachers may prefer this option, especially if lower salaries caused them to save less income during their career than other professionals. The second identified benefit is the greater investment returns of defined benefit plans. However, states could form defined contribution plans that allow similar investment returns by providing participants with appropriate financial education and allowing individuals to invest in a statewide professionally managed fund. Together, the lack of "over-saving" and the superior investment returns equate to 41 of the reports' total 46 percent lower cost. The last 5 percent is credited to portfolio diversification over generations. While this is not as easily transferred to a defined contribution plan, it could be used within a portable defined benefit plan, such as a cash balance plan.

1 A hybrid plan has components of both a defined benefit plan and a defined contribution plan.  
 2 Supplemental defined contribution plan also offered.  
 3 Ohio also offers the option of a hybrid plan.  
 4 Washington offers a choice between a defined benefit or hybrid plan.

Figure 106

*What type of pension systems do states offer teachers?*

<sup>1</sup> A hybrid plan has components of both a defined benefit plan and a defined contribution plan

### ★ Examples of Best Practice

**Alaska** provides a fair and flexible defined contribution pension plan for all teachers. This plan is also highly portable, as teachers are entitled to 100 percent of employer contributions after five years of service. **South Dakota's** defined benefit plan has some creative provisions, which makes it more like a defined contribution plan. Most notably, teachers are able to withdraw 100 percent of their employer contributions after three years of service. In addition, **Florida, Ohio** and **South Carolina** are noteworthy for offering teachers a choice between a defined benefit plan and a defined contribution plan.

Figure 107

How many years before teachers vest?

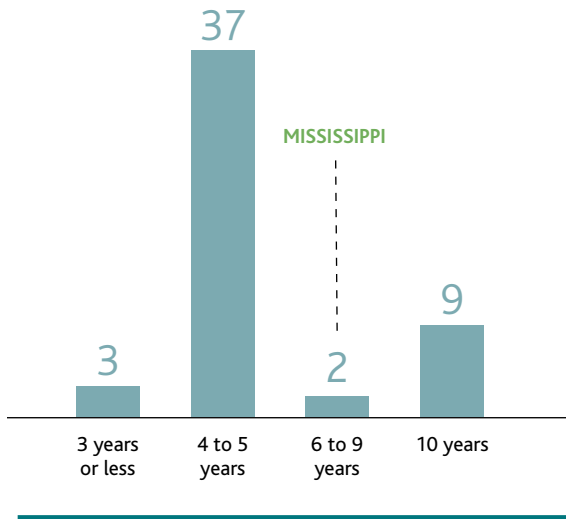

Figure 108

- 1 California offers a hybrid plan in which teachers vest immediately in the defined contribution component and vest in the defined benefit component after five years.
- 2 Florida's defined benefit plan does not vest until year six; teachers vest in the state's defined contribution plan after one year.
- 3 Ohio's defined benefit plan does not vest until year five; teachers vest in the state's defined contribution plan after one year.
- 4 Oregon offers a hybrid plan in which teachers vest immediately in the defined contribution component and vest in the defined benefit component after five years.
- 5 South Carolina's defined benefit plan does not vest until year five; teachers vest immediately in the state's defined contribution plan.
- 6 Based on Washington's Plan 2. The state also offers a hybrid plan in which teachers vest immediately in the defined contribution component and vest in the defined benefit component after 10 years.

	<b>3</b>	<b>5</b>	<b>35</b>	<b>5</b>	<b>2</b>

- States' withdrawal policies may vary depending on teachers' years of service. Year five is used as a common point of comparison.
- As of July 1, 2006, Alaska only offers a defined contribution plan to new members, which allows teachers leaving the system after five years to withdraw 100 percent of the employer contribution.
- Since Florida teachers do not contribute to the defined benefit plan, the only funds participants could withdraw upon leaving are those made for special circumstances such as purchasing time. Florida also has a defined contribution plan, which allows teachers with at least one year of service who are leaving the system to withdraw 100 percent of the employer contribution.
- Indiana teachers transferring to another governmental retirement plan may also withdraw the amount necessary to purchase creditable service in the new plan.
- Most teachers in Nevada fund the system through salary reductions or forgoing pay raises, and thus do not have direct contributions to withdraw. The small minority that are in a contributory system may withdraw their contributions plus interest.
- Ohio has two other pension plans. Ohio's defined contribution plan allows teachers with at least one year of service who are leaving the system to withdraw 100 percent of the employer contribution. Exiting teachers with at least five years of experience in Ohio's combination plan may withdraw their employee-funded defined contribution component, but must wait until age 50 to withdraw funds from the employer-funded defined benefit component.
- Oregon only has a hybrid retirement plan, which allows exiting teachers to withdraw their contributions plus earnings from their defined contribution component; they still receive the employer-funded defined benefit payments at retirement age.
- South Carolina also has a defined contribution plan, which allows exiting teachers to withdraw 100 percent of their contributions and employer contributions, plus interest.
- Since Utah teachers do not contribute to the defined benefit plan, the only funds participants could withdraw upon leaving are those made for special circumstances such as purchasing time.
- Washington also has a hybrid plan, which allows exiting teachers to withdraw their contributions plus earnings from their defined contribution component; they still receive the employer-funded defined benefit payments at retirement age.

## Food For Thought

### West Virginia's Cautionary Tale

Education and individual retirement planning advice is a critical aspect of any state's pension plan, as evidenced by the tribulations of West Virginia's teacher pension system. In 1991, facing financial troubles, West Virginia closed its defined benefit Teachers' Retirement System (TRS) to new members and opened the Teachers' Defined Contribution plan (TDC). However, after widespread dissatisfaction with TDC account balances, it was closed to new members in 2005, and TRS was reopened. In 2008, the state legislature gave TDC participants a one-time option to switch their account balances from TDC to TRS in order to receive retirement payments according to the defined benefit formula. Over 78 percent of teachers elected to transfer.

While these events may appear to argue against states' offering defined contribution plans, West Virginia's experience should be viewed as a cautionary tale of the need for proper investment education. The implementation of the defined contribution plan was not handled well. In fact, some teachers believe they were so poorly advised that they have filed suit against the investment firm managing the plan. About three-fourths of teachers invested solely in low-yield, low-risk annuities that performed only slightly better than some savings accounts. For example, the Associated Press found that from May 2005 to May 2008, these annuities provided only their guaranteed 4.5 percent annual return. Over this same time period, the S&P 500 had an average rate of return of over 7 percent per year.

Defined contribution plans provide teachers flexibility in their retirement savings, but such plans are not without risk. States have a responsibility to educate teachers on their financial options and how to invest at different stages in life.

# Area 4: Retaining Effective Teachers

## Goal I – Pension Neutrality

The state should ensure that pension systems are neutral, uniformly increasing pension wealth with each additional year of work.

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The formula that determines pension benefits should be neutral to the number of years worked. It should not have a multiplier that increases with years of service or longevity bonuses.
2. The formula for determining benefits should preserve incentives for teachers to continue working until conventional retirement ages. Eligibility for retirement benefits should be based on age and not years of service.

### Rationale

- ▶ See appendix for detailed rationale.
- It is unfair to all teachers when pension wealth does not accumulate in a uniform way.
- Pension systems affect when teachers decide to retire as they look to maximize their pension wealth.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 112

### How States are Faring on Pension Neutrality

## Area 4: Goal I **Mississippi** Analysis

### ○ State Does Not Meet Goal

#### ANALYSIS

Mississippi's pension system is based on a benefit formula that is not neutral, meaning that each year of work does not accrue pension wealth in a uniform way until members reach Social Security retirement age.

To qualify as neutral, a pension formula must not only utilize a constant benefit multiplier to determine retired teachers' benefits, but it must also rely on an eligibility calendar based on age, rather than years of service. In most defined benefit plans, pension wealth peaks for teachers the year they become eligible for retirement, and then it declines every year they work beyond eligibility. Plans that base retirement on years of service create unnecessary peaks, and plans that allow a low retirement age create incentives to retire early. Therefore, plans that base retirement on an age in line with Social Security are likely to create the most uniform accrual of wealth.

Mississippi's pension plan does not utilize a constant benefit multiplier, regardless of years of service. Instead, the plan's multiplier is 2 percent for years one through 25, and then 2.5 percent for each additional year beyond 25 years of service. In addition, teachers may retire before standard retirement age based on years of service without a reduction in benefits. Teachers with 25 years of service may retire at any age, while other vested teachers with fewer than 25 years of service may not retire until age 60. Therefore, teachers who begin their careers at age 22 can reach 25 years of service by age 47, entitling them to 13 additional years of unreduced retirement benefits beyond what other teachers would receive who may not retire until age 60. Not only are teachers being paid benefits by the state well before Social Security's retirement age, but these provisions may also encourage effective teachers to retire early, and they fail to treat equally those teachers who enter the system at a later age and give the same amount of service.

#### SUPPORTING RESEARCH

#### RECOMMENDATION

Mississippi does not meet this goal. The state should not only utilize a constant benefit multiplier, but it should also consider increasing its retirement age to align with Social Security and no longer basing eligibility on years of service. These changes would result in a pension plan that treats all teachers more equitably, regardless of where they are in their careers.

### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis. The state also noted that in 1999, the Mississippi legislature enacted legislation to increase the retirement formula from 1 7/8 percent of final average compensation to 2 percent of final average compensation for the first 25 years of creditable service, and from 2 percent to 2.5 percent of final average compensation for all years after 25 years. The formula for years after 25 was increased in part as an incentive for employees to work longer to increase the multiplier that would be used in calculating their retirement allowances.

In 2000, the Mississippi legislature enacted legislation to provide for a partial lump sum distribution for those employees who retire with 28 or more years of creditable service as an incentive for employees to work longer.

### LAST WORD

Increasing retirement age to align with Social Security and no longer basing eligibility on years of service would be a more equitable way to decrease the incentives for employees to retire early.

## ★ Examples of Best Practice

**Alaska** offers a defined contribution pension plan that is neutral, with pension wealth accumulating in an equal way for all teachers for each year of work. **Minnesota** offers a defined benefit plan with a formula multiplier that does not change relative to years of service and does not allow unreduced benefits for retirees below age 65.

Figure 115

What kind of multiplier do states use to calculate retirement benefits?<sup>1</sup>

Figure 115

- 1 Alaska has a defined contribution plan, which does not have a benefit multiplier.
- 2 Arizona, California, Connecticut, District of Columbia, Florida, Iowa, Kentucky, Massachusetts, Mississippi, Missouri, New Hampshire, New York, Ohio, Rhode Island and Wyoming.

Figure 114

- 1 All calculations are based on a teacher who starts teaching at age 22, earns a starting salary of \$35,000 that increases 3 percent per year, and retires at the age when he or she is first eligible for unreduced benefits. The calculations use states' current benefit formulas and do not include cost of living increases. The final average salary was calculated as the average of the highest three years of salary, even though a few states may vary from that standard. Age 65 was used as the point of comparison for standard retirement age because it is the minimum eligibility age for unreduced Social Security benefits.
- 2 Does not apply to Alaska's defined contribution plan.
- 3 Minnesota provides unreduced retirement benefits at the age of full Social Security benefits or age 66, whichever comes first.
- 4 Massachusetts's formula has many options for retirement. A teacher with 35 years of experience at age 57 would reach the maximum benefit.
- 5 Applies only to Ohio's defined benefit plan.

# Area 5: Exiting Ineffective Teachers

## Goal A – Licensure Loopholes

The state should close loopholes that allow teachers who have not met licensure requirements to continue teaching.

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. Under no circumstances should a state award a standard license to a teacher who has not passed all required licensing tests.
2. If a state finds it necessary to confer conditional or provisional licenses under limited and exceptional circumstances to teachers who have not passed the required tests, the state should ensure that requirements are met within one year.

### Rationale

- ▶ See appendix for detailed rationale.
- Teachers who have not passed licensing tests may place students at risk.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 116

### How States are Faring on Closing Licensure Loopholes

## Area 5: Goal A **Mississippi** Analysis

### ★ Best Practice State

#### ANALYSIS

Mississippi requires that all new teachers pass all required subject-matter tests as a condition of initial licensure.

#### SUPPORTING RESEARCH

General Guidelines: Mississippi Educator Licensure  
[http://www.mde.k12.ms.us/ed\\_licensure/licensure\\_guidelines.htm](http://www.mde.k12.ms.us/ed_licensure/licensure_guidelines.htm) (July 2009)

#### RECOMMENDATION

Mississippi meets this goal, and the state's policies in this area earn it a "Best Practice" designation. The state is commended for closing the loophole, identified in the previous edition of the *Yearbook*, which allowed teachers to teach under its One Year Alternate Route License if they scored within at least one standard error of measurement of the passing score on the Praxis II.

---

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi recognized the factual accuracy of our analysis.

## ★ Examples of Best Practice

Colorado, Mississippi and New Jersey require that all new teachers must pass all required subject-matter tests as a condition of initial licensure.

Figure 117

*Do states still award emergency licenses?<sup>1</sup>*

Figure 118

1 Iowa only requires subject-matter testing for elementary teachers.

2 Montana and Nebraska do not currently require licensing tests.

3 Nevada has no deferral as of 2010.

4 Wyoming only requires subject-matter testing for elementary and social studies teachers.

# Area 5: Exiting Ineffective Teachers

## Goal B – Unsatisfactory Evaluations

The state should articulate consequences for teachers with unsatisfactory evaluations, including specifying that teachers with multiple unsatisfactory evaluations are eligible for dismissal.

Figure 119

### How States are Faring on Consequences for Unsatisfactory Evaluations

- ★ 2 Best Practice States  
Illinois, Oklahoma
- 6 States Meet Goal  
Alaska, Colorado, Florida, Louisiana, New Mexico, Washington
- ◐ 6 States Nearly Meet Goal  
Delaware, Georgia, Hawaii, North Carolina, South Carolina, Texas
- ◑ 13 States Partly Meet Goal  
Alabama, Arkansas, California, Connecticut, Iowa, Michigan, MISSISSIPPI, Missouri, New York, Oregon, Pennsylvania, Utah, West Virginia
- ◒ 1 State Meets a Small Part of Goal  
Arizona
- 23 States Do Not Meet Goal  
District of Columbia, Idaho, Indiana, Kansas, Kentucky, Maine, Maryland, Massachusetts, Minnesota, Montana, Nebraska, Nevada, New Hampshire, New Jersey, North Dakota, Ohio, Rhode Island, South Dakota, Tennessee, Vermont, Virginia, Wisconsin, Wyoming

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that all teachers who have received a single unsatisfactory evaluation be placed on an improvement plan -- whether or not they have tenure.
2. The state should require that all teachers who receive two consecutive unsatisfactory evaluations or two unsatisfactory evaluations within five years be formally eligible for dismissal -- whether or not they have tenure.

### Rationale

- ▶ See appendix for detailed rationale.
- Negative evaluations should have meaningful consequences.
- Employment status should not determine the consequences of a negative evaluation.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

## Area 5: Goal B **Mississippi** Analysis

### State Partly Meets Goal

#### ANALYSIS

Mississippi has a policy regarding unsatisfactory evaluations only for teachers in identified Priority Schools. A Priority School is one identified for improvement based on its performance on annual yearly growth targets and the percentage of students performing below grade level. Mississippi requires that teachers in Priority Schools who receive an unsatisfactory evaluation be placed on a professional development plan. If after one year, a teacher receives a second unsatisfactory evaluation, the plan is adjusted and re-implemented. If after that second year the teacher receives an unsatisfactory evaluation, then the teacher is eligible for dismissal.

#### SUPPORTING RESEARCH

Mississippi Code Sec. 37-18-7; Mississippi Public School Accountability Standards 2008, 3.4.5.1  
<http://www.mde.k12.ms.us/accred/accred.html>

#### RECOMMENDATION

Mississippi meets this goal in part. The state is commended for requiring that teachers in schools identified for improvement who receive an unsatisfactory evaluation, regardless of whether they have tenure, be placed on an improvement plan and for making a teacher eligible for formal dismissal after two unsatisfactory evaluations within a five-year period. The state should consider applying this policy to all of its schools.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi asserted that the state does not have a tenure policy. Districts are allowed to renew or not renew teacher contracts regardless of their years of experience.

#### LAST WORD

Whether or not tenure is a factor in districts' dismissal policies, the state should ensure that districts understand that teachers with multiple unsatisfactory evaluations should be eligible for dismissal. The fact that the state has such a policy for its Priority Schools suggests the state's concern that, in the absence of this policy, low-performing teachers would not be made eligible for dismissal. While NCTQ agrees that high-needs schools can least afford to retain ineffective teachers, districts and schools throughout the state must be able to exit such teachers.

★ Examples of Best Practice

Illinois and Oklahoma both require that teachers who receive unsatisfactory evaluations be placed on improvement plans. Teachers in Illinois are then evaluated three times during a 90-day remediation period and are eligible for dismissal if performance remains unsatisfactory. Oklahoma's improvement plan may not exceed two months, and if performance does not improve during that time, teachers are eligible for dismissal.

Figure 121

Do states specify that all teachers with multiple unsatisfactory evaluations are eligible for dismissal?

<sup>1</sup> Alaska, Colorado, Delaware, Florida, Hawaii, Illinois, Louisiana, New Mexico, Oklahoma, Pennsylvania, Washington

Figure 120

- <sup>1</sup> Any teacher with an unsatisfactory evaluation is immediately dismissed.
- <sup>2</sup> Kentucky does require multiple observations the year following an unsatisfactory evaluation.
- <sup>3</sup> Improvement plans are only used for teachers in identified "Priority Schools." Those same teachers are also eligible for dismissal for multiple unsatisfactory evaluations.
- <sup>4</sup> Only teachers in low performing schools can be dismissed after just one negative rating.
- <sup>5</sup> Only teachers on annual contracts are eligible for dismissal after unsatisfactory evaluations.
- <sup>6</sup> Only probationary teachers can be dismissed following an unsatisfactory evaluation.

# Area 5: Exiting Ineffective Teachers

## Goal C – Dismissal for Poor Performance

The state should ensure that the process for terminating ineffective teachers is expedient and fair to all parties.

### Goal Components

(The factors considered in determining the states' rating for the goal.)

1. A teacher who is terminated for poor performance should have an opportunity to appeal. In the interest of both the teacher and the school district, the state should ensure this appeal occurs within a reasonable time frame.
2. The state should distinguish the process and accompanying due process rights for teachers dismissed for classroom ineffectiveness from the process and accompanying due process rights for teachers dismissed or facing license revocation for felony or morality violations or dereliction of duties.

### Rationale

- ▶ See appendix for detailed rationale.
- States need to be explicit that teacher ineffectiveness is grounds for dismissal.
- Due process must be efficient and expedited.
- Decisions about teachers should be made by those with educational expertise.

### SUPPORTING RESEARCH

- ▶ Research citations to support this goal are available at [www.nctq.org/stpy/citations](http://www.nctq.org/stpy/citations).

Figure 122

### How States are Faring in Dismissal for Poor Performance

## Area 5: Goal C **Mississippi** Analysis

### ○ State Does Not Meet Goal

#### ANALYSIS

In Mississippi, tenured teachers who are terminated for poor performance may appeal multiple times. After receiving notice of dismissal, the teacher may file a written request for a hearing, which must take place within 30 days. Teachers may then file additional appeals with the chancery court and then the Supreme Court. The time frame of these appeals is not addressed by the state.

Regrettably, the state also does not distinguish its due process rights for teachers dismissed for ineffective performance from those facing license revocation for dereliction of duties, or felony and/or morality violations. Specifically, the process is the same regardless of the grounds for cancellation, which include “incompetence, neglect of duty, immoral conduct, intemperance, brutal treatment of a pupil or other good cause.”

#### SUPPORTING RESEARCH

Mississippi Code 37-9-59, -113

#### RECOMMENDATION

Mississippi does not meet this goal. Although the state should provide tenured teachers an opportunity to appeal the district’s decision to terminate their contracts, multiple appeals should not be permitted and such an appeal should not be made in a court of law but before a panel of educators. It is in the best interest of both the teacher and the district that a conclusion be reached in a reasonable time frame. Prolonged appeals tax limited resources and may dissuade districts from attempting to terminate ineffective teachers.

The state should also distinguish the process for dismissing ineffective teachers from dismissal or license revocation for dereliction of duties, or felony and/or morality violations. While teachers should have due process for any termination, it is important to separate loss of employment for poor performance from issues with farther reaching consequences that could permanently impact a teacher’s right to practice.

#### MISSISSIPPI RESPONSE TO ANALYSIS

Mississippi asserted that it does not have a tenure policy.

#### LAST WORD

For the purposes of this goal, the terms “tenured” and “nonprobationary” are synonymous.

## ★ Examples of Best Practice

Unfortunately, no state has an exemplary policy that NCTQ can highlight as “best practice” in this area. Only **Florida, New Hampshire** and **Wisconsin** ensure that their processes for terminating ineffective teachers should be concluded within a reasonable time frame. Regrettably, even these states do not distinguish due process rights for teachers dismissed for ineffective performance from those facing license revocation for dereliction of duties, or felony and/or morality violations.

## Appendix

### Area 1: Goal A Admission into Preparation Programs

#### Rationale

#### **The most appropriate time for assessing basic skills is at program entry.**

Basic skills tests were not intended to be licensing tests, but rather to be used at the point of admission into a teacher preparation program. These tests generally assess middle school-level skills, and states should use them as a minimal screening mechanism to ensure that teacher preparation programs do not admit anyone who is not prepared to do college-level work. Admitting prospective teachers who have not passed these tests may result in programs devoting limited time to basic skill remediation rather than preparation for the classroom.

#### **Screening candidates at program entry protects the public's investment.**

Teacher preparation programs that do not screen candidates, particularly programs at public institutions that are heavily subsidized by the state, invest considerable taxpayer dollars in the preparation of individuals who may not be able to successfully complete the program and pass the licensing tests required to become a teacher. Candidates needing additional support should complete remediation prior to program entry, avoiding the possibility of an unsuccessful investment of significant public tax dollars.

### Area 1: Goal B Elementary Teacher Preparation

#### Rationale

#### **The state should ensure that its teacher preparation programs provide elementary teachers with a broad liberal arts education.**

Many states' policies fail to ensure that elementary teacher candidates will complete coursework in topics relevant to common topics in elementary grades, specifically topics found in states' elementary learning standards. Even when states specify liberal arts coursework requirements, the regulatory language can be quite broad, alluding only minimally to conceptual approaches such as "quantitative reasoning" or "historical understanding." Another common but inadequate approach that states take is to specify broad curricular areas like "humanities" or "physical sciences." A humanities course could be a general overview of world literature--an excellent course for a prospective elementary teacher--but it could also be "Introduction to Film Theory." Likewise, a physical science course could be an overview of relevant topics in physics, chemistry, and astronomy, or it could

focus exclusively on astronomy and fail to give a teacher candidate an understanding of the basic concepts of physics. Too few states' requirements distinguish between the value gained from a survey course in American history, such as "From Colonial Times to the Civil War," and an American history course such as "Woody Guthrie and Folk Narrative in the Great Depression."

In addition to the common-sense notion that teachers ought to know the subjects they teach, research supports the benefits to be gained by teachers being broadly educated. Teachers who are more literate--who possess richer vocabularies--are more likely to be effective. In fact, of all the measurable attributes of a teacher, teacher literacy correlates most consistently with student achievement gains. Some states still require that elementary teacher candidates major in elementary education, with no expectation that they be broadly educated. Others have regulatory language that effectively requires the completion of education coursework instead of liberal arts coursework by mandating only teaching methods courses in subject areas without also requiring content-based coursework in the areas themselves.

#### **An academic concentration enhances content knowledge and ensures that prospective elementary teachers take higher level academic coursework.**

Few states require prospective elementary teachers to major or minor in an academic subject area. Consequently, in most states these teachers can meet subject-matter requirements without taking any advanced-level coursework. At minimum, states should require a concentration in an academic area. In addition to deepening subject-matter knowledge in a particular area, building this concentration into elementary education programs ensures that prospective teachers complete academic coursework on par with peers earning bachelor's degrees in other areas.

A concentration also provides a fallback for education majors whose programs deem them unready for the classroom. In most education programs, virtually all coursework is completed before candidates begin student teaching. The stakes are high once student teaching begins: if a candidate cannot pass, he or she cannot meet requirements for a major or graduate. This may create a perverse incentive for programs to set low standards for student teaching and/or pass candidates whose clinical experience is unsatisfactory. If they were required to have at least an academic concentration, candidates who failed student teaching could still complete a degree with minimal additional coursework.

#### **Standards-based programs can work when verified by testing.**

Many states no longer prescribe specific courses or credit hours as a condition for teacher candidates to qualify for a license. Instead, they require teacher candidates to complete an approved program that meets state-specific standards or standards set forth by accrediting bodies--the National Council for Accreditation of Teacher Education (NCATE) and the Association for Child-

hood Education International (ACEI)--and leave it at that. The advantage of this "standards-based" approach is that it grants greater flexibility to teacher preparation programs regarding program design.

However, a significant disadvantage is that the standards-based approach is far more difficult to monitor or enforce. While some programs respond well to the flexibility, others do not. Though the ACEI/NCATE standards may be beneficial, they are too general for states to rely on in their efforts to ensure adequate subject-matter training. For example, ACEI's standard for social studies requires that elementary teacher candidates be "able to use knowledge, skills and dispositions from social studies to organize and provide integrated instruction in grades K-6 for the study of major themes, concepts, and modes of inquiry drawn from academic fields that address: (1) culture; (2) time, continuity, and change; (3) people, places, and environment; (4) individual development and identity; (5) individuals, groups, and institutions; (6) power, governance, and authority; (7) production, distribution, and consumption; (8) science, technology, and society; (9) global connections; and (10) civic ideals and practices." These broad concepts do very little to articulate the actual knowledge that elementary teacher candidates should possess.

Standards are important but essentially meaningless absent rigorous tests to ensure that teacher candidates have met them. Most states that have chosen the standards-based approach have not implemented such tests. In their absence, verifying that teacher preparation programs are teaching to the standards requires an exhaustive review process of matching every standard with something taught in a course. This approach is neither practical nor efficient. Tests of broad subject matter are also not the solution, given that it is possible to pass without necessarily demonstrating knowledge in each subject area. For instance, on many tests of teacher content knowledge, a passing score is possible while answering every mathematics question incorrectly.

### **Mere alignment with student learning standards is not sufficient.**

Another growing trend in state policy is to require teacher preparation programs to align their instruction with the state's student learning standards. In many states, this alignment exercise is the only factor considered in deciding the content to be delivered to elementary teacher candidates. Alignment of teacher preparation with student learning standards is an important step but by no means the only one. For example, a program should prepare teachers in more than just the content that the state expects of its fourth graders. Also critical is moving past alignment and deciding the broader set of knowledge a teacher needs to have to be able to effectively teach fourth grade. The teacher's perspective must be both broader and deeper than what he or she will actually teach.

### **Subject-area coursework should be taught by arts and sciences faculty.**

Most states do not explicitly require that subject-matter coursework be taught by academics in the field, that is, faculty from a university's college of arts and sciences. While an education professor who specializes in science education, for instance, is well suited to teach effective methodologies in science instruction, a scholar in science should provide the foundation work in the subject itself.

States cannot leave these decisions entirely to teacher preparation programs because sending teacher candidates to the college of arts and sciences to complete coursework can run counter to programs' financial interests.

### **Teacher candidates need to be able to "test out" of coursework requirements.**

Many elementary teacher candidates will have acquired the knowledge needed to teach elementary grades in their high school coursework and other experiences. Someone who earned a score of 3 or higher on an Advanced Placement (AP) exam in American history does not need to take a general survey course in college but should be eligible to take a more advanced American history course focused on a particular topic. States need to have some process that allows teacher candidates to test out of survey requirements.

A legitimate test-out option would require individual subject-matter tests or at least minimum subscores on a general test. Good policy would also accept equivalent scores from AP and SAT II tests.

## **Area 1: Goal C**

### **Teacher Preparation in Reading Instruction**

#### **Rationale**

### **Reading science has identified five components of effective instruction.**

Teaching children to read is the most important task teachers undertake. Over the past 60 years, scientists from many fields have worked to determine how people learn to read and why some struggle. This science of reading has led to breakthroughs that can dramatically reduce the number of children destined to become functionally illiterate or barely literate adults. By routinely applying in the classroom the lessons learned from the scientific findings, most reading failure can be avoided. Estimates indicate that the current failure rate of 20 to 30 percent could be reduced to 2 to 10 percent.

Scientific research has shown that there are five essential components of effective reading instruction: explicit and systematic instruction in phonemic awareness, phonics, fluency, vocabulary and comprehension. While elementary teachers need to be well

versed in these components, even secondary teachers need at least some knowledge of this process, particularly if they work in high-poverty schools.

Many states' policies still do not reflect the strong research consensus in reading instruction that has emerged over the last few decades. Many teacher preparation programs, still caught up in the reading wars, resist teaching scientifically based reading instruction. NCTQ's report "What Education Schools Aren't Teaching about Reading and What Elementary Teachers Aren't Learning" found that only 15 percent of teacher preparation programs in a national sample were providing even minimal exposure to the science of reading. Whether through standards or coursework requirements, states must ensure that their preparation programs graduate only teacher candidates who know how to teach children to read.

### **Most current reading tests do not offer assurance that teachers know the science of reading.**

A few states, such as Massachusetts and Virginia, have developed strong, stand-alone assessments entirely focused on the science of reading. Other states rely on either pedagogy tests or content tests that include items on reading instruction. However, since reading instruction is addressed only in one small part of most of these tests, it is often not necessary to know the science of reading to pass. States need to make sure that a teacher candidate cannot pass a test that purportedly covers reading instruction without knowing the critical material.

## **Area 1: Goal D** **Teacher Preparation in Mathematics**

### **Rationale**

#### **Required math coursework should be tailored in both design and delivery to the unique needs of the elementary teacher.**

Aspiring elementary teachers must begin to acquire a deep conceptual knowledge of the mathematics that they will teach, moving well beyond mere procedural understanding. Their training should focus on the critical areas of numbers and operations; algebra; geometry and measurement; and, to a lesser degree, data analysis and probability.

To ensure that elementary teachers are well trained to teach the essential subject of mathematics, states must require teacher preparation programs to cover these four areas in coursework that is specially designed for prospective elementary teachers. Leading mathematicians and math educators have found that elementary teachers are not well served by courses designed for a general audience and that methods courses also do not provide sufficient preparation. According to Dr. Roger Howe, a mathematician at Yale University: "Future teachers do not need so much to learn more mathematics, as to reshape what they already know."

Most states' policies do not require preparation in mathematics of appropriate breadth and depth and specific to the needs of the elementary teacher. NCTQ's report "No Common Denominator: The Preparation of Elementary Teachers in Mathematics by America's Education Schools" found that only 13 percent of teacher preparation programs in a national sample were providing high quality preparation in mathematics. Whether through standards or coursework requirements, states must ensure that their preparation programs graduate only teacher candidates who are well prepared to teach mathematics.

### **Most state tests offer no assurance that teachers are prepared to teach mathematics.**

Only Massachusetts has developed a rigorous assessment for elementary teachers entirely and solely focused on mathematics. Other states rely on subject-matter tests that include some items (or even a whole section) on mathematics instruction. However, since subject-specific passing scores are not required, one need not know much mathematics in order to pass. In fact, one might answer every mathematics question incorrectly and still pass. States need to ensure that it is not possible to pass a licensure test that purportedly covers mathematics without knowing the critical material.

## **Area 1: Goal E** **Middle School Teacher Preparation**

### **Rationale**

#### **States must differentiate middle school teacher preparation from that of elementary teachers.**

Middle school grades are critical years of schooling. It is in these years that far too many students fall through the cracks. However, requirements for the preparation and licensure of middle school teachers are among the weakest state policies. Too many states fail to distinguish the knowledge and skills needed by middle school teachers from those needed by an elementary teacher. Whether teaching a single subject in a departmentalized setting or teaching multiple subjects in a self-contained setting, middle school teachers must be able to teach significantly more advanced content than elementary teachers do. The notion that someone should be identically prepared to teach first grade or eighth grade mathematics seems ridiculous, but states that license teachers on a K-8 generalist certificate essentially endorse this idea.

#### **Approved programs should prepare middle school teacher candidates to be qualified to teach two subject areas.**

Since No Child Left Behind requires most aspiring middle school teachers to have a major or pass a test in each teaching field, the law would appear to preclude them from teaching more than one subject. However, middle school teacher candidates could

instead earn two subject-area minors, gaining sufficient knowledge to pass state licensing tests and be highly qualified in both subjects. This policy would increase schools' staffing flexibility, especially since teachers seem to show little interest in taking tests to earn highly qualified teaching status in a second subject once they are in the classroom. Research offers little evidence that middle school teachers with a major will be more effective than middle school teachers with a minor, and in fact most middle schools do not require this credential of teachers.

## Area 1: Goal F Special Education Teacher Preparation

### Rationale

**All teachers, including special education teachers, teach content and therefore need relevant coursework.**

Special education teacher candidates who will teach elementary grades should complete roughly the same core of liberal arts coursework as regular elementary teacher candidates (See Goal 1-B). They will need the same knowledge in the classroom. Moreover, from a practical perspective, it is incumbent on teacher preparation programs to produce special education teachers who are highly qualified in the areas they will teach.

While special educators should be valued for their critical role in working with students with disabilities and special needs, the state identifies them not as "special education assistants" but as "special education teachers," presumably because it expects them to provide instruction. Inclusion models, where special education students receive instruction from a general education teacher paired with a special education teacher to provide instructional support, do not mitigate the need for special education teachers to know content. Providing instruction to children who have special needs requires both knowledge of effective learning strategies and of the subject matter at hand. Failure to ensure that teachers are well trained in content areas deprives special education students of the opportunity to reach their academic potential.

**HQT requirements place unique challenges on secondary special education teachers.**

No Child Left Behind (NCLB) and the 2004 reauthorization of the Individuals with Disabilities Education Act (IDEA) present conflicting expectations for the subject-matter preparation of new secondary special education teachers. Although the latter, which was passed after NCLB, offers greater flexibility and is more realistic than what NCLB suggests, it may not adequately address teachers' subject-matter knowledge. States can provide some middle ground, while meeting the requirements of both laws.

Under IDEA, states can award "highly qualified teacher" status to new secondary special education teachers who:

- have a major or have passed a subject-matter test in one of three content areas: language arts, mathematics, or science (without explanation, the law excludes social studies); and
- complete a single HOUSSE route for multiple subjects in all other subjects that they are likely to teach during their first two years of teaching.

States need to provide more-specific guidance on this issue. They should require secondary special education teachers to have broad coursework in multiple subjects and to become highly qualified in two core academic areas. This will make teachers more flexible and thus better able to serve schools and students. States can use a combination of testing and coursework to meet this goal.

**Secondary special education teachers need to graduate highly qualified in two subject areas.**

Given that these teachers will be expected to complete a HOUSSE route in all remaining subject areas during their first two years of teaching, it makes sense for them to complete undergraduate training in two related areas, probably either math and science or English and social studies. That way, the HOUSSE route can focus on related subject areas and candidates can focus on related fields, rather than studying up on English, history, and mathematics, for example, in their first two years of teaching.

**A customized HOUSSE route is needed to meet the needs of new special education teachers to earn highly qualified status.**

Special education teachers face unique pressures, as they must be competent in both the subject areas they teach and in the strategies for teaching children with a variety of special needs. The 2004 reauthorization of the Individuals with Disabilities Education Act recognized these pressures in its proviso allowing new secondary special education teachers to use states' HOUSSE routes to become "highly qualified," a route normally reserved for veteran teachers.

Whether or not states have discontinued the HOUSSE route for veteran teachers, it is this traditional route that most states make available for secondary special education teachers. However, several problems are common among traditional HOUSSE routes that make them inappropriate for new secondary special education teachers. First, most state plans are weak on teacher content preparation even though the intent of the law was for HOUSSE to address weak subject-matter knowledge. Second, for teachers to achieve highly qualified status, states highly value experience, which, of course, a new teacher does not have. Third, state requirements tend to be inordinately complicated, making

it hard on a new teacher to know how to navigate the system to earn the required credential.

Providing a HOUSSE option to special education teachers was originally seen as a way to streamline the process of achieving HQT status for teachers who instruct in multiple subject areas each day. While it is certainly important that a secondary special education teacher has a basic competency in subjects ranging from mathematics to world history, it is unreasonable to expect him or her to hold multiple college degrees or pass four or five different content examinations to be deemed highly qualified.

States can help new secondary special education teachers become highly qualified in multiple subjects by encouraging them to pursue professional development and coursework that focuses on state student learning standards. Having available adapted subject-matter tests would also add much-needed flexibility.

Structured properly, HOUSSE would offer an efficient means by which a teacher could gain a broad overview of a specific area of content knowledge. One clear option would be for a state to identify focused, content-driven university courses that would give teachers a survey of the information necessary to teach a given subject. A single world history course could provide a sufficient basis in social studies; a single quantitative reasoning course could give a broad review of mathematical concepts. While not providing expertise, such classes could provide the proficiency needed for a teacher to obtain highly qualified teacher status in the subject.

## Area 1: Goal G Assessing Professional Knowledge

### Rationale

**A good pedagogy test puts teeth in states' professional standards.**

In order to ensure that the state is licensing only teachers who meet its expectations, all standards must be testable. The state's specifying standards that cannot be assessed in a practical and cost-effective manner has no value. Examples of knowledge that can be tested include the basic elements of good instruction, how to communicate effectively with children, how to use class time efficiently, effective questioning techniques, establishing smooth classroom routines, the importance of feedback, engaging parents, the best methods for teaching reading as well as other subjects, appropriate use of technology, knowledge of testing, and the fundamentals of addressing individual learning challenges.

States use too many tests to measure new teachers' professional knowledge that utterly fail to do so, either because the passing score is set so low that anyone—even those who have not had professional preparation—can pass or because one can discern the “right” answer on an item simply by the way it is written.

## Area 1: Goal H Teacher Preparation Program Accountability

### Rationale

**States need to hold programs accountable for the quality of their graduates.**

The state should examine a number of factors when measuring the performance of and approving teacher preparation programs. The quality of both the subject-matter preparation and professional sequence is crucial. However, in addition to consideration of program content, NCTQ recommends measures that can provide the state and the public with meaningful, readily understandable indicators of how well programs are doing in what is most important: preparing teachers to be successful in the classroom.

Average scores on basic skills tests of individuals admitted to programs can help the state know, “Are programs appropriately screening applicants?” Pass rate data on licensing tests can help inform states, “Are programs delivering essential academic and professional knowledge?” Classroom performance data and evaluation ratings can help the state determine, “Are programs producing effective classroom teachers?”

Collecting effective pass rate data on state licensing tests is especially important. At a minimum, the state should ensure that programs are reporting pass rates for individuals entering student teaching, not program completers, because the former is now required under the 2008 reauthorization of the Higher Education Act. It is also a method that will not mask the number of individuals the program was unable to properly prepare.

## Area 1: Goal I State Authority for Program Approval

### Rationale

**States should not cede oversight authority over their teacher preparation programs to accreditors.**

The recent growth in the popularity of national accreditation has led some states to adopt policies that blur the line between the public process of state program approval and the private process of national accreditation. The factors considered for accreditation are broader and more formative in nature than the factors that should be considered by the state when approving programs. The state's primary interest is—or should be—narrower, more sharply focused on only those aspects of teacher preparation that directly relate to teacher effectiveness and those measures that can be quantified (see Goals 1–H). While both the state and the accrediting body share the same ultimate goal—quality teachers—the questions that each asks differ.

Furthermore, although there may be a growing consensus as to what teachers should know and be able to do--a consensus that could eventually strengthen the accreditation movement--no solid evidence exists that shows that nationally accredited teacher preparation programs produce better teachers than unaccredited programs.

States may choose to endorse the standards of national accrediting bodies, but these bodies' standards should not be seen as adequate substitutes for state program approval standards. Unfortunately, some states have allowed programs to substitute national accreditation for state program approval. A few states have gone further and required that all teacher preparation programs at public universities attain NCATE accreditation. A few more have required that all in-state programs, public and private, attain national accreditation. These policies are inappropriate, since they require that public funds and institutional resources be spent meeting the standards of a private organization that has yet to be recognized as the undisputed guarantor of minimum quality in its field.

## Area 1: Goal J Balancing Professional Coursework

### Rationale

**Most states have programs that demand excessive requirements.**

NCTQ's research shows that most states have teacher preparation programs where teacher candidates are required to complete more than 60 credit hours of professional coursework. These are excessive requirements that leave little room for electives and often leave insufficient room for adequate subject-matter preparation. Though there is no research data to confirm this, it seems likely that such excessive requirements would discourage talented individuals from pursuing teacher preparation and public school teaching.

**States need to monitor programs' total professional coursework requirements.**

Although some states specify a reasonable amount of minimum professional coursework that new teachers must complete, teacher preparation programs often require far more. Requiring teachers to complete a minimum amount of coursework does nothing to ensure that approved programs will limit themselves to those minimums. It is also not necessarily the case that programs should be limited to those minimums.

## Area 2: Goal A Alternate Route Eligibility

### Rationale

**Alternate route teachers need the advantage of a strong academic background.**

The intent of alternate route programs is to provide a route for those who already have strong subject-matter knowledge to enter the profession, allowing them to focus on gaining the professional skills needed for the classroom. This intent is based on the fact that academic caliber has been shown to be a strong predictor of classroom success. Programs that admit candidates with a weak grasp of both subject matter and professional knowledge can put the new teacher in an impossible position, where he or she is much more likely to experience failure and perpetuate high attrition rates.

**Academic requirements for admission to alternate routes should exceed the requirements for traditional programs.**

Assessing a teacher candidate's college GPA and/or aptitude scores can provide useful and reliable measures of academic caliber, provided that the state does not set the floor too low. A 2.5 minimum GPA is the common choice of many alternate route programs but may be too low. It is about the same as what most teacher preparation programs require of traditional candidates. Some programs address this problem by looking for at least a 2.75 in the last 60 hours of college, as indicative of a candidate's growing seriousness of purpose. GPA measures are especially useful for assessing elementary teacher qualifications, since elementary teaching demands a broader body of knowledge that can be harder to define in terms of specific tests or coursework.

**Multiple ways for assessing subject-matter competency are needed to accommodate nontraditional candidates.**

Rigid coursework requirements can dissuade talented, qualified individuals who lack precisely the "right" courses from pursuing a career in teaching. States can maintain high standards by using appropriate tests to allow individuals to prove their subject-matter knowledge. For instance, an engineer who wishes to teach physics should face no coursework obstacles as long as he or she can prove sufficient knowledge of physics on a test. A good test with a sufficiently high passing score is certainly as reliable as courses listed on a transcript, if not more so.

## Area 2: Goal B Alternate Route Preparation

### Rationale

**The program must provide practical, meaningful preparation that is sensitive to a new teacher's stress level.**

Too many states have policies requiring alternate route programs to “back-load” large amounts of traditional education coursework, thereby preventing the emergence of real alternatives to traditional preparation. This issue is especially important given the large proportion of alternate route teachers who complete this coursework while teaching. Alternate route teachers often have to deal with the stresses of beginning to teach while also completing required coursework in the evenings and on weekends. States need to be careful to require participants only to meet standards or complete coursework that is practical and immediately helpful to a new teacher.

**Induction support is especially important for alternate route teachers.**

Most new teachers—regardless of their preparation—find themselves overwhelmed upon taking responsibility for their own classrooms. This is especially true for alternate route teachers, who may have had considerably less classroom exposure or pedagogy training than traditionally prepared teachers. While alternate route programs will ideally have provided at least a brief student teaching experience, not all programs can incorporate it into their models. States must ensure that alternate route programs do not leave new teachers to “sink or swim” on their own when they begin teaching.

## Area 2: Goal C Alternate Route Usage and Providers

### Rationale

**Alternate routes should be structured to do more than just address shortages; they should provide an alternative pipeline for talented individuals to enter the profession.**

Many states have structured their alternate routes as a streamlined means to certify teachers in shortage subjects, grades or geographic areas. While alternate routes are an important mechanism for addressing shortages, they also serve the wider-reaching and more consequential purpose of providing an alternative pathway for talented individuals to enter the profession. A true alternate route creates a new pipeline of potential teachers by certifying those with valuable knowledge and skills who did not prepare to teach as undergraduates and are disinclined to fulfill the requirements of a new degree.

Some states claim the limitations they place on the use of their alternate routes impose quality control. However, states control who is admitted and who is licensed. With appropriate standards for admission (see Goal 2-A) and program accountability (see Goal 2-D), quality can be safeguarded without casting alternate routes as routes of last resort or branding alternate route teachers “second-class citizens.”

## Area 2: Goal D Alternate Route Program Accountability

### Rationale

**Alternate route programs should show they consistently produce effective teachers.**

All data that are collected on alternate route programs should focus on the central question of whether they produce effective teachers. Although many components are involved in a good alternate route program, the output of productive teachers is the only true indicator of success. The indicators NCTQ recommends capture a comprehensive vision of teacher effectiveness.

Alternate route programs need to be held as accountable for their results as traditional programs are. While the training and time associated with alternate route programs differ substantially from those of traditional programs, the outputs of student learning and teacher effectiveness should be held to an identical standard.

## Area 2: Goal E Licensure Reciprocity

### Rationale

**Using transcripts to judge teacher competency provides little value.**

In an attempt to ensure that teachers have the appropriate professional and subject-matter knowledge base when granting certification, states often review a teacher's college transcript, no matter how many years earlier a bachelor's degree was earned. A state certification specialist reviews the college transcript, looking for course titles that appear to match state requirements. If the right matches are not found, a teacher may be required to complete additional coursework before receiving standard licensure. This practice holds true even for experienced teachers who are trying to transfer from another state, regardless of experience or success level. The application of these often-complex state rules results in unnecessary obstacles to hiring talented and experienced teachers. Little evidence indicates that reviewing a person's undergraduate coursework improves the quality of the teaching force or ensures that teachers have adequate knowledge.

### **Testing requirements should be upheld, not waived.**

While many states impose burdensome coursework requirements, they often fail to impose minimum standards on licensure tests. Instead, they offer waivers to veteran teachers transferring from other states, thereby failing to impose minimal standards of professional and subject-matter knowledge. In upholding licensure standards for out-of-state teachers, the state should be flexible in its processes but vigilant in its verification of adequate knowledge. Too many states have policies and practices that reverse these priorities, focusing diligently on comparison of transcripts to state documents while demonstrating little oversight of teachers' knowledge. If a state can verify that a teacher has taught successfully and has the required subject-matter and professional knowledge, its only concern should be ensuring that he or she is familiar with the state's student learning standards.

### **Signing on to the NASDTEC Interstate Agreement at least signals a state's willingness to consider portability.**

Many states have signed onto the Interstate Agreement sponsored by the National Association of State Directors of Teacher Education and Certification (NASDTEC), an organization concerned with facilitating licensure reciprocity. However, the NASDTEC Interstate Agreement does not guarantee full transfer of certification and endorsement. Despite having signed the agreement, many states still require veteran teachers to complete additional coursework to attain full licensure. Nevertheless by signing this agreement, states are taking a good first step toward achieving nationwide portability.

### **States licensing out-of-state teachers should not differentiate between experienced teachers prepared in alternate routes and those prepared in traditional programs.**

It is understandable that states are wary of accepting alternate route teachers from other states, since programs vary widely in quality. However, the same wide variety in quality can be found in traditional programs. If a teacher comes from another state with a standard license and can pass the state's licensure tests, whether the preparation was traditional or alternative should be irrelevant.

## **Area 3: Goal A** **State Data Systems**

### **Rationale**

#### **Value-added analysis connects student data to teacher data to measure achievement and performance.**

Value-added models are an important tool for measuring student achievement and school effectiveness. These models measure individual students' learning gains, controlling for students' previous knowledge. They can also control for students' background

characteristics. In the area of teacher quality, value-added models offer a fairer and potentially more meaningful way to evaluate a teacher's effectiveness than other methods schools use.

For example, at one time a school might have known only that its fifth-grade teacher, Mrs. Jones, consistently had students who did not score at grade level on standardized assessments of reading. With value-added analysis, the school can learn that Mrs. Jones' students were reading on a third-grade level when they entered her class, and that they were above a fourth-grade performance level at the end of the school year. While not yet reaching appropriate grade level, Mrs. Jones' students had made more than a year's progress in her class. Because of value-added data, the school can see that she is an effective teacher.

The school could not have seen this effectiveness without a data system that connects student and teacher data. Furthermore, multiple years of data are necessary to enable meaningful determinations of teacher effectiveness. Value-added analysis requires both student and teacher identifiers and the ability to match test records over time.

#### **There are a number of responsible uses for value-added analysis.**

**Assessing Individual Teachers:** With three years of good data, value-added analysis can identify the strongest and weakest teachers; however, it is not as useful at distinguishing differences among teachers in the middle range of performance. This is why value-added analysis should be used only to provide part of the evidence of teacher effectiveness.

**School Performance:** Value-added analysis can accurately assess the learning gains and losses made in a single school with less risk of measurement error. The U.S. Department of Education is working with states to pilot something akin to value-added analysis, known as "student growth" models, to determine schools' Adequate Yearly Progress (AYP). Student growth models are not as effective as value-added models at controlling for factors other than the quality of the teacher. However, these models are still valuable for providing a measure of academic improvement for the school overall, leaving open their potential use for determining school-wide bonuses. A good value-added model is a subset of a student growth model; it can more precisely separate out nonschool effects on learning, making it possible to better distinguish a specific teacher's impact.

**Applicability to All Teachers:** Many critics of value-added models dismiss them because they can only be used for teachers in tested subjects. While some subjects do not lend themselves to a value-added model, more teachers may be eligible than may be immediately obvious. For example, student reading scores are affected by the quality of social studies and science instruction, not just language arts instruction. Reading comprehension is directly connected to student learning of broad subject matter, including history, geography and science.

**High School:** A value-added model is theoretically most useful at the high school level, where teachers are typically assigned many more students, making annual results more reliable. Data from an elementary class size of 20 to 30 students can produce relatively unstable results for a single year. A high school teacher, however, will be assigned on average 120 students, which would yield a much more stable, reliable indicator of actual teacher performance. Use at the high school level would require states to adopt reliable pre- and post-tests in core subject areas.

**Pilots:** States can directly and indirectly encourage districts to implement value-added analysis. By piloting value-added analysis in districts or schools, the states can directly encourage development of this valuable tool for eventual statewide use. Other programs, such as state-sponsored pay-for-performance programs that base bonuses, in part, on teachers' ability to produce student academic gains, can indirectly encourage experimentation with value-added analysis.

**Evaluating Teacher-Preparation Programs:** Another innovative use for value-added analysis is its inclusion in the evaluation of teacher preparation programs. Value-added analysis that measures the effectiveness of program graduates can provide valuable information that can be used to hold poor teacher preparation programs accountable, as well as identify strong programs that can be models for best practices.

## Area 3: Goal B Evaluation of Effectiveness

### Rationale

**Teachers should be judged primarily by their impact on students.**

While many factors should be considered in formally evaluating a teacher, nothing is more important than effectiveness in the classroom. Unfortunately, districts use many evaluation instruments, some mandated by states, that are structured so that teachers can earn a satisfactory rating without any evidence that they are sufficiently advancing student learning in the classroom. It is often enough that teachers just appear to be trying, not necessarily succeeding.

Many evaluation instruments give as much weight, or more, to factors that lack any direct correlation with student performance, for example, taking professional development courses, assuming extra duties such as sponsoring a club or mentoring, and getting along well with colleagues. Some instruments hesitate to hold teachers accountable for student progress. Teacher evaluation instruments should include factors that combine both human judgment and objective measures of student learning.

A teacher evaluation instrument that focuses on student learning could include the following components:

### A. Observation

1. Ratings should be based on multiple observations by multiple persons, usually the principal and senior faculty, within the same year to produce a more accurate rating than is possible with a single observation. Teacher observers should be trained to use a valid and reliable observation protocol (meaning that it has been tested to ensure that the results are trustworthy and useful). The observers should assign degrees of proficiency to observed behaviors.

2. The primary observation component should be the quality of instruction, as measured by student time on task, student grasp or mastery of the lesson objective and efficient use of class time.

3. Other factors often considered in the course of an observation can provide useful information, including:

- questioning techniques and other methods for engaging class;
- differentiation of instruction;
- continual student checks for understanding throughout lesson;
- appropriate lesson structure and pacing;
- appropriate grouping structures;
- reinforcement of student effort; and
- classroom management and use of effective classroom routines.

Other elements commonly found on many instruments, such as "makes appropriate and effective use of technology" and "ties lesson into previous and future learning experiences" may seem important but can be difficult to document reliably in an observation. Having too many elements can distract the observer from the central question: "Are students learning?"

### B. Objective Measures of Student Learning

Apart from the observation, the evaluation instrument should provide evidence of work performance. Many districts use portfolios, which create a lot of work for the teacher and may be unreliable indicators of effectiveness. Good and less-cumbersome alternatives to the standard portfolio exist, for example:

- The value that a teacher adds, as measured by standardized test scores;
- Periodic standardized diagnostic assessments;
- Benchmark assessments that show student growth;
- Artifacts of student work connected to specific student learning standards that are randomly selected for review by the principal or senior faculty and scored using rubrics and descriptors;
- Examples of typical assignments, assessed for their quality and rigor; and
- Periodic checks on progress with the curriculum (e.g., progress on textbook) coupled with evidence of student mastery of the curriculum from quizzes, tests, and exams.

## Area 3: Goal C

### Frequency of Evaluations

#### Rationale

**Annual evaluations are standard practice in most professional jobs.**

Most states do not mandate annual evaluations of teachers who have reached permanent or tenured status. The lack of regular evaluations is unique to the teaching profession and does little to advance the notion that teachers are professionals.

Further, teacher evaluations are too often treated as mere formalities, rather than as important tools for rewarding good teachers, helping average teachers improve, and holding weak teachers accountable for poor performance. State policy should reflect the importance of evaluations so that teachers and principals alike take their consequences seriously (see Goal 5-B).

**Evaluations are especially important for new teachers.**

Individuals new to a profession frequently have reduced responsibilities coupled with increased oversight. As competencies are demonstrated, new responsibilities are added and supervision decreases. Such is seldom the case for new teachers, who generally have the same classroom responsibilities as veteran teachers, including responsibility for the academic progress of their students, but may receive limited feedback on their performance. In the absence of good metrics for determining who will be an effective teacher before he or she begins to teach, it is critical that schools and districts closely monitor the performance of new teachers.

States should require that districts formally evaluate new teachers at least twice annually. A formal evaluation results in a rating that becomes part of the teacher's record. Evaluations should not be treated as formalities; they are an important tool for identifying teachers' strengths and areas that need improvement. Although the goal should always be to provide feedback and support that will help teachers address weaknesses, evaluations also serve an important purpose in holding weak teachers accountable for continued poor performance.

The state should specifically require that districts evaluate new teachers early in the school year. This policy would help ensure that new teachers get the support they need early and that supervisors know from the beginning of the school year which new teachers (and which students) may be at risk. Requiring at least one additional evaluation provides important data about the teacher's ability to improve. Data from evaluations from the teacher's early years of teaching can then be used as part of the performance-based evidence to make a decision about tenure.

## Area 3: Goal D

### Tenure

#### Rationale

**Tenure should be a significant and consequential milestone in a teacher's career.**

The decision to give teachers tenure (or permanent status) is usually made automatically, with little thought, deliberation or consideration of actual evidence. State policy should reflect the fact that initial certification is temporary and probationary, and that tenure is intended to be a significant reward for teachers who have consistently shown effectiveness and commitment. Tenure and advanced certification are not rights implied by the conferring of an initial teaching certificate. No other profession, including higher education, offers practitioners tenure after only a few years of working in the field.

To make tenure meaningful, states should require a clear process, such as a hearing, for districts to use when considering whether a teacher advances from probationary to permanent status. Such process would ensure that the local district reviews the teacher's performance before making a determination. This also protects the teacher's rights, as he or she knows of the process and has an opportunity to participate.

States should also ensure that evidence of effectiveness is the preponderant (but not the only) criterion for making tenure decisions. Most states confer tenure at a point that is too early for the collection of sufficient and adequate data that reflect teacher performance. Ideally, states would accumulate such data for five years. This robust data set would prevent effective teachers from being unfairly denied tenure based on too little data and ineffective teachers from being granted tenure.

## Area 3: Goal E

### Licensure Advancement

#### Rationale

**The reason for probationary licensure should be to determine teacher effectiveness.**

Most states grant new teachers a probationary license that must later be converted to an advanced or professional license. A probationary period is sound policy as it provides an opportunity to determine whether individuals merit professional licensure. However, very few states require any determination of teacher performance or effectiveness in deciding whether a teacher will advance from the probationary license. Instead, states generally require probationary teachers to fulfill a set of requirements to receive advanced certification. Thus, ending the probationary period is based on whether a checklist has been completed, rather than on teacher performance and effectiveness.

### **Most state requirements for achieving permanent certification have not been shown to impact teacher effectiveness.**

Unfortunately, not only do most states fail to connect advanced certification to actual evidence of teacher effectiveness, but the requirements teachers must most often meet are not even related to teacher effectiveness. The most common requirement for permanent licensure is completion of additional coursework, often resulting in a master's degree. Requiring teachers to obtain additional training in their teaching area would be meaningful; however, the requirements are usually vague, allowing the teacher to fulfill coursework requirements from long menus that include areas having no connection or use to the teacher in the classroom. The research evidence on requiring a master's degree is quite conclusive: these degrees have not been shown to make teachers more effective. This is likely due in no small part to the fact that teachers generally do not attain master's degrees in their subject areas. According to the National Center for Educational Statistics, fewer than one-fourth of secondary teachers' master's degrees are in their subject area, and only 7 percent of elementary teachers' master's degrees are in an academic subject.

In addition to their dubious value, these requirements may also serve as a disincentive to teacher retention. Talented probationary teachers may be unwilling to invest time and resources in more education coursework. Further, they may well pursue advanced degrees that facilitate leaving teaching.

## **Area 3: Goal F Equitable Distribution**

### **Rationale**

#### **Distribution data should show more than just teachers' years of experience and highly qualified status.**

The first step in addressing the distribution of teachers is bringing transparency to the issue. States generally report little more than what is required by No Child Left Behind, which highlights years of experience and HQT status. However, while teaching experience matters, the benefits of experience are largely accumulated within the first few years of teaching. School districts that try to equalize experience among all schools are overestimating its impact. There is no reason why a school with many teachers with only three or five years' experience cannot outperform a school with teachers who have an average of more than ten years' experience.

For this reason, states need to report data that are more informative about a school's teachers. States can accomplish this by using an index for quantifying important teacher credentials found to correlate with student achievement. A good example of a strong index is the academic capital index developed by the Illinois Education Research Council, incorporating teachers' average SAT or ACT scores; the percentage of teachers failing basic skills licensure test at least once; the percentage of teachers on emer-

gency credentials; average selectivity of teachers' undergraduate colleges; and the percentage of new teachers. These factors are complicated, so the state should install a system that translates them into something more easily understood, such as a color-coded matrix indicating a high or low score for a school.

#### **States need to report data at the level of the individual school.**

Only by achieving greater stability in the staffing of individual schools can districts achieve the nation's goal of more equitable distribution of teacher quality. A strong reporting system reflecting the index described above, as well as data on teacher attrition, teacher absenteeism and teacher credentials can lend much-needed transparency to those factors that contribute to staffing instability and inequity.

The lack of such data feeds a misconception that all high-poverty schools are similarly unable to retain staff because of their socioeconomic and racial status. If collected and disaggregated to the level of the individual school, however, such data could shift the focus of districts and states toward the quality of leadership at the school level and away from the notion that instability and inequity are unavoidable consequences of poverty and race. Variations in staff stability are huge among schools with similar numbers of poor and/or minority children. School culture, largely determined by school leadership, contributes greatly to teacher morale, which in turn affects teacher success and student achievement. By revealing these variations among schools facing the same challenges, school leadership can be held accountable—and rewarded when successful.

Within-district comparisons are crucial in order to control for as many elements specific to a district as possible, such as a collective bargaining agreement (or the district's personnel policies) and the amount of resources.

## **Area 4: Goal A Induction**

### **Rationale**

#### **Too many new teachers are left to "sink or swim" when they begin teaching.**

Most new teachers are overwhelmed and undersupported at the outset of their teaching careers. Although differences in preparation programs and routes to the classroom do affect readiness, even teachers from the most rigorous programs need support once they take on the myriad responsibilities of a teacher of record. A survival-of-the-fittest mentality prevails in many schools; figuring out how to successfully negotiate unfamiliar curricula, discipline and management issues, and labyrinthine school and district procedures is considered a rite of passage. However, new teacher frustrations are not limited to low performers. Many talented new teachers become disillusioned early by the lack of support they receive, and it may be the most talented who will more likely explore other career options.

### **Vague requirements simply to provide mentoring are insufficient.**

Although many states recognize the need to provide mentoring to new teachers, state policies merely indicating that mentoring should occur will not ensure that districts provide new teachers with quality mentoring experiences. While allowing flexibility for districts to develop and implement programs in line with local priorities and resources, states also should articulate the minimum requirements for these programs in terms of the frequency and duration of mentoring and the qualifications of those serving as mentors.

### **New teachers in high-needs schools particularly need quality mentoring.**

Retaining effective teachers in high-needs schools is especially challenging. States should ensure that districts place special emphasis on mentoring programs in these schools, particularly when limited resources may prevent the district from providing mentoring to all new teachers.

## **Area 4: Goal B Pay Scales**

### **Rationale**

#### **Compensation reform can be accomplished within the context of local control.**

Teacher pay is, and should be, largely a local issue. Districts should not face state-imposed regulatory obstacles that prevent them from paying their teachers as they see fit; different communities have different resources, needs and priorities. States should remove any barriers to districts' autonomy in deciding the terms for teacher compensation packages.

The state can ensure that all teachers are treated fairly by determining a minimum starting salary for all teachers. However, a state-mandated salary schedule that locks in pay increases or requires uniform pay deprives districts of the ability to be flexible and responsive to supply-and-demand problems that may occur.

#### **There is an important difference between a state's setting the minimum teacher salary and setting a salary schedule.**

What is the difference between establishing a minimum starting salary and a salary schedule? Maine, for example, set a minimum starting salary of \$30,000 for its teachers in 2007-2008. No district may pay less. In contrast, Washington, like many states, has established a salary schedule that lays out what the minimum salary must be at every level. A teacher who has been teaching for four years and has a master's degree may not be paid less than \$40,998. One who has taught for four years and does not have a master's degree may not be paid less than \$34,464. While most districts exceed the state minimum, setting the salary schedule forces districts to adhere to a compensation system

that is primarily based on experience and degree status, even when they would like to have other options.

It should also be noted that the minimums set by many states--whether a minimum starting salary or a complete schedule--are woefully out-of-date, not having been updated for 20 years or more in some cases. The starting salary in Louisiana, for example, has been just over \$12,000 since 1987; the Massachusetts minimum of \$18,000 dates to 1988. Rather than maintain policies lacking meaningful guidance to districts or assurance to teachers, states should remove these regulations and send a clear message to districts that they can decide how to compensate their teachers.

## **Area 4: Goal C Retention Pay**

### **Rationale**

#### **Connecting additional compensation to the awarding of tenure would add to its significance and improve teacher retention.**

Starting salaries for teachers have risen significantly in many states over the last decade. While this may help attract promising candidates, the small pay increases that generally follow, particularly in the first few years of teaching, may deter retention. Most state and district salary schedules provide only small percentage increases in the early years, with the percentage increases widening later. Longevity bonuses are also common. A better strategy would be to connect a significant pay increase to the awarding of tenure, but only if tenure is based on a determination of effectiveness.

A tenure-connected pay increase, whether a significant salary increase or a single lump-sum payment, would serve two important and complementary purposes. First, connecting this payment to a meaningful process for awarding tenure to effective teachers would enhance public understanding that tenure is not awarded automatically to just anyone. In addition, it would provide an important retention strategy, as teachers at the beginning of their careers would know that they will receive additional compensation at the conclusion of their probationary periods if their effectiveness is demonstrated.

## **Area 4: Goal D Compensation for Prior Work Experience**

### **Rationale**

#### **Districts should be allowed to pay new teachers with relevant work experience more than other new teachers.**

State and district salary structures frequently fail to recognize that new teacher hires are not necessarily new to the workforce. Some new teachers bring with them deep work experience that is directly related to the subject matter they will teach. For example, the hiring of a new high school chemistry teacher with

20 years experience as a chemical engineer would most certainly be a great boon to any district. Yet most salary structures would place this individual at the same point on the schedule as a new teacher straight out of college. Compensating these teachers commensurate with their experience is an important retention (as well as recruitment) strategy, particularly when other, non-teaching opportunities in these fields are likely to be more financially lucrative.

As discussed in Goal 4-B, specifics of teacher pay should largely be left to local decision making. However, states should use policy mechanisms to inform districts that it is not only permissible but also necessary to compensate new teachers with related prior work experience appropriately.

## Area 4: Goal E Differential Pay

### Rationale

**States should take the lead in addressing chronic shortages and needs.**

As discussed in Goal 4-B, states should ensure that state-level policies (such as a uniform salary schedule) do not interfere with districts' flexibility in compensating teachers in ways that best meet their individual needs and resources. However, when it comes to addressing chronic shortages, states should do more than simply get out of the way. They should provide direct support for differential pay for effective teaching in shortage subject areas and high-needs schools. Attracting effective and qualified teachers to high-needs schools or filling vacancies in hard-to-staff subjects are problems that are frequently beyond a district's ability to solve. States that provide direct support for differential pay in these areas are taking an important step in promoting the equitable distribution of quality teachers. Short of providing direct support, states can also use policy levers to indicate to districts that differential pay is not only permissible but necessary.

## Area 4: Goal F Performance Pay

### Rationale

**Performance pay is an important retention strategy.**

Performance pay provides an opportunity to reward those teachers who consistently achieve positive results from their students. The traditional salary schedule used by districts pays all teachers with the same inputs (i.e., experience and degree status) the same amount regardless of outcomes. Not only is following a mandated schedule inconsistent with most other professions, it may also deter high-achieving teachers from staying in the field, because it offers no opportunity for financial reward for success.

**States should set guidelines for districts to ensure that plans are fair and sound.**

Performance pay plans are not easy to implement well. There are numerous examples of both state and district initiatives that have been undone by poor planning and administration. The methodology that allows for the measurement of teachers' contributions to student achievement is still developing, and any performance pay program must recognize its limitations (see Goal 3-A for more on the appropriate uses of this methodology). There are also inherent issues of fairness that should be considered when different types of data must be used to assess the performance of different kinds of teachers.

States can play an important role in supporting performance pay by setting guidelines (whether for a state-level program or for districts' own initiatives) that recognize the challenges in implementing a program well. Because this is an area in which there is still much to learn about best practice, states should consider piloting local initiatives as a way to expand the use of and knowledge base around performance pay.

## Area 4: Goal G Pension Sustainability

### Rationale

**Many states' pension systems are based on promises they cannot afford to keep.**

Teacher salaries are just one part of the compensation package that teachers receive. Virtually all teachers are also entitled to a pension, which, upon vesting, provides compensation for the rest of their lives after retirement. In an era when retirement benefits have been shrinking across industries and professions, teachers' generous pensions remain fixed. In fact, nearly all states continue to provide teachers with a defined-benefit pension system, an expensive and inflexible model that neither reflects the realities of the modern workforce nor provides equitable benefits to all teachers.

Under defined benefit systems, states have made an obligation to fund fixed benefits for teachers at retirement. However, the financial health and sustainability of many states' systems are questionable at best. Some systems carry high levels of unfunded liabilities, with no strategy to pay these liabilities down in a reasonable period, as defined by standard accounting practices. Without reform, these systems are a house of cards, vulnerable to collapse as funding cannot keep up with promised benefits. And it is taxpayers who will have to pay if it all tumbles down.

**Pension plans disadvantage teachers early in their careers by overcommitting employer resources to retirement benefits.**

The contribution of employers to their workers' retirement benefits is a valuable benefit, important to ensuring that individuals have sufficient retirement savings. Compensation resources,

however, are not unlimited, and they must fund both current salaries and future retirement benefits. Mandated employer contributions to many states' teacher pension systems are extremely high, leaving districts with little flexibility to be more innovative with their compensation strategies. This is further exacerbated for states in which teachers also participate in Social Security, requiring the district to pay even more toward teacher retirement. While retirement savings in addition to Social Security are necessary, states are mandating contributions to two inflexible plans, rather than permitting options for teachers or their employing districts.

This approach to compensation disadvantages teachers early in their careers, as the commitment of resources to retirement benefits almost certainly depresses salaries and prevents incentives. Lower mandatory employer contribution rates (in states where they are too high; in some states they are shamefully low) would free up compensation resources to implement the kinds of strategies suggested elsewhere in the *Yearbook*. In addition, some states require high employee contributions; the impact this has on teachers' paychecks may impact retention, especially early in teachers' careers.

## Area 4: Goal H Pension Flexibility

### Rationale

#### **Anachronistic features of teacher pension plans disadvantage teachers early in their careers.**

Nearly all states continue to provide teachers with a defined benefit pension system, an expensive and inflexible model that neither reflects the realities of the modern workforce nor provides equitable benefits to all teachers. To achieve the maximum benefits from such a plan, a teacher must begin and end his or her career in the same pension system. Teachers who leave before vesting—which is as much as 10 years in some states—are generally entitled to nothing more than their own contributions plus some interest. This approach may well serve as a retention strategy for some, but on a larger scale, it fails to reflect the realities of the current workforce. At present, the United States is experiencing an explosion in school-age populations in some states, while others decline. The nation's workforce needs to be able to respond to these changes. The current workforce is increasingly mobile, with most entering the workforce expecting to change jobs many times. All workers, including teachers, may move to jobs in other states with no intention of changing careers. To younger teachers in particular, a defined benefit plan may seem like a meaningless part of the compensation package and thus fail to attract young talent to the profession. A pension plan that cannot move across state lines and requires a long-term commitment may not seem like much of a benefit at all.

There are alternatives. Defined contribution plans are fair to all teachers, at all points in their careers. These plans are more equitable because each teacher's benefits are funded by his or her

own contributions plus contributions from the employer specifically on the individual employee's behalf. This is fundamentally more equitable than defined benefit plans, which are generally structured to require new teachers to fund the benefits of retirees. Moreover, defined contribution plans are inherently portable and give employees flexibility and control over their retirement savings. It must also be noted that defined benefit plans can be portable and fair, if structured as cash balance plans or plans that permit the withdrawal of employer contributions.

## Area 4: Goal I Pension Neutrality

### Rationale

#### **It is unfair to all teachers when pension wealth does not accumulate in a uniform way.**

In addition to the ways defined benefit pension systems disadvantage teachers described in Goal 4-H, the way pension wealth accumulates in some systems further compounds the inequity. All pension systems use a multiplier to calculate the benefits an individual is entitled to receive based on salary levels and years of service. For example, a pension system may have a multiplier of 2.0. In such case, pension benefits are determined by multiplying average final annual salary by years of service and then multiplying the product by 2.0. Thus, someone working fewer years with a lower final salary would appropriately receive less in benefits than someone with more years of service and/or a higher final salary. However, the multiplier in many pension systems is not fixed; it increases as years of service increase. When a higher multiplier is used, teachers receive even more generous benefits.

Another way that pension benefits are awarded unfairly is through the common policy of setting retirement eligibility at different ages and years of service. In Hawaii, for example, a teacher with 30 years of service may retire at age 55, while teachers with fewer years of service may not retire until age 62. This means that a teacher who started teaching in Hawaii at age 25 would reach 30 years of service at age 55 and receive seven additional years of full retirement benefits beyond what a teacher that started at age 32 and cannot retire with full benefits until age 62 would receive. A fair system would set a standard retirement age for all participants, without factoring in years of service.

#### **Pension systems affect when teachers decide to retire as they look to maximize their pension wealth.**

The year teachers reach retirement eligibility by age and/or years of service, their pension wealth peaks; pension wealth then declines for each year they work beyond retirement age. Plans that allow retirement based on years of service create unnecessary peaks, and plans that allow a low retirement age create an incentive to retire earlier in one's career than may be necessary. For every year teachers continue to work beyond their eligibility for unreduced retirement benefits, they lose that year of pension benefits, thus decreasing their overall pension wealth.

Although their yearly pension benefits would continue to rise as they earn additional service credit, it would only be at a small percentage per year, which would not make up for the loss of each year of benefits.

To try to balance this incentive to retire, some states have created DROP (Deferred Retirement Option Plan) programs. DROP programs allow participants to place their monthly pension benefits in a private investment account while still teaching and earning a salary, thus retaining those benefits. These teachers are, in effect, earning their pension and salary at the same time, and often at a relatively young age.

A DROP program is a band-aid on the problem; it does not fix what is structurally wrong--retirement at an early age without reduction of benefits. For example, the hypothetical teacher above decides to forgo retiring at age 47 in order to wait and qualify for her state's DROP program at age 55. She now has 33 years of service and has reached a pension equal to 66 percent of her salary. She remains in DROP for the maximum allowable five years. During that time, her five years of lost pension benefits plus her five years of mandatory employee pension contribution have been deposited in a private investment account. Upon retiring at age 60, she would receive the total of that private account plus a lifetime pension benefit annually of 66 percent of her final salary. With the lump-sum payment of her DROP account and monthly pension benefit, she will receive 100 percent of her final average salary for at least 10 years, and, depending on the state, she may also receive Social Security benefits. This generous guaranteed payout would be hard to find in any other profession.

DROP programs do create an incentive for some teachers to remain past their eligible retirement, but at a high cost. DROP programs mean that districts still must find the funds to pay pension benefits to teachers at a relatively young age when those dollars could be more effectively spent.

## Area 5: Goal A

### Licensure Loopholes

#### Rationale

#### **Teachers who have not passed licensing tests may place students at risk.**

While states may need a regulatory basis for filling classroom positions with a few people who do not hold full teaching credentials, many of the regulations permitting this put the instructional needs of children at risk, often year after year. For example, schools can make liberal use of provisional certificates or waivers provided by the state if they fill classroom positions with instructors who have completed a teacher preparation program but have not passed their state licensing tests. These allowances are permitted for up to three years in some states. The unfortunate consequence is that students' needs are neglected in an effort to extend personal consideration to adults who cannot meet minimal state standards.

While some flexibility may be necessary because licensing tests are not always administered with the needed frequency, the availability of provisional certificates and waivers year after year signals that even the state does not put much value on its licensing standards or what they represent. States accordingly need to ensure that all persons given full charge of children's learning are required to pass the relevant licensing tests in their first year of teaching, ideally before they enter the classroom. Licensing tests are an important minimum benchmark in the profession, and states that allow teachers to postpone passing these tests are abandoning one of the basic responsibilities of licensure.

## Area 5: Goal B

### Unsatisfactory Evaluations

#### Rationale

#### **Negative evaluations should have meaningful consequences.**

Teacher evaluations are too often treated as mere formalities, rather than as important tools for rewarding good teachers, helping average teachers to improve and holding weak teachers accountable for poor performance. State policy should reflect the importance of evaluations so that teachers and principals alike take their consequences seriously. Accordingly, states should articulate the consequences of negative evaluations. First, teachers that receive a negative evaluation should be placed on improvement plans. These plans should focus on performance areas that directly connect to student learning and should list noted deficiencies, define specific action steps necessary to address these deficiencies and describe how progress will be measured. While teachers that receive negative evaluations should receive support and additional training, opportunities to improve should not be unlimited. States should articulate policies wherein two negative evaluations within five years are sufficient justification for dismissal.

#### **Employment status should not determine the consequences of a negative evaluation.**

Differentiating consequences of a negative evaluation based on whether a teacher has probationary or nonprobationary status puts the interests of adults before those of students. Ideally, weaknesses and deficiencies would be identified and corrected during the probationary period: if the deficiencies were found to be insurmountable, the teacher would not be awarded permanent status. However, in the absence of meaningful tenure processes based on teacher effectiveness, limiting significant consequences to the probationary period is insufficient. Any teacher who receives a negative evaluation, regardless of employment status, should be placed on an improvement plan, and any teacher who receives multiple negative evaluations, regardless of employment status, should be eligible for dismissal.

## Area 5: Goal C

### Dismissal for Poor Performance

#### Rationale

#### **States need to be explicit that teacher ineffectiveness is grounds for dismissal.**

Most states have laws on their books that address teacher dismissal; however, these laws are much more likely to consider criminal and moral violations than performance. When performance is included, it is usually in a euphemistic term such as “incompetency,” “inefficiency” or “incapacity.” These terms are ambiguous at best and may be interpreted as concerning dereliction of duty rather than ineffectiveness. Without laws that clearly state that teacher ineffectiveness is grounds for dismissal, districts may feel they lack the legal basis for terminating consistently poor performers.

#### **Due process must be efficient and expedited.**

Teachers who are dismissed for any grounds, including ineffectiveness, are entitled to due process. However, process rights that allow for multiple levels of appeal are not fair to teachers, districts and especially students. All parties have a right to have disputes settled quickly. Cases that drag on for years drain resources from school districts and create a disincentive for districts to attempt to terminate poor performers. Teachers are not well served by such processes either, as they are entitled to final resolution quickly.

#### **Decisions about teachers should be made by those with educational expertise.**

Multiple levels of appeal almost invariably involve courts or arbitrators who lack educational expertise. It is not in students' best interest to have the evidence of teachers' effectiveness evaluated by those who are not educators. Teachers' opportunity to appeal should occur at the district level and involve only those with educational expertise. This can be done in a manner that is fair to all parties by including retired teachers or other knowledgeable individuals who are not current district employees.

## Board of Directors

Stacey Boyd, Chair

*Chief Executive Officer, The Savvy Source for Parents*

Chester E. Finn, Jr.
