## **NCTQ RELEASES NEWEST TEACHER PREP RATINGS IDENTIFYING TOP PROGRAMS PREPARING HIGH SCHOOL TEACHERS**

*ALTHOUGH MANY PROGRAMS DO WELL ON SOME ASPECTS OF TEACHER PREPARATION,  
OTHERS STILL STRUGGLE TO DELIVER TRAINING FUNDAMENTALS;  
MAJOR WEAKNESSES FOUND IN PREP FOR SCIENCE AND SOCIAL STUDIES TEACHERS*

### **All Hawaii Undergraduate Secondary Teacher Preparation Programs Rank Near the Bottom; University of Hawaii at Manoa Rated the Highest at Just the 11th Percentile**

Washington DC –Today, the National Council on Teacher Quality (NCTQ) releases its latest ratings for 717 undergraduate programs that prepare high school teachers, including three in Hawaii.

Of the 16 programs nationally named to NCTQ’s “National Top Tier Secondary Teacher Prep Program” list, none are located in Hawaii.

Programs achieve “Top Tier” status because they have solid admission standards, provide sufficient preparation in each teacher candidate’s intended subject area, and show candidates how best to teach that subject. Many also do well in evaluating candidates on how to manage a classroom and providing and ensuring the high quality of practice opportunities.

#### **Teacher Prep Programs in Hawaii:**

Hawaii has two programs falling in the bottom 10 percent nationally, and another program in the 11th percentile:

*Brigham Young University – Hawaii (4th Percentile)*

*University of Hawaii – West O’ahu (4th Percentile)*

*University of Hawaii at Manoa (11th Percentile)*

**Key National Findings:** As for overall performance of the 700+ programs, a common problem that surfaced in the analysis is the weak content preparation provided to science and social studies teacher candidates. That weakness contrasts sharply with almost uniformly strong preparation in English and mathematics content in the same institutions. A sizeable portion of programs (43 percent across the country) struggle to prepare teachers who will be qualified to teach the subjects under the umbrella of either science or social studies. For example, even though history is the subject most teachers with general social studies certification will be asked to teach, one out of five programs requires minimal to no history courses of their candidates.

- Two of the three programs evaluated in Hawaii earn an F for content preparation in the sciences
- None of the three programs evaluated in Hawaii earn an A for content preparation in the social studies.

To see how programs in each state perform on their coverage of science go [here](#), and for social studies go [here](#).

Only 42 percent of programs succeed at teaching future teachers both the content and teaching methods for their subject. For a list of these programs in each state, go [here](#).

#### **Other Key Findings:**

- A quarter of all programs do not require a course in the best ways to teach a specific subject.
- There are early signs of some programs becoming more selective in their admissions, but it is still the case that 44 percent of programs set the bar too low for who gets into their programs. However, two of the three programs in Hawaii draw the majority of their teacher candidates from the top half of the college-going population. For a list of programs by selectivity, go [here](#).
- Among sufficiently selective programs nationally, half also meet diversity goals. None of the programs in Hawaii are selective and diverse. For a list of selective and diverse programs in each state, go [here](#).
- Only 6 percent of programs pay sufficient attention to the quality of student teaching by establishing an expectation that only skilled teachers should be allowed to mentor a future teacher and requiring student teachers to be regularly observed by program staff. Unfortunately, all programs in Hawaii perform poorly in this area. None adequately monitor the quality of mentor teachers, and a third do not require that student teachers are observed frequently. For a list of strong student teaching programs in each state go [here](#).
- Fewer than half of all programs (44 percent) evaluate teacher candidates on their use of the most effective strategies for managing classrooms while student teaching. Of the programs evaluated in Hawaii, only the University of Hawaii at Manoa evaluates future teachers on most or all of these strategies. For a list of programs in each state that perform well on classroom management, go [here](#).

**Recommendations:** Based on this research, NCTQ recommends that states make sure that high school teachers have a deep understanding of the content they will teach students, a goal that can be met by better licensing tests. Most states, including Hawaii, are overdue for revamping their licensing tests, as most allow a high score in one subject to compensate for a low score in another. For instance, Hawaii has inadequate licensing tests for both the general Science and Social Studies certifications. Currently, only Arizona, Minnesota, and Missouri have strong tests in all core subject areas.

NCTQ also calls on programs to raise subject content requirements to require a solid education in *all* the subjects the future teacher will be licensed to teach, even in the broad categories of science and social studies. For more on what programs do to successfully ensure the preparation of all candidates in science, go [here](#), and for social studies, go [here](#).

This edition of the *Teacher Prep Review* analyzes undergraduate programs preparing secondary school teachers. The next set of ratings from NCTQ will appear in Fall 2017 and will cover graduate and alternative (or nontraditional) programs preparing elementary teachers. The ratings for graduate and nontraditional secondary programs will follow in Spring 2018, followed by undergraduate and graduate special education programs in Fall 2018.

***About the National Council on Teacher Quality:***

*The National Council on Teacher Quality (NCTQ) is a nonpartisan research and policy group, committed to modernizing the teaching profession and based on the belief that all children deserve effective teachers. NCTQ is the nation's expert on the quality of teacher preparation programs and evaluates national teacher education against evidence-based criteria. More information about NCTQ can be found on our website, [www.nctq.org](http://www.nctq.org)*
