**NCTQ RELEASES NEWEST TEACHER PREP RATINGS**  
**IDENTIFYING TOP PROGRAMS PREPARING HIGH SCHOOL TEACHERS**

*ALTHOUGH MANY PROGRAMS DO WELL ON SOME ASPECTS OF TEACHER PREPARATION,  
OTHERS STILL STRUGGLE TO DELIVER TRAINING FUNDAMENTALS;  
MAJOR WEAKNESSES FOUND IN PREP FOR SCIENCE AND SOCIAL STUDIES TEACHERS*

**RIVIER UNIVERSITY RANKS AMONG NATION'S BOTTOM 10 PERCENT;  
KEENE STATE COLLEGE RANKS IN BOTTOM 20 PERCENT**

Washington DC – Today, the National Council on Teacher Quality (NCTQ) releases its latest ratings for 717 undergraduate programs that prepare high school teachers, including two in New Hampshire.

Neither program appears on NCTQ's list of the Nation's Top Tier Secondary Teacher Prep Programs. The closest "Top Tier" program is Gordon College in Massachusetts.

"Top Tier" programs have solid admission standards, provide sufficient preparation in each candidate's intended subject area, and show them how best to teach that subject. Many also do well in evaluating candidates on how to manage a classroom and ensuring the high quality of practice opportunities.

**Teacher Prep Programs in New Hampshire**

Both evaluated New Hampshire programs rank in the bottom quarter nationally.

<b>Undergraduate Secondary Programs in New Hampshire</b>	<b>Percentile</b>
Keene State College	20
Rivier University	9

**Key National Findings:** As for overall performance of the 700+ programs, a common problem that surfaced in the analysis is the weak content preparation provided to science and social studies teacher candidates. That weakness falls in sharp contrast to almost uniformly strong preparation in English and mathematics content in the same institutions. A sizeable portion of programs (43 percent across the country) struggle to prepare teachers who will be qualified to teach the subjects under the umbrella of either science or social studies. For example, even though history is the subject most teachers with

general social studies certification will be asked to teach, one out of five programs requires minimal to no history courses of their candidates.

- Through a combination of licensing test and coursework requirements, both programs in New Hampshire earn an A for content preparation in the sciences.
- Neither New Hampshire program earns an A for content preparation in the social studies.

To see how programs in each state perform on their coverage of science go [here](#), and for social studies go [here](#).

Only 42 percent of programs succeed at teaching future teachers both the content and teaching methods for their subject. For a list of these programs in each state, go [here](#).

#### **Additional Key Findings::**

- A quarter of all programs do not require a course in the best ways to teach a specific subject. However, both programs evaluated in New Hampshire require such a course.
- There are early signs of some programs becoming more selective in their admissions, but it is still the case that 44 percent of programs set the bar too low for who gets into their programs. No New Hampshire program is sufficiently selective. For a list of programs' selectivity rank in each state go [here](#).
- Of those programs that were found to be sufficiently selective, half were commended for also meeting diversity goals. For a list of programs in each state that are both selective and diverse, go [here](#).
- Only 6 percent of programs pay sufficient attention to the quality of student teaching by establishing an expectation that only skilled teachers should be allowed to mentor a future teacher and requiring student teachers to be regularly observed by program staff. No New Hampshire program meets both of these criteria. For a list of programs with strong student teaching in each state go [here](#).
- Fewer than half of all programs (44 percent) evaluate teacher candidates on their use of the most effective strategies for managing classrooms while student teaching. Both programs evaluated in New Hampshire evaluate future teachers on most or all of these strategies. For a list of programs that perform well on classroom management in each state, go [here](#).

**Recommendations:** Based on this research, NCTQ recommends that states make sure that high school teachers have a deep understanding of the content they will teach students, a goal that can be met by better licensing tests. Most states, including New Hampshire, are overdue for revamping their licensing tests, as most allow a high score in one subject to compensate for a low score in another. For instance, New Hampshire could strengthen teacher content knowledge by requiring that licensing tests in Physical Science and Social Studies adequately assess teachers in all of the subjects they will be certified to teach. Currently, only Arizona, Minnesota, and Missouri have strong tests in all core subject areas.

NCTQ also calls on programs to raise subject content requirements to require a solid education in *all* the subjects the future teacher will be licensed to teach, even in the broad categories of science and social studies. For more on what programs do to successfully ensure the preparation of all candidates in science, go [here](#), and for social studies, go [here](#).

This edition of the *Teacher Prep Review* analyzes undergraduate programs preparing secondary school

teachers. The next set of ratings from NCTQ will appear in Fall 2017 and will cover graduate and alternative (or nontraditional) programs preparing elementary teachers. The ratings for graduate and nontraditional secondary programs will follow in Spring 2018, followed by undergraduate and graduate special education programs in Fall 2018.

***About the National Council on Teacher Quality:***

*The National Council on Teacher Quality (NCTQ) is a nonpartisan research and policy group, committed to modernizing the teaching profession and based on the belief that all children deserve effective teachers. NCTQ is the nation's expert on the quality of teacher preparation programs and evaluates national teacher education against evidence-based criteria. More information about NCTQ can be found on our website, [www.nctq.org](http://www.nctq.org).*
