ALABAMA EARNS C GRADE FOR TEACHER POLICIES IN NEW EDITION OF NATIONAL YEARBOOK

STATE DEMONSTRATES PROGRESS IN STATE TEACHER POLICIES SINCE 2015

Washington, DC--Today, the National Council on Teacher Quality (NCTQ) released its bi-annual *2017 State Teacher Policy Yearbook*, finding that states' previous rapid progress to modernize their teacher policies has largely slowed. Alabama's overall grade for its teaching policies went from a D+ grade in 2015 to a C in 2017. By comparison, the overall grade nationally stagnated, staying at a C- grade.

From 2007 until 2015, most states took aggressive steps to improve the teaching profession. However, since the last edition of the Yearbook in 2015, few states have initiated any new actions to improve their policies guiding how teachers are selected, prepared, evaluated, and retained. As a result, state grades have mostly stagnated, with more state grades decreasing than at any other time in the *Yearbook's* history.

This year, among all 50 states and the District of Columbia, 19 states earned a higher grade than Alabama, seven states performed as well as Alabama, and 24 states earned a lower grade. Florida and Louisiana each earned a B+, the highest grade in this year's *Yearbook*.

"States' teacher policies have an enormous impact on the quality of education in the state," said Elizabeth Ross, Managing Director of State Policy at NCTQ. "By highlighting opportunities for improvement, as well as strong policies, this Yearbook is designed to catalyze state action. We know the progress states are capable of making and urge them to do so. Teachers and students deserve nothing less."

Alabama has several key opportunities for growth. In its 2017 *Yearbook*, NCTQ reported that the state earned a F grade in Retaining Effective Teachers, in part because Alabama does not consider evidence of teacher effectiveness when making decisions regarding Licensure Advancement, Tenure, Dismissal, or Layoffs.

Alabama's top grade was a B- grade in Elementary Teacher Preparation, where the state fully meets the goal for Teaching Elementary Mathematics. Alabama earned commendation for being a "Best Practice" state in Program Performance Measures, as the state connects program graduates' student growth data to their teacher preparation programs.

The full *2017 State Teacher Policy Yearbook* is available [here](#), with comprehensive information regarding each state's teacher policies available in NCTQ's [State Teacher Policy Database](#).

To compare Alabama to other states across the country in eight key measures, including teacher pay, teacher diversity, and educator equity, please look [here](#).
